Simulacron-3 Daniel F. Galouye, 2021-06-08 Part of the exclusive new CAEZIK Notable line of books. In the 1960's, before anyone had even conceived of the concept of virtual reality, before computers were even in main-stream thought, Daniel F. Galouye imagined the unimaginable. In doing so, he wrote one of the most influential science fiction books of the day, and one that continues to not only influence modern writers but continues to resonate with science fiction readers everywhere. He conceived of a world that exists only virtually...one of the first stories about virtual reality. This is Matrix, decades before Matrix was conceived. Douglas Hall is part of a team that builds an artificial environment to simulate reality. This enables them to get public opinion polls without waiting for the opinions of people around them. But then something goes terribly wrong and his partners on the program start disappearing. But is it a simulated disappearance, or is someone out to get them all? And what is the true nature of reality? Stories based on *Simulacron-3* have been adapted for both television and movies, and the book is considered a favorite of many of the masters of science fiction.

Reality Simulation in Science Fiction Literature, Film and Television Heather Duerre Humann, 2019-08-27 In recent decades, science fiction in both print and visual media has produced an outpouring of story lines that feature forms of simulated reality. These depictions appear with such frequency that fictional portrayals of simulated worlds have become a popular sci-fi trope--one that prompts timeless questions about the nature of reality while also tapping into contemporary debates about emerging technologies. In combination with tech-driven tensions, this study shows that our collective sense of living in politically uncertain times also propels the popularity of these story lines. Because of the kinds of questions they raise and the cultural anxieties they provoke, these fictional representations provide a window into contemporary culture and demonstrate how we are reassessing our own reality.

Being Really Virtual Frank Steinicke, 2016-10-22 This book focuses on the recent developments of virtual reality (VR) and immersive technologies, what effect they are having on our modern, digitised society and explores how current developments and advancements in this field are leading to a virtual revolution. Using Ivan Sutherland's 'The Ultimate Display' and Moore's law as a springboard, the author discusses both popular scientific and technological accounts of the past, present and possible futures of VR, looking at current research trends, developments, challenges and ethical considerations to the coming age of differing realities. *Being Really Virtual* is for researchers, designers and developers of VR and immersive technologies

and anyone with an interest in the exponential rise of such technologies and how they are changing the very way we perceive, interact and communicate within our digital society.

Critique of Fantasy, Vol. 2 Laurence A. Rickels, 2020-11-24 In the Introduction; or, How Star Wars Became Our Oldest Cultural Memory of the first volume of *Critique of Fantasy*, the gambit of a contest between science fiction and fantasy was already sketched out. J.R.R. Tolkien and C.S. Lewis aimed to separate the fantasy from the techno-science foregrounded in works by H.G. Wells, for example, and raise the fantasy or fairy-story to the power of an alternate adult literary genre. My study of the contest between the B-genres for ownership of the evolution of the social relation of art out of the condemned site of day dreaming required in the first place a reading apparatus, which the first volume derived from psychoanalytic theories of daydreaming's relationship to conscious thought, the unconscious, and artistic production as well as from their prehistory, the philosophies of dreams, ghosts, willing and wishing.

The Technological Introject Jeffrey Champlin, Antje Pfannkuchen, 2018-01-02 The *Technological Introject* explores the futures opened up across the humanities and social sciences by the influential media theorist Friedrich Kittler. Joining the German tradition of media studies and systems theory to the Franco-American theoretical tradition marked by poststructuralism, Kittler's work has redrawn the boundaries of disciplines and of scholarly traditions. The contributors position Kittler in relation to Marshall McLuhan, Jacques Derrida, discourse analysis, film theory, and psychoanalysis. Ultimately, the book shows the continuing relevance of the often uncomfortable questions Kittler opened up about the cultural production and its technological entanglements.

Contemporary Science Fiction Authors Robert Reginald, 2009-01-01 This bio-bibliography of the golden age of the science fiction field includes 308 biographies compiled from questionnaires sent to the authors, and chronological lists of 483 writers' published works. This facsimile reprint of the 1975 edition includes a title index, introduction, and minor corrections. A now-classic guide to the major and minor SF writers active in the early 1970s.

Guerrilla Networks Michael Goddard, 2025-10-01 The radical youth movements of the 1960s and '70s gave rise to both militant political groups ranging from urban guerrilla groups to autonomist counterculture, as well as radical media, including radio, music, film, video, and television. This book is concerned with both of those tendencies considered as bifurcations of radical media ecologies in the 1970s. While some of the forms of media creativity and invention mapped here, such as militant film and video, pirate radio and guerrilla television, fit within conventional definitions of media, others, such as urban guerrilla groups and autonomous movements, do not. Nevertheless what was at stake in all these ventures was the use of available means of expression in order to produce transformative effects, and they were all in different ways responding to ideas and practices of guerrilla struggle and specifically of guerrilla media. This book examines these radical media ecologies as guerrilla networks, emphasising the proximity and inseparability of radical media and political practices.

Fernando Pessoa Jonardon Ganeri, 2024 Fernando Pessoa, whose time in Durban briefly overlapped with that of Mahatma Gandhi, was well-read in Indian literature, having in his library the poetry of Rabindranatha Tagore and books about Indian philosophy. He discusses the Upanishads and what he calls the Indian ideal. Indeed, from in of his more esoteric writings it is possible to identify a new variety of panpsychism in the spirit of Coleridge and Whitman--
