*AI\*IA 2005: Advances in Artificial Intelligence* Sara Manzoni, 2005-10-06 This volume collects the papers selected for presentation at the IX Congress of the Italian Association for Artificial Intelligence (AI\*IA), held in Milan at the University of

Milano-Bicocca (September 21-23, 2005). On the one hand this congress continues the tradition of AI\*IA in organizing its biannual scientific meeting from 1989; on the other hand, this edition is a landmark in the involvement of the international community of artificial intelligence (AI), directly involving a broad number of experts from several countries in the Program Committee. Moreover, the peculiar nature of scientific research in artificial intelligence (which is intrinsically international) and several consolidated international collaborations in projects and mobility programs allowed the collection and selection of papers from many different countries, all around the world, enlarging the visibility of the Italian contribution within this research field. Artificial intelligence is today a growing complex set of conceptual, theoretical, methodological, and technological frameworks, offering innovative computational solutions in the design and development of computer-based systems. Within this perspective, researchers working in this area must tackle a broad range of knowledge about methods, results, and solutions coming from different classical areas of this discipline. The congress was designed as a forum allowing researchers to present and discuss specialized results as general contributions to AI growth.

The Queen's Agent John Cooper, 2021-11-15 Elizabeth I came to the throne at a time of insecurity and unrest. Rivals threatened her reign; England was a Protestant island, isolated in a sea of Catholic countries. Spain plotted an invasion, but Elizabeth's Secretary, Francis Walsingham, was prepared to do whatever it took to protect her. He ran a network of agents in England and Europe who provided him with information about invasions or assassination plots. He recruited likely young men and 'turned' others. He encouraged Elizabeth to make war against the Catholic Irish rebels with extreme brutality and oversaw the execution of Mary Queen of Scots. The Queen's Agent is a story of secret agents, cryptic codes, and ingenious plots, set in a turbulent period of England's history. It is also the story of a man devoted to his queen, sacrificing his every waking hour to save the threatened English state.
