Philosophical Foundations of Education Howard Ozmon, Samuel M. Craver, 2003 The purpose of this volume is to show how philosophical ideas about education developed over time, with due regard to historical influences and settings, and with an emphasis on how these ideas continue to have relevance for education and life. This book was conceived as an introductory text in the philosophy of education, but it leads students from simple to complex philosophical ideas.

The Philosophical Foundations of Education Steven M. Cahn, 1970

Philosophical Foundations of Adult Education John L. Elias, Sharan B. Merriam, 1980

Philosophical Foundations of Education Winston C. Thompson, 2023-03-23 This volume introduces philosophy as a foundational discipline of education. Taking a broadly inclusive approach to the branches of philosophy, it offers an accessible yet duly rigorous orientation to the field. Revealing the values, premises, arguments, and conclusions that inform contemporary philosophical discussions of education, this book equips its readers with the conceptual and analytical resources necessary to engage with and make meaningful contributions to that grand discourse for years to come. About the Educational Foundations series: Education, as an academic field taught at universities around the world, emerged from a range of older foundational disciplines. The Educational Foundations series comprises six volumes, each covering one of the foundational disciplines of philosophy, history, sociology, policy studies, economics and law. This is the first reference work to provide an authoritative and up-to-date account of all six disciplines, showing how each field's ideas, methods, theories and approaches can contribute to research and practice in education today. The six volumes cover the same set of key topics within education, which also form the chapter titles: - Mapping the Field - Purposes of Education - Curriculum - Schools and Education Systems - Learning and Human Development - Teaching and Teacher Education - Assessment and Evaluation This

structure allows readers to study the volumes in isolation, by discipline, or laterally, by topic, and facilitates a comparative, thematic reading of chapters across the volumes. Throughout the series, attention is paid to how the disciplines comprising the educational foundations speak to social justice concerns such as gender and racial equality.

The Philosophical Bases of Education Robert Robertson Rusk, 1929

Philosophical Foundations for the Curriculum Allen Brent, 2016-09-19 In this book, first published in 1978, Allen Brent sets out to explore some of the questions raised by theorists and philosophers regarding curriculum. He starts by investigating whether all knowledge is the product of social conditions of particular times or places, or whether there is some kind of universal framework implicit in the claims to knowledge which men make. He looks at the work of Plato, Newman, Freire and Hirt and how, each of them in a strikingly different way, they have tried to give us an objective basis for curriculum judgements and how the validity of that basis is attacked by contemporary sociologists of knowledge. This book is aimed primarily at students who are concentrating on the philosophy of education or curriculum theory.

Philosophical Documents in Education Tony W. Johnson, Ronald F. Reed, 2013-10-03 Basic Approach/Summary For preservice and inservice teachers studying the historical and philosophical foundations of education. An anthology of primary sources that explores the philosophy of teaching and learning through a wide variety of viewpoints throughout history. The introduction to the fourth edition of *Philosophical Documents in Education* asks the simple question, what does it mean to be educated? That simple but profound inquiry is answered throughout the anthology's 16 chapters by both classical and contemporary educators, progressives, and philosophers. Driven by the idea that students can better understand and practice their profession by reading, contemplating, and discussing philosophical and historical literature, this collection of primary sources exposes readers to a wealth of ideas regarding teaching, learning, schooling, and instruction — from ancient texts to modern selections.

PHILOSOPHICAL AND SOCIOLOGICAL BASES OF EDUCATION, SECOND EDITION RAVI, S. SAMUEL, 2021-01-01

Education and philosophy go hand-in-hand. It is through the power of knowledge, our philosophers laid a foundation of educational theories, and set a stepping stone for the modern day education system and educational institutions. This book gives a comprehensive account of the fundamental theories laid by the philosophers, and the society's role in shaping them up. The special feature of the book is that it teaches and explains more than what an ordinary teacher does in a limited time. It stresses on the understanding and practice of the concepts learnt rather than mere memorisation. NEW TO THE SECOND EDITION Now, the book comprises 40 chapters, out of which 15 have been newly introduced and are tactically placed under the three units of the book. • Unit 1: Philosophy and Education - Realism, Humanism, Awakenism, Existentialism, Education for 21st century, Indian Philosophy and Education, Philosophy and Branches of Knowledge • Unit 2: Eastern and Western

Philosophers - Sarvepalli Radhakrishnan, Jiddu Krishnamurty, Pestalozzi, Maria Montessori • Unit 3: Education and Society - Education for Peace, Education for New Social Order, Education for Human Rights and Education for Modernisation
Primarily designed for the undergraduate and postgraduate students of education, the book is equally beneficial for the teaching faculties, trainees, research scholars and those who are preparing for competitive examinations in education.
