Arts Education and Literacies Amy Petersen Jensen, Roni Jo Draper, 2015-06-26 In a struggling global economy, education is focused on core subjects such as language arts and mathematics, and the development of technological and career-readiness skills. Arts education has not been a central focus of education reform movements in the United States, and none of the current education standards frameworks deeply address the processes, texts and literacies that are inherent to arts disciplines. This lack of clarity poses a problem for state and district leaders who might be inclined to advocate for the arts in schools and classrooms across the country, but cannot find adequate detail in their guiding frameworks. This volume acknowledges the challenges that arts educators face, and posits that authentic arts instruction and learning can benefit a young person's development both inside and outside of the classroom. It presents ways that arts teachers and literacy specialists can work together to help others understand the potential that arts learning has to enhance students 21st century learning skills.

*Debates in Art and Design Education* Nicholas Addison, Lesley Burgess, 2013 *Debates in Art and Design Education* encourages student and practising teachers to engage with contemporary issues and developments in learning and teaching. It introduces key issues, concepts and tensions in order to help art educators develop a critical approach to their practice in response to the changing fields of education and visual culture. Accessible, comprehensive chapters are designed to stimulate thinking and understanding in relation to theory and practice, and help art educators to make informed judgements by arguing from a position based on theoretical knowledge and understanding. Contributing artists, lecturers and teachers debate a wide range of issues including: the latest policy and initiatives in secondary art education the concepts, skills and dispositions that can be developed through art education tensions inherent in developing the inclusive Art and Design

classroom partnerships across the visual arts sector creativity in the Art and Design curriculum visual art and globalisation establishing the significance of 'Design' art practice as educational research. *Debates in Art and Design Education* is for all student and practising teachers interested in furthering their understanding of an exciting, ever-changing field, and supports art educators in articulating how the subject is a vital, engaging and necessary part of the twenty-first century curriculum. Each chapter points to further reading and each section suggests reflective questions to help shape art educators' teaching. In particular, *Debates in Art and Design Education* encourages art educators to engage in research by providing an essential introduction to critical thinking around contemporary debates.

**International Handbook of Research in Arts Education** Liora Bresler, 2007-03-05 Providing a distillation of knowledge in the various disciplines of arts education (dance, drama, music, literature and poetry and visual arts), this essential handbook synthesizes existing research literature, reflects on the past, and contributes to shaping the future of the respective and integrated disciplines of arts education. While research can at times seem distant from practice, the Handbook aims to maintain connection with the live practice of art and of education, capturing the vibrancy and best thinking in the field of theory and practice. The Handbook is organized into 13 sections, each focusing on a major area or issue in arts education research.

*Method Meets Art, Second Edition* Patricia Leavy, 2015-01-07 This book presents the first comprehensive introduction to arts-based research (ABR) practices, which scholars in multiple disciplines are fruitfully using to reveal information and represent experiences that traditional methods cannot capture. Each of the six major ABR genres/m-/narrative inquiry, poetry, music, performance, dance, and visual art/m-/is covered in chapters that introduce key concepts and tools and present an exemplary research article by a leading ABR practitioner. Patricia Leavy discusses the kinds of research questions these innovative approaches can address and offers practical guidance for applying them in all phases of a research project, from design and data collection to analysis, interpretation, representation, and evaluation. Chapters include checklists to guide methodological decision making, discussion questions, and recommended print and online resources--

**International Yearbook for Research in Arts Education 3/2015** Shifra Schonmann, 2015 This yearbook will be the third in an annual series of publications by the International Network for Research in Arts Education (INREA). It will provide a comprehensive survey of contemporary research trends in arts education and will be based on the idea of constructing knowledge in the arts with the wisdom of the many. About sixty scholars from across the world will convey the zeitgeist of the key issues in research in arts education. The volume will be designed as a basic companion for every researcher, student, teacher or artist who wants to know what the recent knowledge of scholars is and what they consider significant. The key

issues will reflect the images and the observations that a large body of researchers consider to be essential.
