

The Sun And The Star Quotes

Henry T. Colebrooke

From Four Royal Persian Stars to Jesus and the Sun Eric Norland, 2013-09 Roughly five thousand years ago, the Persians noticed four stars were located at specific locations along the ecliptic at which the sun would pass in front of during the four seasons. These four stars and their constellations became integrated into the lore and mythology of religion. The royal Persian stars then became intertwined with the story of Jesus Christ, the Holy Roman Catholic Church, and St. Peter's Basilica. In From Four Royal Persian Stars to Jesus and the Sun, author Eric Norland presents a primer on modern astronomy to show how this relationship developed. A world traveler and amateur astronomer, Norland delivers an explanation about the core of the Christian religion. He discusses the astronomy-related misunderstandings people had long ago, shows how these beliefs became the foundations of Christian religion, and provides an account of how many other religions found their inspiration. With a host of graphics and examples, From Four Royal Persian Stars to Jesus and the Sun digs into the core of religion and explains its early connection to astronomy.

The Science of Planetary Signatures in Medicine Jennifer T. Gehl, 2017-01-27 A comprehensive guide to the cosmic influences that underlie health and how to apply them for profound health and healing • Examines how ancient and modern traditions of healing interconnect through the doctrine of signatures, "As above, so below" • Reveals how one's astrological chart has implications for personal health and healing • Explains how each sign of the zodiac corresponds not only to parts of the body and its chakras but also to specific plants, herbs, colors, and emotions • Explores how to use sound healing to harmonize astrological imbalances When we look at the vast and intricate cosmos--galaxies, planets, organisms, organs, cells, molecules, atoms--there is a fundamental order, a music or harmony of the spheres. Our cells reflect the images of galaxies seen through our telescopes. We are the microcosm, reflecting the macrocosm of the heavens. Our ancestors understood these patterns and connections between humanity and the universe and developed spiritual and healing traditions in line with these cosmic truths. Yet in the 19th century, knowledge of these connections was set aside as medical science sought to create the "one size fits all" approaches to healing that dominate modern medicine today. In this comprehensive exploration of the celestial influences that underlie health and healing, Jennifer Gehl, with Marc Micozzi, examines how ancient and modern traditions of healing interconnect through the doctrine of signatures, "As above, so below". She reveals how one's celestial nature--the arrangement of the cosmos at the moment of birth--has implications for personal health and how each

sign of the zodiac corresponds to parts of the body, the chakras, and specific plants, herbs, colors, and emotions. She explains how sound re-arranges forms according to the principles of harmony, leveraging not only the human self-regulating capacity to restore health but also that of the Earth to restore balance and harmony. Also explored are the recurrence of geometric forms in nature and how to apply this knowledge in sound healing and medical astrology. Weaving together the threads of ancient science and spirit that formed the original tapestry of medicine, Gehl explains how to restore the cosmic foundations of healing for personal, planetary, and universal health and wellbeing.

Symbolism of the circle dance of the planets around the Sun-God Helena Petrovna Blavatsky, 2019-09-17 The world is asked to believe that, while the Planetary Angels of the Church are divine Beings, the genuine Seraphim, these very same angels under identical names and planets are the “false” Gods of the Ancients. The circle dance of the planets, prescribed by the Amazons for the Mysteries, is called “lascivious” when performed by the Pagans, but not King David’s reprehensible dance, during which he uncovered himself before his maid-servants in a public thoroughfare. It was David who introduced Jehovistic worship into Judæa, after sojourning so long among the Tyrians and Philistines, where these rites were common. Having borrowed Osiris from the Egyptians, the Church Fathers thought little of helping themselves to his brother Typhon. The seven-branched chandelier of the Israelites, as well as the “wanderers” of the Greeks, had a far more natural meaning, a purely astrological one to begin with. But, symbol for symbol, we prefer the sun to a candlestick. One can understand how the latter came to represent the sun and planets, but no one can admire the chosen symbol. There is poetry and grandeur in the sun when it is made to symbolise the Eye of Ormuzd, or of Osiris. One must forever fail to perceive that any particular glory is rendered to Christ by assigning to him the trunk of a candlestick in a Jewish synagogue. The chandelier represented the motion of the seven luminaries, describing their astral revolution. To the right and the left of that candelabrum projected six branches, each of which had its lamp, because the Sun placed as a candelabrum in the middle of other planets distributes light to them. There are two suns, a sun adored and a sun adoring. There are seven series of Cosmocratores, which are double: the higher ones are commissioned to support and guide the superior world; the lower ones, the inferior world. The Zoroastrians, Mazdeans, and Persians borrowed their conceptions from India; the Jews borrowed their theory of angels from Persia; the Christians borrowed theirs from the Jews. The Zoroastrian Aryans transformed the Devas, the bright Gods of India, into daevas or devils. It was their Karma that, in their turn, the Christians should vindicate on this point the Hindus. Then Ormuzd and Mithra became the daevas of Christ and Mikael, the dark lining and aspect of the Saviour and Angel. The day of the Karma of Christian theology will come in its turn. Hence, the latest interpretation by Churches that the seven-branched candlestick represents the seven Churches of Asia, and the seven planets which are the angels of those Churches. And yet, in the face of all this evidence, sun, moon, planets, are shown as being demoniacal before, and divine only after, the appearance of Christ. Then Jehovah then is made to be the Sun, and thence also

the Christ of the Roman Church. The only point of difference between the exotericism of the Latin Church and that of the old Astrolators lies in the entirely arbitrary interpretation of emblems, symbols, allegories, and even names which have been shown to be identical in both.

Pathways of the Sun Dean Liprini,2006 A sacred light grid surrounds Table Mountain -- a network of sacred springs, caves, stone giants and geometrically aligned marker-stones. Some have human faces with their eyes aligned to interact with the cardinal directions of the sun, the Solstices and Equinoxes. Who did this and why? What message do they hold for us? Following the pathways of the sun through the eyes of ancient peoples, we discover the antiquity of the human spirit and the interconnectedness of all things. The book takes one on a colourful journey of rediscovery. It has been designed so that readers (of all ages) can open it at any page and be drawn into the journey through the magical pathway and photographs that weave the book together.

The Architecture of America's Stonehenge Mary E. Gage,2021-06-01 The main complex of the America's Stonehenge site in New Hampshire is a collection of stone chambers, enclosures, niches, standing stones, carved drains & basins, and astronomical alignments. The archaeological community has largely dismissed this seemly eclectic collection of structures as the work of an eccentric farmer named Jonathan Pattee who built his house on top of the ruins in the 19th century. Other

researchers have sought to compare the chambers and astronomical alignments to stone structures from around the world built by other ancient peoples. No one has thought to evaluate the site on its own merits, specifically evaluating its architecture. Architecture can tell you a lot about a culture. Using this approach the author unravels the mystery surrounding the site. This architectural study revealed the site was built in a series of distinct phases each with its own unique style while at the same time incorporating key concepts and ideas from previous phases. There is a clear evolution of building skills and cultural ideas that can be followed through the architectural build-out of the site. Because key features and ideas were carried forward from one phase to the next, we now know that the site was the work of a single culture over a several thousand year period. Stone tools and pottery recovered from archaeological excavations at the site confirm that the builders were Native Americans. The idea of Native Americans building stone structures for ceremonial and spiritual purposes has gained a lot of credibility over the past twenty-five years. There is mounting evidence that hundreds of ceremonial stone landscapes (CSL) with stone cairns, niches, enclosures, standing stones, chambers and astronomical alignments found throughout northeastern United States are part of a broad based Native American cultural tradition. The America's Stonehenge site is one of the most sophisticated and culturally complex of these sacred ceremonial places. The second part of this book uses primary source materials like deeds, town records, court cases and genealogy to reconstruct the history of the Pattee family who owned the hill where the site is found from 1739 through 1863. The Pattees started out in the 1700s as a prosperous family with a house in North Salem village and a 248 acre farm. By the 1820s, the third generation was reduced to owning 15 acres of the original farm and living in a small house built on top of the ruins of the site. Despite his many financial misfortunes, Jonathan Pattee (third generation) managed to hold on to and protect the site.
