Why We Fought Robert B. Westbrook, 2012-01-11 *Why We Fought* is a timely and provocative analysis that examines why Americans really chose to sacrifice and commit themselves to World War II. Unlike other depictions of the patriotic “greatest generation,” Westbrook argues that, strictly speaking, Americans in World War II were not instructed to fight, work, or die for their country—above all, they were moved by private obligations. Finding political theory in places such as pin-ups of Betty Grable, he contends that more often than not Americans were urged to wage war as fathers, mothers, husbands, wives, lovers, sons, daughters, and consumers, not as citizens. The thinness of their own citizenship contrasted sharply with the thicker political culture of the Japanese, which was regarded with condescending contempt and even occasionally wistful respect. *Why We Fought* is a profound and skillful assessment of America's complex political beliefs and the peculiarities of its patriotism. While examining the history of American beliefs about war and citizenship, Westbrook casts a larger light on what it means to be an American, to be patriotic, and to willingly go to war.

Inked: Tattoos and Body Art around the World Margo DeMello, 2014-05-30 In recent decades, tattoos have gone from being a subculture curiosity in Western culture to mainstream and commonplace. This two-volume set provides broad coverage of tattooing and body art in the United States today as well as around the world and throughout human history. In the 1960s, tattooing was illegal in many parts of the United States. Today, tattooing is fully ingrained in mainstream culture and is estimated to be a multi-billion-dollar industry. This exhaustive work contains approximately 400 entries on tattooing, providing historical information that enables readers to fully understand the methods employed, the meanings of, and the motivations behind tattooing—one of the most ancient ways humans mark themselves. The encyclopedia covers all important aspects of the topic of tattooing: the major types of tattooing, the cultural groups associated with tattooing, the regions of the world where tattooing has been performed, the origins of modern tattooing in prehistory, and the meaning of each society's

use of tattoos. Major historical and contemporary figures associated with tattooing—including tattooists, tattooed people, and tattoo promoters—receive due attention for their contributions. The entries and sidebars also address the sociological movements involved with tattooing; the organizations; the media dedicated to tattooing, such as television shows, movies, magazines, websites, and books; and the popular conventions, carnivals, and fairs that have showcased tattooing.

A Modest History Pin-up M. Gabor,1974

Modernism's Masculine Subjects Marcia Brennan,2004 In the era of The Man in the Gray Flannel Suit - when social pressures on men to conform threatened cherished notions of masculine vitality, freedom, and authenticity - modernist paintings came to be seen as metaphorical embodiments of both idealized and highly conflicted conceptions of masculine selfhood. In *Modernism's Masculine Subjects*, Marcia Brennan traces the formalist critical discourses in which work by such artists as Henri Matisse, Willem de Kooning, and Jackson Pollock could stand as symbolic representations that at once challenged and reproduced such prevailing cultural conceptions of masculinity. Rejecting the typical view of formalism's exclusive engagement with essentialized and purified notions of abstraction and its disengagement from issues of gender and embodiment, Brennan explores the ways in which these categories were intertwined, historically and theoretically. Brennan makes new use of writings by Clement Greenberg and other powerful critics describing the works.
