Disability as a Social Construct Claire H. Liachowitz, 2010-11-24 Wounded soldiers, injured workers, handicapped adults, and physically impaired children have all been affected by legislation that reduces their opportunities to live a functional life. In *Disability as a Social Construct*, Claire Liachowitz contends that disability is not merely a result of a handicap but can be imposed by society through devaluation and segregation of people who deviate from physical norms. She analyzes pertinent American legislation, primarily from 1770 to 1920, to provide a new perspective on the mechanisms that translate physical defects into social and civil inferiority.

**The Social Construction of Intellectual Disability** Mark Rapley, 2004-06-10 Intellectual disability is usually thought of as a form of internal, individual affliction, little different from diabetes, paralysis or chronic illness. This study, the first book-length application of discursive psychology to intellectual disability, shows that what we usually understand as being an individual problem is actually an interactional, or social, product. Through a range of case studies, which draw upon ethnomethodological and conversation analytic scholarship, the book shows how persons categorized as 'intellectually disabled' are produced, as such, in and through their moment-by-moment interaction with care staff and other professionals.

**Disability as a Social Construct** Claire H. Liachowitz, 1988 Wounded soldiers, injured workers, handicapped adults, and physically impaired children have all been affected by legislation that reduces their opportunities to live a functional life. In *Disability as a Social Construct*, Claire Liachowitz contends that disability is not merely a result of a handicap but can be imposed by society through devaluation and segregation of people who deviate from physical norms. She analyzes pertinent American legislation, primarily from 1770 to 1920, to provide a new perspective on the mechanisms that translate physical defects into social and civil inferiority.

*Digital Disability* Gerard Goggin, Christopher Newell, 2003 Media representation of and for the disabled has been recharged in recent years with the expansion of new media worldwide. Interactive digital communications-such as the Internet, new varieties of voice and text telephones, and digital broadcasting-have created a need for a more innovative understanding of new media and disability issues. This engaging analysis offers a global perspective on how people with disabilities are represented as users, consumers, viewers, or listeners of new media, by policymakers, corporations, programmers, and the disabled themselves.

**The Faces of Intellectual Disability** Licia Carlson, 2010 The Faces of Intellectual Disability challenges current thinking about cognitive impairment in order to come to terms with what it means to treat people with intellectual disabilities in an ethical manner. As she embraces the task of reassessing philosophical views of intellectual disability, Licia Carlson shows how we can affirm the dignity and worth of intellectually disabled people by dropping comparisons to nonhuman animals and confronting fears and discomforts about mental impairment. Carlson presents a complex history of ideas and notions about cognitive impairment, the treatment of intellectually disabled people, and social and cultural reactions to them. Sensitive and clearly argued, this book offers significant new thinking on recent trends in disability studies and philosophy.

Disability and the Sociological Imagination Allison C. Carey, 2022-05-16 Disability and the Sociological Imagination provides an expertly developed and accessible overview of the relatively new and growing area of sociology of disability. Written by one of the field's leading researchers, it discusses the major theorists, research methods, and bodies of knowledge that represents sociology's key contributions to our understanding of disability. Unlike other available texts, it examines the ways in which major social structures contribute to the production and reproduction of disability, and examines how race, class, gender, and sexual orientation shape the disability experience

*Disability and Social Movements* Rachel Carling-Jenkins, 2016-05-23 This book provides the reader with a ground-breaking understanding of disability and social movements. By describing how disability is philosophically, historically, and theoretically positioned, Carling-Jenkins is able to then examine disability relationally through an evaluation of the contributions of groups engaged in similar human rights struggles. The book locates disability rights as a new social movement and provides an explanation for why disability has been divided rather than united in Australia. Finally, it investigates whether the recent campaign to implement a national disability insurance scheme represents a re-emergence of the movement. It will be of interest to all scholars and students of both disability studies and social movements.

**Embodying the Social** Esther Saraga,2005-08-17 This book opens the series with a consideration of the social construction of social difference. Taking the body as the point of departure, it deals with the processes through which social problems and social inequalities are constructed. In particular, it examines the shifting ways in which our ideas about issues such as 'disability', 'race' and ethnicity, and sexuality influence the development of social policies.

The Social Construction of Difference and Inequality: Race, Class, Gender and Sexuality Tracy E. Ore,2006 This anthology examines the social construction of race, class, gender, and sexuality and the institutional bases for these relations. While other texts discuss various forms of stratification and the impact of these on members of marginalized groups, Ore provides a thorough discussion of how such systems of stratification are formed and perpetuated and how forms of stratification are interconnected. The anthology supplies sufficient pedagogical tools to aid the student in understanding how the material relates to her/his own life and how her/his own attitudes, actions, and perspectives may serve to perpetuate a stratified system.

*Disability and Public Health* Charles E. Drum,2009 *Disabilities and Public Health* opens up a new vista and territory by drawing down a new set of tools and strategies from the public health domain to examine the social determinants of health for people with disabilities and to develop systems of health education, health literacy and organization of services to improve their health and well-being. It examines the circumstances of disability from a personal, cultural, environmental, clinical, and policy perspective and ties it together in a public health paradigm.

Mathematical Structures of Social Mobility Raymond Boudon,1973

**Autonomy and Social Policy** Timothy Stainton,1994 This work considers the idea of autonomy as the basis for rights and their implications for social policy. The theoretical framework developed in the book, though generally applicable, is specifically applied to mental handicap and community care policy.

Marginal Groups and Mainstream American Culture Yolanda Estes,2000 They are often portrayed as outsiders: ethnic minorities, the poor, the disabled, and so many others—all living on the margins of mainstream society. Countless previous studies have focused on their pain and powerlessness, but that has done little more than sustain our preconceptions of marginalized groups. Most accounts of marginalization approach the subject from a distance and tend to overemphasize the victimization of outsiders. Taking a more intimate approach, this book reveals the personal, moral, and social implications of marginalization by drawing upon the actual experiences of such individuals. Multidisciplinary and multicultural, *Identity on the Margin* addresses marginalization at a variety of social levels and within many different social phenomena, going beyond familiar cases dealing with race, ethnicity, and gender to examine such outsiders as renegade children, conservative Christians, and the physically and mentally disabled. And because women are especially subject to the effects of marginalization, feminist concerns and the marginalization of sexual practices provide a common denominator for many of the essays. From problems posed by complimentary racism to the status of gays in Tony Blair's England, from the struggle of Native Americans to preserve their identities to the singular problems of single mothers, *Identity on the Margin* takes in a broad spectrum of cases to provide theoretical analysis and ethical criticism of the mechanisms of identity formation at the edges of society. In all of the cases, the authors demonstrate the need for theory that initiates social change by considering the ethical implications of marginalization and criticizing its harmful effects. Bringing together accounts of marginalization from many different disciplines and perspectives, this collection addresses a broad audience in the humanities and social sciences. It offers a basis for enhancing our understanding of this process—and for working toward meaningful social change.

Disabilities: Responses : practice, legal, and political frameworks Catherine A. Marshall,2009 In these unprecedented volumes, authors from around the world spotlight the latest knowledge on disability, including the social, legal, and political issues that come to bear on people with disability. These authors are researchers, practitioners, people with disability, and family members. Through their experiences, they share with us the nature of disability, the challenges people with disabilities face, approaches to disability around the world, and promising efforts for rehabilitation that are on the horizon.

We also learn, in these volumes, about social actions that have advanced human rights for people with disabilities in countries around the world. Yet, we learn that in these same countries, discriminatory actions against people with disabilities continue to occur. The impact of different cultural beliefs about disability are explored and these beliefs are juxtaposed against legislative responses. In all three volumes, people with disabilities share their personal narratives about events they have faced in society. They provide rich examples of how culture, social interactions and legislation can impact on people.-- Publisher description.
