American Hereford Cattle Breeders' Association

The Wild K. Webster, 2017-08-02 I brought them to the wilderness because we couldn't cope with our reality. The plan was to make a new life that didn't include heartache. No people. No technology. No interference. Just us. A chance to piece together what was broken. But the wilderness is untamed and harsh. Brutal and unforgiving. It doesn't give a damn about your feelings. Tragedy lives there too. No escaping the truths that won't let you go. All you can do is survive where love, no matter how beastly, is the only thing you can truly count on. Confusing. Wrong. Twisted. Beautiful. Sick. Love is wild. And we're going to set it free. **WARNING:** The Wild is an extremely taboo story. Most will find that the themes in this book will make you incredibly uncomfortable or maybe even offend you. This book is only for the brave, the open-minded, and the ones who crave love in even the most dismal of situations. Extreme sexual themes and violence in certain scenes, which could trigger emotional distress, are found in this story. If you are sensitive to heavy taboo themes, then this story is not for you. Seriously, you've been warned. Don't say I didn't try. You're probably going to cringe many, many, many times. Even if you're on the fence, it's probably not a good idea to proceed. However, if you're intrigued and fearless and kind of sort of trust me, then carry on. This book is for you.

Wild & Free K. Webster, 2021-08-31 This special edition HARDBACK includes both The Wild and The Free plus a small, never published before bonus at the end. The Wild I brought them to the wilderness because we couldn't cope with our reality. The plan was to make a new life that didn't include heartache. No people. No technology. No interference. Just us. A chance to piece together what was broken. But the wilderness is untamed and harsh. Brutal and unforgiving. It doesn't give a damn about your feelings. Tragedy lives there too. No escaping the truths that won't let you go. All you can do is survive where love, no matter how beastly, is the only thing you can truly count on. Confusing. Wrong. Twisted. Beautiful. Sick. Love is wild. And we're going to set it free. *** The Free He took me from the wilderness. I was all alone and death was near. His plan was to heal me and then let me go. A reprieve from my harsh reality. Food. Warmth. Safety. Just us. It's temporary and one day I'll be forced to go home. But I don't I want to go back. I want him to keep me. To tame and love me. Freeing the wild comes with grave consequences. He thinks they'll cage him for being with me. Our love's not right. They won't understand it. Forbidden. Immoral. Perverse. Vile. I don't care what they think. It should only matter to us. We are innocent and beautiful and worthy. Love is wild. And we're going to set it free.

Wildlife and Emerging Zoonotic Diseases: The Biology, Circumstances and Consequences of Cross-Species Transmission James E. Childs, John S. Mackenzie, Jürgen A. Richt, 2007-07-23 This volume offers an overview of the processes of zoonotic viral emergence, the intricacies of host/virus interactions, and the role of biological transitions and modifying factors. The themes introduced here are amplified and explored in detail by the contributing authors, who explore the mechanisms and unique circumstances by which evolution, biology, history, and current context have contrived to drive the emergence of different zoonotic agents by a series of related events.

Studies in Viral Ecology, Volume 2 Christon J. Hurst, 2011-08-23 This book explains the ecology of viruses by examining their interactive dynamics with their hosting species (in this volume, in animals), including the types of transmission cycles that viruses have evolved encompassing principal and alternate hosts, vehicles and vectoring species. Examining virology from an organismal biology approach and focusing on the concept that viral infections represent areas of overlap in the ecologies of the involved species, Viral Ecology is essential for students and professionals who either may be non-virologists or virologists whose previous familiarity has been very specialized.

Our Vanishing Wild Life William Temple Hornaday, 1913 William Temple Hornaday was the Director of the New York Zoological Society and the nation's leading advocate of wildlife conservation in this era. This unsparing manifesto was written to accompany Hornaday's launching of the Permanent Wildlife Protection Fund; it is thus (in the words of the historian Stephen Fox) both a campaign tract and one of the first books wholly devoted to endangered wild animals (John Muir and His Legacy: The American Conservation Movement [Boston: Little, Brown and Company, 1981], p. 149). It is also a landmark of conservation history which had a profound effect on the thought of Aldo Leopold, among others. The book

surveys the history and causes of wildlife destruction in America and elsewhere, and sets forth a lengthy program to ensure the protection of remaining wildlife for the future, often in militant and moralistic terms. The work also throws light on some of the complexities inherent in the conservation movement at this time: for example, Hornaday accepts the classification of certain bird and mammalian predators as noxious or vermin and appropriate for destruction (pp. 77-81); there is no criticism here of the massive campaign for the extermination of wolves and coyotes being sponsored at the time by the Bureau of Biological Survey. On a more general level, Hornaday's fulminations against Italian immigrants as incorrigible bird-killers suggest a connection between nativism and conservationism, while his excoriations of market hunters set forth a deeply-rooted class bias shared by many leading conservationists.

Avian Influenza Research Progress Ernesto P. Allegra, 2008 Avian influenza, or 'bird flu', is a contagious disease of animals caused by viruses that normally infect only birds and, less commonly, pigs. Avian influenza viruses are highly species-specific, but have, on rare occasions, crossed the species barrier to infect humans. In domestic poultry, infection with avian influenza viruses causes two main forms of disease, distinguished by low and high extremes of virulence. The so-called 'low pathogenic' form commonly causes only mild symptoms (ruffled feathers, a drop in egg production) and may easily go undetected. The highly pathogenic form is far more dramatic. It spreads very rapidly through poultry flocks, causes disease affecting multiple internal organs, and has a mortality that can approach 100%, often within 48 hours.
