

Americas Cultural Revolution How The Radical Left Conquered Everything

Stephan Thernstrom

America's Cultural Revolution Christopher F. Rufo, 2023-07-18 AN INSTANT NEW YORK TIMES, USA TODAY, AND AMAZON BESTSELLER America's most effective conservative intellectual proves once and for all that Marxist radicals have taken over our nation's institutions. In the 1960s, Mao launched China's Cultural Revolution. Cities grew overcrowded. Technocrats demanded progress from above. Anyone opposed was sent to be "re-educated." China's revolution was bloody, fast, and a failure, but what if America started a revolution at the same time, based on the same bad ideas, and it's just been slower, calmer, and more effective? In his powerful new book, Christopher F. Rufo uncovers the hidden history of left-wing intellectuals and activists who systematically took control of America's institutions to undermine them from within. America's Cultural Revolution finally answers so many of the questions normal Americans have, such as: • Why is nearly every major corporation bending the knee to a far-left agenda? • How did DEI suddenly become the department no institution can continue without? • Why is race the main thing America's rich, white elite wants to talk about? • When did the left adopt all this doublespeak, saying progress is a lack of progress, equality is not equality, speech is violence, and violence is speech? • Has the goal of the left, for a century, actually been the destruction of every Western institution? Readers may not know the names of Herbert Marcuse, Angela Davis, Paulo Freire, and Derrick Bell, but they will recognize the ideas they spread. How their radical, destructive ideology slowly worked its way from prisons to academia to classrooms to your human resources department will come as a shock. Failing to act soon, Rufo warns, could allow the radical left to achieve their ultimate objective: replacing constitutional equality with a race-based redistribution system overseen by bureaucratic 'diversity and inclusion' officials. Most Americans don't want this, but most Americans are no longer in control of our institutions. If the mainstream media's depiction of a failing dystopia in need of a fresh start never sounded right to you, this expose and call to arms is the book you've been looking for.

The Dialectic of Herbert Marcuse Patrick Gamsby, 2024-09-05 Herbert Marcuse (1898-1979) was one of the most recognizable and controversial public intellectuals throughout the 1960s until his death in the late 1970s, but today Marcuse's work largely stands in the shadows of other Frankfurt School members and critical thinkers. Despite having once

held a prominent and influential position amongst scholars, activists, and readers in the twentieth century, it is argued that Marcuse's work nevertheless remains largely misunderstood. The Dialectic of Herbert Marcuse offers a new interpretation of Marcuse, one that attempts to show how Marcuse's work has so often been turned into something else—into its opposite. In shining a light on parts of the unknown Marcuse, through the use of archival material and published works, this book reveals Marcuse's Critical Theory to be one of hope, not one of pessimism, as it is so often portrayed to be. Ultimately, it is argued that Marcuse's Critical Theory remains a vital and important body of work for present-day society and ought to be revisited.

Reconstructing the "Uni-versity" Harvey J. Graff, 2025-09-14 Slogans, myths, and isolated anecdotes are inadequate substitutes for documented history and contextual understanding. Literature on the history of higher education is dominated by ahistorical and contextually ignorant slogans. Seldom acknowledged, in discussions of the "decline" or "failure" of the modern university, is 1) how long it has been going on (at least since the 1960s); and 2) universities' own complicity in this long, complicated, and contradictory process. Myths intertwine inseparably with slogans to echo yet another "lost cause." Our collective, as well as individual, pasts provide essential lessons if we know how to read and learn from them. More complicated is imagining a plausible better future for universities. In *Reconstructing the "Uni-versity": From the Ashes of the "Mega- and Multi-versity" to the Futures of Higher Education*, Harvey J. Graff, bringing experience from over 50 years as a professor, provides an accurate history of higher education, redefining the issues and terms to establish a new agenda.

TURMOIL IN USA Mundiya Venugopalan, 2024-12-04 In this book we try to describe what created the turmoil: the changing American family, children's education, employment, open borders and illegals in the millions, impact of crime and proxy wars, taxation and spending in the trillions increasing national debt, disputed elections, two failed assassination attempts on former president Trump, a coup on sitting president Biden by Demo elites, and losing our greatness. Average Americans can only impact the direction of the country by voting in elections, but now there is too much money in our elections for the less competent to get elected making it dangerous to the overwhelming share of we the people. Common people going to a supermarket find grocery prices up by 20% though wages after taxation have been down nearly 5%. Biden's DEIA and "woke" government has created new race problems in our schools and universities. We don't want Biden's sweeping Title IX proposal that would bring in gender identity and sexual orientation in schools just as financier George Soros aimed for biological males to compete in girls' sports and use bathrooms and locker rooms that correspond with their "gender identity." We need to reorganize the departments involved in educating our children and the educational foundations in schools and colleges at all levels. President Biden's open border policy brought in several million strangers of unknown value and utility for us taxpayers to support. Family structure the country was proud of since inception was destroyed. Starting new proxy wars with weak woke military and financing them on taxpayer dime, at the same time not caring for citizen safety from crime and drug proliferation became undesirable to many citizens. Worst of all these, playing Mother

Nature on climate and proxy wars with huge amounts of our money has not been rewarding. Certainly, we don't want four more years of Biden's taxing and spending that would increase the federal debt for our children immensely. Having lost people support Biden withdrew his nomination and Harris was chosen to oppose former president Trump. We prayed that America become safe soon after the 2024 election with a Trump victory. People want to be prideful in this country again. People want a cheerleader for this nation, not the one without redeeming value we now have sleeping most of the time on the beach. And we don't have much hope if flip-flop giggling Vice-president Harris with "no change in value" gets elected with "Joy." To our surprise former President Trump painted USA Republican red defeating Harris badly by midnight on election night.

Public Relations Theory in Practice Timothy Penning, 2025-06-02 There is nothing more real than theory. Today's public relations professionals need to account to management and clients for whether they have caused stakeholders to make meaningful change in their attitudes and behaviors that match organizational objectives. This requires strategy based on established theory that is well-reasoned and tested, not just informed guesses and clever tactics. This book is an overview of theories that are relevant to a strategic practice of public relations. Brief theory explanations are followed by specific strategic applications in everything from segmenting publics, to planning research, to strategic messaging, to setting campaign objectives, and counseling organizational leadership. A public relations professional who understands and applies theory will be more strategic.

America Rediscovered Robert Garrett with Robert Watkins, 2025-09-09 America must rediscover its national heritage, rooted in the Enlightenment, Western Christianity, and classical Greece and Rome. We now live in an age when traditional values and Western civilization itself are under assault from nearly every side. This book seeks to celebrate the American story, so rarely taught today, by highlighting how it began, where we are presently, and answers for the future. Its message is for all people of goodwill, regardless of race, political party, or religious persuasion. It acknowledges God because that much should be self-evident from American history and the founding documents. By what authority did the colonists dare to challenge the King of England, George III, and notify him that they had seized his thirteen colonies? The Declaration of Independence answers that question by appealing to the laws of nature and nature's God, the Creator. The authors of America Rediscovered believe that readers may find understanding, hope, and answers in the postmodern age if we seek to strengthen traditional foundations and build a more perfect union.

Bad Education Matt Goodwin, 2025-02-06 'Buy this book' DOUGLAS MURRAY 'An urgent call for reformation' DAVID GOODHART THE EXPLOSIVE NEW BOOK FROM THE SUNDAY TIMES BESTSELLING AUTHOR OF NATIONAL POPULISM AND VALUES, VOICE AND VIRTUE. Depressed tutors and disillusioned students. Funding crises and falling standards. Culture wars and campus protests. Welcome to the broken world of academia. Welcome to Bad Education. -----

Our universities are broken. Established as sanctuaries of truth and higher learning, they are now decaying institutions that are failing a generation of young people. Consumed by funding and admissions crises, mired in political scandal and governed by self-interest, their founding principles have been corrupted. This explosive book shows us why, and what we must do to fix them. Matt Goodwin spent decades working as an academic in some of the world's leading universities, delivering underfunded courses to increasingly disengaged lecture theatres, sitting on rudderless committees, counselling depressed colleagues and concerned students, watching standards slip and academic integrity decline. At the heart of this crisis is an increasingly politicised campus. Once bastions of free speech, forums for open debate and incubators of bold new ideas, our universities are increasingly becoming monocultures, ruled by an ideology that is silencing respected voices, stifling discussion and violently shutting down diverse opinion, betraying intellectual freedom and failing to deliver the very basics of an education. Unflinching, shocking and urgent, this first-hand account provides an insider's view of how the founding principles of academia are in decline and why we should all consider what this means for the students of today, tomorrow and the world they will shape.

Polarized by Degrees Matt Grossmann, David A. Hopkins, 2024-09-05 Over the past several decades, American society has experienced fundamental changes – from shifting relations between social groups and evolving language and behavior norms to the increasing value of a college degree. These transformations have polarized the nation's political climate and ignited a perpetual culture war. In a sequel to their award-winning collaboration *Asymmetric Politics*, Grossmann and Hopkins draw on an extensive variety of evidence to explore how these changes have affected both major parties. They show that the Democrats have become the home of highly-educated citizens with progressive social views who prefer credentialed experts to make policy decisions, while Republicans have become the populist champions of white voters without college degrees who increasingly distrust teachers, scientists, journalists, universities, non-profit organizations, and even corporations. The result of this new “diploma divide” between the parties is an increasingly complex world in which everything is about politics – and politics is about everything.
