English for academic purposes : learning english through the web Barahona Fuentes, Claudia; Arnó Macià, Elisabet;,2001 This is a virtual elective course for university students who need to use English in their academic work. This means that this subject is not related to a particular degree course (engineering, biology, law, etc.) but it aims to help students develop their language learning skills and at the same time to foster extensive practice in language use, with the Internet as the basic learning tool. Therefore, this is an instrumental course which is essentially practical and emphasizes communication rather than language study. It differs from a traditional language course in that it has been designed basically as a tool to help students learn to learn English. That is to say, the syllabus is not based on specific language content graded in terms of difficulty, but it is composed of a series of practical activities to encourage students to learn English effectively and independently, by choosing materials suited to their level of English and to their learning style. For this reason, this

course can be taken by students with different levels of English as long as they are familiar with the basic structures of the language and can more or less communicate in English

Developing Critical Thinking in EFL Classes Yue Lin, 2018-02-09 This book presents an innovative teaching experiment and an analytical study of critical thinking and the sociocultural theory of learning to illustrate the cognitive learning development mechanisms. It addresses the issues in developing critical thinking, including the controversy surrounding the definition, measurement and teaching of critical thinking, particularly in the L2 context. The book explains

how infusion-thinking lessons can be structured to help students develop critical thinking along with language learning. Further, it uses a case study as a real-world example to examine the applicability and feasibility of infusion-thinking lessons in the EFL context and their effectiveness in developing students' critical thinking and language learning. Packed with thinking activities and techniques, this practical, hands-on manual provides original ideas and empirical data, giving teachers everything they need to plan their lessons to improve students' critical thinking within language courses and evaluate their teaching.
