However, it has been extensively revised in content and updated: Eight out of 14 chapters are new including chapters such as The Constitutional Framework of Powers, Alternative Dispute Resolution, and The Singapore Legal System and International Law; and the law on all subjects has been updated.

**Textbook on International Law** Martin Dixon, 2007-07-19 The 'Textbook on International Law' provides a concise and accessible exposition of the key areas of international law for the student. This edition has been updated to include new material on the use of force, the International Criminal Court, and terrorism.

*International Law & Human Rights* Dr. Ambedkar NS, 2024-03-11 International law and human rights are expansive and intricate disciplines that comprise a vast array of organisations, principles, as well as treaties. The rules and guidelines that control interactions between governments and other international players are known as international law. The goal is to bring forth more international harmony, collaboration, and order. It is important to note that treaties, customary law, basic principles of law, and the rulings of international tribunals as well as courts are fundamental components of international law. Human rights encompass fundamental liberties and rights that are indispensable for all persons, irrespective of nationality, ethnic origin, gender, religious affiliation, or any other distinguishing characteristic. The notion of human rights finds its foundation in a multitude of international instruments, among which the UN General Assembly ratified the Universal Declaration of Human Rights (UDHR) in 1948. The fundamental international human rights treaties, such as the International Covenant on Civil and Political Rights, the International Covenant on Economic, Social, and Cultural Rights, as well as the Universal Declaration of Human Rights, are all thoroughly examined in this book. There exists a plethora of resources that accommodate various preferences and various levels of expertise, including philosophical discourse, historical analysis, and practical exploration of the present condition of international human rights law.

**Multinational Corporations and International Law** Emeka A. Duruigbo, 2003 The author proposes that international

law can be strengthened by incorporating and integrating multinational corporations more fully into the international legal system. The establishment of international norms of corporate responsibility and accountability under accepted international law could thereby lead to mutual benefits. Multinational corporations would enjoy de jure protections enhancing their global business activities; and countries where these corporations have considerable social, economic and environmental effect on their communities will have recourse to hold corporations accountable for harmful actions. Published under the Transnational Publishers imprint.

*Bangladesh and International Law* Mohammad Shahabuddin, 2021-02-22 This book is the first-ever comprehensive analysis of international law from Global South perspectives with specific reference to Bangladesh. The book not only sheds new light on classical international law concepts, such as statehood, citizenship, and self-determination, but also covers more current issues including Rohingya refugees, climate change, sustainable development, readymade garment workers and crimes against humanity. Written by area specialists, the book explores how international law shaped Bangladesh state practice over the last five decades; how Bangladesh in turn contributed to the development of international law; and the manner in which international law is also used as a hegemonic tool for marginalising less powerful countries like Bangladesh. By analysing stories of an ambivalent relationship between international law and post-colonial states, the book exposes the duality of international law as both a problem-solving tool and as a language of hegemony. Despite its focus on Bangladesh, the book deals with the more general problem of post-colonial states' problematic relationship with international law and so will be of interest to students and scholars of international law in general, as well as those interested in the Global South and South Asia in particular.

**International Law and Australian Federalism** Brian R. Opeskin, Donald Rothwell, 1997 International law-making has been expanding enormously. More than 50,000 treaties have been concluded since the United Nations began, and Australia is now a party to over 900 conventions and treaties. International law affects our understanding of human rights, criminal law, the environment, international trade, intellectual property and industrial relations. Over the past forty years many nations have recognised their growing interdependence, as international law has become more involved in their structures and workings. The old focus upon external relations between nations has broadened to include events within nations. International bodies, such as the UN Human Rights Committee, now scrutinise the conformity of Australian law with international norms. Australian courts have consequently given greater recognition to international law, even in cases where Australia has not yet implemented the relevant treaty in domestic law. Federal Parliament is now able to use international treaties as a basis for domestic law, and this has dramatically affected the traditional division of legislative authority between state and federal spaces. **International Law and Australian Federalism** is a collection of essays by prominent Australian academics, government lawyers and judges in the fields of international and constitutional law. It explores issues fundamental to the development of Australia's legal system. These issues must also concern policy makers in the political sphere, as we move towards a greater globalisation and closer international relations.
