The Laws of the Knowledge Workplace Dariusz Jemielniak,2016-03-03 In *The Laws of the Knowledge Workplace*, Dr Jemielniak has collected research-based chapters providing deep, interdisciplinary insight into knowledge professions, addressing issues of professional identity, emotion, power and authority, trust and indoctrination, and management behaviour. This leads to an examination of issues related to time and work scheduling and its bearing on play, family, symbolic sacrifices, and employee burn-out. In particular, it delves into the identity shifts between knowledge workers and managers, nepotism and turnover intentions among knowledge workers, the implementation of engineering projects, coordination problems in offshore production systems, leadership in virtual teams, decision support systems; taking into account the moral aspects of consequences, netnography as a tool for studying knowledge work, and innovative networks in the aviation industry. The accounts and studies in this book come from management, organization studies, sociology, and anthropology of work perspectives and are fully international in scope. They highlight the scale of the serious changes in occupational roles and to the meaning of work that is taking place in knowledge-intensive environments and give a pointer to what might constitute good and bad management practice in knowledge-intensive companies.

Adaptations of Mental and Cognitive Disability in Popular Media Whitney Hardin,Julia E. Kiernan,2022-03-31 Examining representations of mental difference, this collection focuses on the ways that adaptations (including remakes, reboots, and other examples of remixed narratives) can shape and shift the social contexts and narratives we use to define mental disability. The movement of narratives across media via adaptation, or within media but across time and space in the case of remakes and reboots, is a common tactic for revitalization, allowing storytellers to breathe new life into tired narratives, remedying past inaccuracies and making them accessible and relevant for contemporary audiences. Thus, this collection argues that adaptation provides a useful tool for examining the constraints or opportunities different media impose on or afford narratives, or for measuring shifts in ideology as narratives move across cultures or through time. Further, narrative

functions within this collection as a framework for examining the ways that popular media exerts rhetorical power, allowing for deeper understandings of the ways that mental disability is experienced by differently situated individuals, and revealing relationships with broader social narratives that attempt to push definitions of disability onto them.

The Routledge Companion to Postmodernism Stuart Sim, 2001 Recent years have witnessed radical changes in our social and political existence, with traditional ideas and ways of living increasingly being called into question. Such questioning has led to a crisis of authority that goes under the general name of postmodernism. But what does this word mean and why is it so important? The Routledge Companion to Postmodernism provides all the answers you need. It is an accessible and comprehensive survey of the intellectual developments that have brought about a wholesale shift in cultural perspectives. Combining detailed essays, written by experts in the subject, with an invaluable A-Z guide to 'who's who' and 'what's what' in postmodernism, this is the guide to a phenomenon that has shaped today's world.--En la solapa.

Goethe & Palladio David Lowe, Simon Sharp, 2005 Taking as their basis Goethe's Italian Journey, the authors of this fascinating and unusual study explore how Goethe's experience of Palladio's architecture influenced his view of the relationship between art and nature in general and, in particular, helped him form his understanding of metamorphosis, leading to his discovery of the archetypal plant. In his carefully written account of his travels, Goethe seems to oscillate between experiences of architecture and experiences of nature. In nature, he searched for the archetypal plant, the essential form whose metamorphosis through time would produce the plant we see in its cycle from seed to fruit. In the art and architecture of antiquity and in Palladio's classical reformulation of it, he tried to understand the purpose and function of artistic creation. Until now, no one has put these two together. David Lowe and Simon Sharp show for the first time how these seemingly unrelated subjects are related--how the living geometries and volumes of harmoniously proportioned buildings, the great idea of architecture, can lead to the intuition of similar principles in nature.

The Days of Miracles and Wonders Simon Louvish,1999 From his tomb in Fontevraud, the Crusader King Richard the Lionheart rises to face the modern world at the brink of the West's Gulf War against Saddam Hussein of Iraq. The story weaves a tangled web of East and West, of new crusades fought on prime time television, of medieval Caliphs springing to life, of madness and sanity in the New World Order. Tragedy, comedy and farce intermingle in a tale of ordinary and extraordinary people, as the smart bombs of post-modern technology rush towards their apocalyptic tryst with Baghdad, the stubborn dreamland of the Arabian Nights.
