Making Sense of Reading Nicholas Bielby,1994

Becoming a Teacher Researcher in Literacy Teaching and Learning Christine Pappas,Eli Tucker-Raymond,2011-01-25 Designed to facilitate teachers' efforts to meet the actual challenges and dilemmas they face in their classrooms, *Becoming a Teacher Researcher in Literacy Teaching and Learning*: provides background information and key concepts in teacher research covers the how-to strategies of the teacher research process from the initial proposal to writing up the report as publishable or presentable work illustrates a range of literacy topics and grade levels features twelve reports by teacher researchers who have gone through the process, and their candid remarks about how activities helped (or not) helps teachers understand how knowledge is constructed socially in their classrooms so that they can create instructional communities that promote all students' learning. Addressing the importance of teacher research for better instruction, reform, and political action, this text emphasizes strategies teachers can use to support and strengthen their voices as they dialogue with others in the educational community, so that their ideas and perspectives may have an impact on educational practice both locally in their schools and districts and more broadly.

Raising Readers Steven Bialstok,1992-08

Whose Knowledge Counts in Government Literacy Policies? Kenneth S. Goodman,Robert C. Calfee,Yetta M. Goodman,2013-10-01 Accountability, in the form of standardized test scores, is built into many government literacy policies, with severe consequences for schools and districts that fail to meet ever-increasing performance levels. The key question this book addresses is whose knowledge is considered in framing government literacy policies? The intent is to raise awareness of

the degree to which expertise is being ignored on a worldwide level and pseudo-science is becoming the basis for literacy policies and laws. The authors, all leading researchers from the U.S., U.K., Scotland, France, and Germany, have a wide range of views but share in common a deep concern about the lack of respect for knowledge among policy makers. Each author comes to the common subject of this volume from the vantage point of his or her major interests, ranging from an exposition of what should be the best knowledge utilized in an aspect of literacy education policy, to how political decisions are impacting literacy policy, to laying out the history of events in their own country. Collectively they offer a critical analysis of the condition of literacy education past and present and suggest alternative courses of action for the future.

The EAL Teaching Book Jean Conteh, 2023-05-24 As the number of children for whom English is an Additional Language in schools increases, how do teachers and trainees prepare to support them to succeed? A complete guide to understanding, learning from and teaching bilingual and EAL children in schools. The text begins by asking 'who are EAL learners' and challenges some of the misconceptions about this group. It goes on to examine language in depth, providing focused theory to help teachers and trainees better understand the wider context of children's needs. This theory is supported by a wealth of information on practical teaching strategies and resources in the promoting learning section. The text covers planning across the curriculum for EAL and offers day-to-day practical support for teachers. The fourth edition is updated throughout and includes a new chapter on EAL and SEND.

Perspectives on the Teaching and Learning of Phonics Margaret Cook, 2002

Helping Children with Reading and Spelling Mrs Rene Boote, Rene Boote, Rea Reason, 2002-04-12 Builds on the authors highly successful manual *Learning Difficulties in Reading and Writing* and contains practical suggestions to help children who struggle with learning to read and spell.

Debates in Primary Education Virginia Bower, 2020-10-19 This powerful text encourages both pre-service and established teachers, as well as teacher educators, to engage with contemporary debates in primary education. Promoting a critical approach, the chapters explore a wide range of key themes including the importance of values in primary education and the imperative for a curriculum which embraces the whole range of available subjects. At the same time, the chapters are underpinned by a belief that children should be at the heart of all the decisions we make and that primary education should inspire a love of learning, for life. The book aims to support practitioners to make informed judgements and feel confident to argue their point of view with deeper theoretical knowledge and understanding, thus increasing teacher agency and confidence in responding to complex educational and social dilemmas such as literacy levels and rising mental health concerns. Chapters encompass both the macro aspects of primary education and more specialised debates on key topics such as reading, mathematics, languages, early years education and the use of technology. With annotated further reading and reflective questions, this key text is essential reading for all those wanting to develop a better understanding of the issues

that shape their practice including student teachers at both undergraduate and postgraduate level, practising teachers engaged in continuing professional development and teacher educators.

Word Recognition and Vocabulary Understanding Strategies for Literacy Success Richard Sinatra, 2003 The author examines the various ways in which children learn words.

Essays Into Literacy Frank Smith, 1983

To Understand Ellin Oliver Keene, 2008 To Understand proposes a model that incorporates all aspects of literacy instruction and describes how teachers can focus on what matters most. Keene shows that when teachers target the most essential content, they can help every student engage more deeply with texts and discover a passion for reading and learning. You'll learn to draw out students' intellectual interests and spark improvements in their literacy learning and comprehension-even among students who struggle. You'll see that teaching the Outcomes and Dimensions of Understanding can help readers exceed expectations and also help broaden your vision of their capacity and energy for learning.

50 Strategies for Improving Vocabulary, Comprehension, and Fluency Adrienne L. Herrell, Michael Jordan, 2006 A practical approach of step-by-step instructional procedures for developing key literacy skills. Each strategy is supported by an authentic classroom example. An additional example of each strategy is provided on the accompanying CD.

Curriculum and Instruction for All Learners Beverly Rainforth, Judy W. Kugelmass, 2003 This work aims to help bridge the gap between two approaches to classroom teaching - systematic (teacher-directed) instruction, which is found in most special education services, and constructivist (child-centred) instruction, which is often found in progressive general education.

Reconsidering a Balanced Approach to Reading Constance Weaver, 1998 This collection reflects the stance that a truly balanced approach to reading instruction will focus not only on reading but on literacy; integrate language and literacy across disciplines; attend to reading, writing, and other skills and strategies in context; and reflect a coherent integration of as broad a research base as possible. Following a foreword by Diane Stephens, an introduction, an article on reading and literacy, and a note on terms (phonics and whole language), articles in the collection and their authors are, as follows: (1) Toward a Balanced Approach to Reading (Constance Weaver); (2) Learning about Literacy: A 30-Year Journey (P. David Pearson and Diane Stephens); (3) To Err Is Human: Learning about Language Processes by Analyzing Miscues (Yetta M. Goodman and Kenneth S. Goodwin); (4) Considering the Research on Phonological Awareness and Phonics (Constance Weaver); (5) Reconceptualizing Phonics Instruction (Margaret Moustafa); (6) Orthographic Analogy Training with Kindergarten Children: Effects on Analogy Use, Phonemic Segmentation, and Letter-Sound Knowledge (Margareth E. Peterson and Leonard P. Haines); (7) A Comparison of Children's Development of Alphabetic Knowledge in a Skills-Based and a Whole Language Classroom (Ellen McIntyre and Penny A. Freppon); (8) Phonological Awareness Training of Kindergarten

Children: Three Treatments and Their Effects (Linda R. Ayres); (9) Literacy Learning in a Whole Language Classroom: Reading Concepts and Reading Strategies First Graders Know and Use (Penny A. Freppon and Ellen McIntyre); (10) A Comparison of Innercity Children's Interpretations of Reading and Writing Instruction in the Early Grades in Skills-Based and Whole Language Classrooms (Karin L. Dahl and Penny A. Freppon); (11) Experimental Research: On Phonemic Awareness and on Whole Language (Constance Weaver); (12) Using 'Real' Books: Research Findings on Literature Based Reading Instruction (Michael O. Tunnell and James S. Jacobs); (13) Successful Dyslexics: A Constructivist Study of Passionate Interest Reading (Rosalie Fink); (14) The Case for Late Intervention: Once a Good Reader, Always a Good Reader (Stephen Krashen and Jeff McQuillan); (15) Every Person a Reader (Stephen Krashen); (16) The California Reading Situation: Rhetoric and Reality (Jeff McQuillan); (17) California, Whole Language, and the National Assessment of Educational Progress (NAEP) (Kenneth S. Goodman); and (18) The Schools We Have. The Schools We Need (Richard L. Allington). (Contains 55 references.) (NKA)
