Gabriel L. Negretto

Prime Ministers in Central and Eastern Europe Florian Grotz, Jan Berz, Corinna Kroeber, Marko Kukec, 2025-01-12 Prime Ministers (PMs) are the most influential, powerful, and visible politicians in parliamentary democracies. Their prominent role has been increasing in Western democracies due to the 'presidentialization of politics'. But is this also true for new democracies, such as those in post-communist Central and Eastern Europe (CEE)? As politics in CEE has been characterized by high personalization, weak voter-party linkages, and strong media influence of political leaders, prime-ministerial performance may be even more important for the functioning of parliamentary democracy in those countries. At the same time, conventional wisdom suggests that prime ministers in CEE perform weakly because they lack political experience and operate in an extraordinarily difficult context, but this assumption has not been systematically examined. To close this research gap, this book presents a new conceptual approach to measuring prime-ministerial performance and offers a novel dataset of 131 cabinets in eleven CEE countries between 1990 and 2018. The comparative analyses of this data reveal that the political experience of post-communist prime ministers varies considerably—they range from politically inexperienced outsiders to insiders with long-standing careers in parliament, government, and party leadership. At the same time, multivariate analyses of the quantitative data and qualitative cases demonstrate that variations in the careers, contexts, and performance of prime ministers are systematically connected. In this way, the book not only qualifies conventional assumptions about prime ministers in CEE but also substantiates the theoretical relationship between their careers, contexts, and performance. *Prime Ministers in Central and Eastern Europe* thus contributes to an enhanced understanding of the functioning of post-communist democracies and provides new insights for scholarly work engaging with political leadership. Comparative Politics is a series for researchers, teachers, and students of political science that deals with contemporary government and politics. Global in scope, books in the series are characterized by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit: www.ecprnet.eu. The series is edited by Nicole Bolleyer, Chair of Comparative Political Science, Geschwister Scholl Institut, LMU Munich and Jonathan Slapin, Professor of Political Institutions and European Politics, Department of Political Science, University of Zurich.

Presidential Decrees in Russia Thomas F. Remington, 2014-06-05 The book examines the way Russian presidents Yeltsin,

Medvedev, and Putin have used their constitutional decree powers since the end of the Soviet regime. The Russian constitution gives the Russian president extremely broad decree-making power, but its exercise is constrained by both formal and informal considerations. The book compares the Russian president's powers to those of other presidents, including the executive powers of the United States president and those of Latin American presidents. The book traces the historical development of decree power in Russia from the first constitution in 1905 through the Soviet period and up to the present day, showing strong continuities over time. It concludes that Russia's president operates in a strategic environment, where he must anticipate the way other actors, such as the bureaucracy and the parliament, will respond to his use of decree power.

Contemporary China Review □2025 Spring / Summer Issue□ Volume 7 Editors of Bouden House,2025-08-09 The current English-language edition of Contemporary China Review centers on the theme of “How China Recalibrates Itself at the Intersection of Institutions and Ethics,” and is organized into sections such as “Chinese Scholars’ View,” “Current Affairs,” and “Book Review.” The first section approaches the topic from the perspective of political systems and the international order, revisiting the historical echoes of America’s “Open Door” policy and Wilsonianism while engaging with issues of constitutionalism and the economy, party competition, and civil society, linking modern and contemporary history to today’s governance dilemmas. “Current Affairs” blends documentary narrative with institutional analysis, focusing on the truth of June Fourth and transitional justice, the governance tactics of the pandemic, and the causes and consequences of the “White Paper” protests. It also features Bei Ming’s memorial essay for Cheng Kai, highlighting the ethical choices and personal costs faced by journalists under political pressure. The “Book Review” section examines the intellectual trajectory of Xu Zhiyong’s “citizens’ faith” practice, and also reviews recent works such as The China Record and China’s Game, offering a systematic critique of the continuities between the imperial tradition and the party-state system, the structural tensions between power and the market, and possible reform pathways. Entirely in English and aimed at an international readership, the issue combines rigorous historical research, careful argumentation, and engaging narrative, seeking to forge a communicable public language that bridges fact, thought, and moral judgment, and to serve as a cross-lingual reference and dialogue platform for academia, the media, and public policy debates.

Semi-presidentialism, Parliamentarism and Presidents Miloš Brunclík,Michal Kubát,2018-07-11 The book analyzes the presidencies of three neighboring Central European countries – Poland, the Czech Republic and Slovakia – in the context of their interactions with cabinets (and prime ministers), parliaments and the constitutional courts, all which have proved crucial actors in the region’s political and constitutional battles. Using both institutional and behavioral perspectives along with an innovative definition of semi-presidentialism, the book argues that presidential powers – rather than the mode of the election of the president – are crucial to the functioning of the regimes and their classification into distinctive regime types.

Focusing on intra-executive conflicts and the interaction of the president with other constitutional players it argues that, regardless of the mode of the election of the president, regimes have traditionally been very similar not only in their institutional settings, but also in the way they function. Finally, it shows that Poland, the Czech Republic and Slovakia should be classified as parliamentary regimes. This text will be of key interest to scholars and students of Central and East Europe studies/politics, post-Communist studies, presidential studies and more broadly to political elites and institutions, comparative politics and legislative studies.

Making Constitutions Gabriel L. Negretto, 2013-06-17 Negretto provides the first systematic explanation of the origins of constitutional designs from an analytical, historical and comparative perspective. Based on analysis of constitutional change in Latin America from 1900 to 2008 and four detailed case studies, Negretto shows the main determinants of constitutional choice are the past performance of constitutions in providing effective and legitimate instruments of government and the strategic interests of the actors who have influence over institutional selection. The book explains how governance problems shape the general guidelines for reform, while strategic calculations and power resources affect the selection of specific alternatives of design. It emphasizes the importance of events that trigger reform and the designers' level of electoral uncertainty for understanding the relative impact of short-term partisan interests on constitution writing. Negretto's study challenges predominant theories of institutional choice and paves the way for the development of a new research agenda on institutional change.
