Check Dam Construction for Sustainable Watershed Management and Planning Zhanbin Li, Peng Li, Yan Yu, Peng Shi, Guillaume Piton, 2022-08-16 CHECK DAM CONSTRUCTION FOR SUSTAINABLE WATERSHED MANAGEMENT AND PLANNING Authoritative and comprehensive reference on the potential for watershed development through the use of check dams Check Dam Construction for Sustainable Watershed Management and Planning summarizes current knowledge of check dams as key soil and water conservation structures in some of the most sensitive and vulnerable ecosystems in the world, as exemplified by the Mediterranean area and the Chinese Loess Plateau, providing detailed information on check dam design and watershed planning, the use of advanced modeling techniques, challenges in dam construction and how to overcome them. The work integrates decades of research in the field of soil and water conservation and gully management, including advanced studies in check dam construction and watershed management. It also covers important new techniques and methods, such as hydrological modeling, isotope tracing, and more. To aid in reader comprehension, the five highly qualified editors have divided the work into three distinct sections. Sections I and II focus on the experience gained from the

erosion hotspots in the Chinese Loess Plateau, whereas Section III expands the scope to other regions with different functions for check dams, including headwater ecosystems and alpine environments. Sample topics covered in Check Dam Construction for Sustainable Watershed Management and Planning include: The regulating effect of check dam systems on sediment redistribution and the formation and development of dam systems in small watersheds Water and soil conservation made possible by check dam construction and sediment source analysis of water-sediment retarding effects of check dams The regulation of check dam systems on the erosion dynamic process and the mechanism of erosion reduction by check dams Flood control risk assessment on warping dam systems and the development and utilization model of check dam systems With its systematic coverage of all aspects of dam construction and maintenance, Check Dam Construction for Sustainable Watershed Management and Planning supports decision making by local authorities and can also be used as a professional guide for ecologists, hydrologists, and water resource managers.

The Case for Pandora James Essig, Steve McCarter, 2016-12-19 This book is about building craft for space travel a space travel that is not in the distant future but in the immediate future. There is no question that we have the technology to build and power large craft capable of traversing the galaxy, and for now, this book will focus on achieving the goal of intragalactic travel. We will describe various methods of power generation and propulsion, delineate the materials and technology for construction, discuss the building of the spacecraft from the outside in, and show what is required to sustain life on the craft for extended periods of time. While we will go into some detail on each of these, pointing out advantages and disadvantages to components and methods, this is not, nor is it intended to be, a highly technical book to be used by specialists. Rather it is intended to inform the general readership about what is possible, and perhaps what is not, in building and operating spacecraft for long-distance and long-duration travel with current and available means.

Cooperation Networks and Economic Development Andrés Cárdenas O'Farrill, 2021-02-11 For most Western audiences, Cuba is a touristic paradise stuck in time and virtually detached from world technology networks by the US embargo - anything but a hub of industrial innovation and high value-added biotechnology. However, a closer look reveals more subtle but equally powerful stories that challenge the homogenizing assumptions of conventional economics and open up scope for more sophisticated reflections on Cuban economy and industry. From this kind of enquiry emerges the case of the internationally respected Cuban biotech industry as the most successful case of science and technology policy in the country's economic history. The book takes an interdisciplinary approach, exploring issues such as interdependency, purpose and history as natural constituencies of the innovation process. It also examines the dynamic and crucial role played by the state in the formation of innovative business enterprises. This book will be of interest to academic researchers in the fields of innovation and economic development.

Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision Robby Caspeepe, Luc Taerwe, Dan

Frangopol,2018-10-31 This volume contains the papers presented at IALCCE2018, the Sixth International Symposium on Life-Cycle Civil Engineering (IALCCE2018), held in Ghent, Belgium, October 28-31, 2018. It consists of a book of extended abstracts and a USB device with full papers including the Fazlur R. Khan lecture, 8 keynote lectures, and 390 technical papers from all over the world. Contributions relate to design, inspection, assessment, maintenance or optimization in the framework of life-cycle analysis of civil engineering structures and infrastructure systems. Life-cycle aspects that are developed and discussed range from structural safety and durability to sustainability, serviceability, robustness and resilience. Applications relate to buildings, bridges and viaducts, highways and runways, tunnels and underground structures, off-shore and marine structures, dams and hydraulic structures, prefabricated design, infrastructure systems, etc. During the IALCCE2018 conference a particular focus is put on the cross-fertilization between different sub-areas of expertise and the development of an overall vision for life-cycle analysis in civil engineering. The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life-cycle analysis and assessment in civil engineering, including researchers, practising engineers, consultants, contractors, decision makers and representatives from local authorities.

Developmental Computer-Based Version of Asce 7-95 Standard Provisions for Wind Loads (Classic Reprint) M.

M. Schechter,2018-09-24 Excerpt from Developmental Computer-Based Version of Asce 7-95 Standard Provisions for Wind Loads The power of desktop computers makes it practical to develop computer-based versions of standards allowing designers to use complex standards efficiently While significantly reducing the possibility of errors. Recognition of this fact led one of the authors (e. Simiu) to initiate, as a pilot project, the development of an interactive computer version of the asce 7 - 93 Standard provisions for wind loads. To keep software development costs low it was decided to use a commercial shell.

The pilot project was supported by the Structures Division, National Institute of Standards and Technology (nist). The support included about half of the funds needed for software development. The balance of the software development costs was covered by a revenue - sharing grant from the American Society of Civil Engineers (asce) About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
