Botanicals Zoheir Abouguendia, 2025-08-13 Unlock the Power of Botanicals for Better Aging ABOUT THIS BOOK With nearly 10,000 dietary supplements available on the market today, navigating the world of botanicals can be overwhelming, especially for older adults. “Botanicals: Towards Improving the Quality of Life of Seniors” is a comprehensive, evidence-based guide designed to empower seniors and caregivers to make informed decisions about botanical supplements. This book embraces a holistic approach. It integrates nutrition science, botanical research, and practical risk-benefit analysis to support healthy aging while minimizing potential adverse effects. Inside, you’ll discover:

- The fundamentals of nutrition and its role in healthy aging
- Clear, unbiased insights into the benefits and limitations of botanicals
- Practical tools for selecting botanicals tailored to individual needs
- Reasons for variations in efficacy and safety among the products of the same species
- Profiles of over 150 key plant species, mushrooms and probiotics
- A holistic framework to optimize the benefits of botanicals through considering the main lifestyle factors

Hospice and Palliative Care for Companion Animals Amir Shanan, Jessica Pierce, Tamara Shearer, 2023-03-15 Hospice and Palliative Care for Companion Animals A thoroughly updated and expanded new edition of the only book providing comprehensive treatment of hospice and palliative care in veterinary medicine Animals with life-limiting illnesses deserve compassionate, thoughtful, end-of-life care. Their caregivers and families, faced with the loss of a beloved companion, deserve empathy, support, and education, to guide them through an emotionally wrenching period and provide their companion animals with the highest possible quality of life. In recent years, the ethics of care and service to sick and dying animals and their caregivers has been the subject of considerable attention. Hospice and Palliative Care for Companion Animals, 2nd Edition provides a thorough update to the first and only complete guide to this field of service, its foundations, and its applications. It addresses the needs of pets, caregivers, and veterinary professionals alike, including fundamental ethical and emotional principles as well as detailed discussion of specific illnesses and life-limiting conditions. The expanded second edition incorporates cutting-edge research into animal behavior and cognition to enrich the reader’s understanding of companion animals’ emotional needs and their experience of illness and death. Hospice and Palliative Care for Companion Animals, 2nd Edition readers will also find: Existing chapters expanded to incorporate new research and practical experience New chapters discussing factors underlying the decision to euthanize, the potential role of ethology in palliative care, and

more A companion website with educational handouts for use in veterinary practices Hospice and Palliative Care for Companion Animals is an indispensable resource for caregivers and veterinary professionals alike.

Cancer Treatment-Related Cardiovascular Disease - Real World Data in Cardio-Oncology Susan Dent,Arjun Ghosh,Avirup Guha,Purvish M. Parikh,2023-10-18

Phytochemistry of Australia's Tropical Rainforest Cheryll J. Williams,2021-12-01 Rare, unique and irreplaceable - precious native rainforests occupy a precariously small part of Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other ecosystem. Australia's ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilised as both food and medicine. Phytochemistry of Australia's Tropical Rainforest is a record of this history and details how our understanding of these plants has led to the discovery of anaesthetics, analgesics, steroids, antimalarials and more. It provides an insight into the habitat, ecology and family associations of hundreds of species and explores their future therapeutic potential, alongside phytochemical studies of the ancient plant lineages. Toxicological evaluations of important poisonous plants are also included. Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on Earth, many of which are illustrated in this book. This comprehensive work is an essential reference for phytochemists, ethnobotanists and those with an interest in rainforests and their medicinal and botanical potential.

Cardiovascular Toxicities of Breast Cancer Treatment: Emerging Issues in Cardio-Oncology Sharad Goyal,Bruce George Haffty,2016-05-20 Cancer and cardiovascular disease (CVD) are the two most common causes of mortality and morbidity worldwide. The incidence of both cancer and cardiovascular disease increases with age. With increased life expectancy, the burden of both these diseases will increase substantially in coming years. Patients with CVD share multiple common risk factors and lifestyle behaviors in addition to frequently suffering from multiple comorbid conditions. Tobacco use, hypertension, high cholesterol, diabetes, physical inactivity, and poor nutrition are all established risk factors of heart disease. Patients with diseases such as breast cancer may develop CVD from treatment, such as use of chemotherapy and RT. Effects on the heart are a potentially significant and serious clinical problem in radiation therapy treatment of breast cancer. Over the course of the past 50 years, there have been great advances in the delivery of RT due to the development of new techniques, beam energy, improvement in imaging modalities, and development of image registration strategies. It is hypothesized that cardiac damage from RT is correlated to the dose absorbed by the heart and differs between left- and right-breast radiotherapy. The damage to cardiac micro- and macro-vasculature is the pathophysiological cause of RT-related heart disease. Given the growing clinical relevance of cardio-oncology, this *Frontiers in Oncology Research Topic* provides a venue for disseminating focused reviews and cutting edge research in this quickly growing field. We encourage submission of original papers and reviews dealing with cardiac toxicity after breast cancer treatment, motion management to reduce

cardiac exposure, imaging to evaluate potential cardiac toxicities and primary prevention of cardiac disease in the breast cancer patient.

Management of Breast Diseases Ismail Jatoi,Achim Rody,2016-11-16 This text is intended as a practical guide for physicians and surgeons who treat diseases of the breast, both benign and malignant. Thus, general surgeons, internists, family practitioners, gynecologists, surgical oncologists, radiation oncologists, and medical oncologists will find this book useful. The management of breast diseases requires a multidisciplinary approach, and this textbook therefore includes the views of a wide range of specialists from throughout the world. Today the treatment of breast diseases is largely predicated on the results of randomized prospective trials. The results of many clinical trials are discussed in detail, and readers will find this book to be a useful guide to the evidence-based treatment of breast diseases. The revised edition provides a comprehensive update of the previous version of the book. Specifically, it contains 2 new chapters: “Molecular Classification of Breast Cancer” and “Breast Cancer Molecular Testing for Prognosis and Prediction”. In addition, since publication of the previous edition, the results of numerous adjuvant systemic therapy and neo-adjuvant systemic therapy trials have been published, and this edition provides a comprehensive overview of these trials and discusses how they have changed the management of breast cancer. Similarly, there have been, in the last few years, important new developments in the local therapy of breast cancer. This edition discusses these new developments and particularly recent developments and controversies concerning the management of the axilla in patients with primary breast cancer. New guidelines with respect to radiotherapy are also reviewed and discussed. Finally, all chapters in the book are thoroughly revised and updated to provide readers with current understanding of the biology and treatment of breast cancer.

Head and Neck Cancer Louis B. Harrison,Roy B. Sessions,Waun Ki Hong,2009 This comprehensive, multidisciplinary text addresses all aspects of head and neck cancer and represents a wide spectrum of specialists, including surgical, radiation, and medical oncologists, dentists, pathologists, radiologists, and nurses. The book focuses on a two-part approach to treatment that maximizes the chance for a cure while maintaining a strong emphasis on quality of life. This Third Edition's updated techniques section includes new radiation techniques such as IMRT and IGRT and new endoscopic and laser surgical techniques. Other highlights include a new chapter on reconstructive techniques; significant updates to all site-specific chapters; updates on chemoprevention and molecular targeting; and discussions of new imaging modalities such as fused PET/CT. A companion Website will offer the fully searchable text with all images.
