Megalithic Science's General Quantum Theory Selma Gralher,2018 The author is an experienced systems and organisational analyst who examined ancient sources with present-day analytical methods to retrieve our ancestors' sciences. This uncovered a general quantum theory offering answers to current questions such as, • Why do galaxies form spiral arms? • Why is the universe expanding at an accelerating rate? • What can travel through a black hole? • What does dark matter do? • Where does dark energy come from? • What does String Theory describe? • Why is it impossible to detect gravitons? • Which other boson types exist, what do they do, and when is the best time to spot them? This systematic analysis builds on the findings of experts from diverse scientific domains. It examines a selection of ancient traditions and texts in the context of
