Child Identity Theft Robert P. Chappell Jr., 2012-12-21 Child identity theft is the fastest growing type of identity theft, a crime that affects some 10 million people annually. Each year more than 500,000 children are affected by identity theft - half of them under age six. Countless other cases go unreported because the thief is a relative or parent of the victim. This devastating crime can wreak havoc on a child's future opportunities; it can be difficult to prove, and even harder to undo the damage that has been done. Child Identity Theft speaks to parents everywhere, the majority of whom have no idea that their children's identities have become such prime targets for thieves and criminals. Here, a veteran law enforcement professional and expert in child identity theft offers parents, educators, law enforcement officials, and others who care for or work with children an inside look at the ways in which children are vulnerable to identity thieves. Chappell presents the vital information in a question and answer format, offering not just information about how child identity theft happens, but also how to prevent it from happening, and what to do if it does. Among other things, Child Identity Theft explains: how a loophole in the national credit reporting system allows criminals to target innocent children for their creditworthiness; the variety of

forms that child identity theft can take; the hidden techniques that thieves use to gain children's identities and personal information; which children are at a higher risk for identity theft; and how an increasing number of child identity thefts are perpetrated by parents and relatives. This book reveals the reality of child identity theft and the steps we all should take to protect our children and ourselves. How many victimized children are out there out there waiting to be discovered? Has your child been victimized? One hopes not, but if so, this book will give you the tools to find out and get help.

Florida Law Review, 2016

Thinking Like a Terrorist Mike German, 2007 As the fifth full year of America's global war on terrorism continues, statistics concerning terrorist attacks show a disturbing trend: from a twenty-one-year high in 2003, attacks tripled in 2004 and then doubled in 2005. And as the incidence of terrorist attacks increased, so has the number of terrorists. While the primary leaders of the Taliban, al Qaeda, and al Qaeda in Iraq remain at large, a 2006 Department of Defense study reportedly identified thirty new al Qaeda-affiliated terrorist groups that have been created since September 11, 2001. We may not have metrics that measure our success in the war on terrorism, but these realities certainly illuminate our failures. In *Thinking Like a Terrorist*, former FBI counterterrorism agent Mike German contends that the overarching problem is a fundamental failure to understand the terrorists—namely, what they want and how they intend to get it. When our counterterrorism policies are driven by misunderstanding and misperception, we shouldn't be surprised at the results. Today's terrorists have a real plan—a blueprint that has brought them victory in the past—that they are executing to perfection; moreover, their plan is published and available to anyone who bothers to read it. Once the terrorists' plan is understood, we can develop and implement more effective counterterrorism strategies. A former undercover agent who infiltrated neo-Nazi terrorist groups in the United States, German explains the terrorist's point of view and discusses ways to counter the terrorism threat. Based on his unusual experience in the field, *Thinking Like a Terrorist* provides unique insights into why terrorism is such a persistent and difficult problem and why the U.S. approach to counterterrorism isn't working.
