The key to writing a good novel is to tell a good story, and this book will show you how to tell a good story in novel form. We'll look at all the important parts of a satisfying story structure: -The introduction. How to set the stage for your book. -The conflict and the inciting incident. All stories revolve around conflict, and the more emotionally significant the conflict, the

better. -Rising action. Your characters need to take action to resolve their conflict, and they will experience setbacks and failures. -The climax. The more significant the conflict, the more powerful its climax and resolution. -The resolution. We see how the conflict and its resolution have changed the characters. Finally, this book contains a complete annotated copy of the author's novel SILENT ORDER: IRON HAND to provide an example of a novel that follows the rules of story structure. From the introduction to the resolution, STORYTELLING: HOW TO WRITE A NOVEL will show you how to write a compelling novel of your own!

*A Companion to Ricoeur's Freedom and Nature* Scott Davidson, 2018-06-13 Paul Ricoeur's first book, *Freedom and Nature*, introduces many themes that resurface in various ways throughout his later work, but its significance has been mostly overlooked in the field of Ricoeur studies. Gathering together an international group of scholars, *A Companion to Freedom and Nature* is the first book-length study to focus exclusively on *Freedom and Nature*. It helps readers to understand this complex work by providing careful textual analysis of specific arguments in the book and by situating them in relation to Ricoeur's early influences, including Merleau-Ponty, Nabert, and Ravaisson. But most importantly, this book demonstrates that *Freedom and Nature* remains a compelling and vital resource for readers today, precisely because it resonates with recent developments in the areas of embodied cognition, philosophical psychology, and philosophy of the will. *Freedom and Nature* is fundamentally a book about embodiment, and it situates the human body at the crossroads of activity and passivity, motivation and causation, the voluntary and the involuntary. This conception of the body informs Ricoeur's unique treatment of topics such as effort, habit, and attention that are of much interest to scholars today. Together the chapters of this book provide a renewed appreciation of this important and innovative work.
