Hollywood or History? Sarah J. Kaka, 2022-01-01 The rationale for the present text, *Hollywood or History? An Inquiry-Based Strategy for Using Film to Teach About Inequality and Inequity Throughout History* stems from two main things. First and foremost is the fact that the reviews of the first two volumes in the *Hollywood or History?* series have been overwhelmingly positive, especially as it pertains to the application of the strategy for practitioners. Classroom utility and teacher practice have continued to be the primary objectives in developing the *Hollywood or History?* strategy. The second thing is that this most recent volume in the series takes it in a new direction--rather than focusing on eras in history, it focuses on the themes of inequity and inequality throughout history, and how teachers can utilize the *Hollywood or History?* strategy to tackle some of the more complicated content throughout history that many teachers tend to shy away from. There is a firm belief that students' connection to film, along with teachers' ability to use film in an effective manner, will help alleviate some of the challenges of teaching challenging topics such as inequity and inequality in terms of gender, race, socioeconomic status, and so much more. The book provides 30 secondary lesson plans (grades 6-12) that address nine different topics centered around inequity and inequality throughout history, many of which connect students to the world we

are living in today. The intended audience for the book are teachers who teach social studies at the 6th-12th grade level both in the United States and other countries. An additional audience will be college and university social studies/history methods professors in the United States and worldwide.

**STEAM Meets Story** Gloria D. Campbell-Whatley, Diane Rodríguez, Jugnu Agrawal, 2021-06-11 This innovative STEAM guide will help general and special education teachers to increase effective instruction with adolescents (grades 5-10). The authors show teachers how to link STEM concepts with popular fiction and film selections as a catalyst to launch student interactions, discussions, projects, and investigations. This approach will promote problem solving and reasoning skills by initiating the scientific process, rather than simply presenting established facts. The book includes a wealth of lesson plans that connect abstract STEM ideas to realistic experiences that students encounter. Sample lessons call on students to produce drawings and models that move STEM to STEAM. Grounded in popular film and some of the most-read young adult books, the text includes teaching strategies found to be effective with traditionally underserved students and those with disabilities. Book Features: Standards-based STEM lessons interrelated and interwoven with writing, reading, speaking, and other skills. Practical ideas and hands-on activities for engaging adolescents in both traditional and virtual environments. Guidance for working with diverse populations, such as students with different abilities, culturally and linguistically diverse students, translingual students, and transnational students. Templates, handouts, and lessons linked to Star Wars, The Giver, The Immortal Life of Henrietta Lacks, Harry Potter, To Kill a Mockingbird, Star Trek, The Matrix, Holes, and more.
