The Preservation Management Handbook Ross Harvey, Martha R. Mahard, 2014-04-10 Cultural heritage professionals—museum curators, museum professionals, archivists and librarians— work with their specialized knowledge to prioritize the needs of their collections. Preservation managers draw on experts in climate control, fire safety, pest management and more in developing the large overview of a collection and its needs. And all the special materials within the collections have their experts too. Here, in one volume, is a wide range of topic-specific expertise that comprises both an enduring text for preservation students as well as an essential one-stop reference for cultural heritage professionals—particularly those in small- to medium sized organizations where resources are limited and professional help is not always at hand. The editors introduce the reader to the essential tools and principles of a preservation management program in the twenty-first century, addressing the realities of diverse collections and materials, and embracing the challenges of working with both analog and digital collections. The sections on planning and managing a preservation program contain the basic starting point for any kind of collection, regardless of size and content. Written with the small collection in mind, the principles are nevertheless scalable and widely applicable.

The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.

The Legends of the Modern Didier Maleuvre, 2019-11-28 What made art modern? What is modern art? *The Legends of the Modern* demystifies the ideas and legends that have shaped our appreciation of modern art and literature. Beginning with an examination of the early modern artists Shakespeare, Michelangelo, and Cervantes, Didier Maleuvre demonstrates how many of the foundational works of modern culture were born not from the legendry of expressive freedom, originality, creativity, subversion, or spiritual profundity but out of unease with these ideas. This ambivalence toward the modern has lain at the heart of artistic modernity from the late Renaissance onward, and the arts have since then shown both exhilaration and disappointment with their own creative power. *The Legends of the Modern* lays bare the many contradictions that pull at the fabric of modernity and demonstrates that modern art's dissatisfaction with modernity is in fact a vital facet of this cultural period.

The Builder's Stone Melanie Phillips, 2025-02-04 Western civilization is facing a critical moment. Foreign enemies sensing its weakness are circling. Internally, the West is being consumed by division, decadence, and demoralization. The October 7 attack on Israel presented it with a choice between civilization and barbarism—a challenge the West has failed. But this damaged society is far from lost if it takes advice from an unexpected source. Western culture is based upon Christianity, whose own foundations in turn lie in Judaism. The unique survival of the Jewish people offers both the West and its struggling Christian church, as well as secular people who shun religion, priceless lessons in resilience that they must learn if their culture is to survive.
