A Manifesto for the Just City Roberto Rocco, Caroline Newton, 2023-09-24 This is the third volume in the Manifesto for the Just City series published by TU Delft OPEN Publishing. This is a project spearheaded by the Centre for the Just City at the Delft University of Technology. The Manifestos in this book endeavour to envision alternative, positive urban futures as a counterpoint to prevailing cynicism and political disillusionment. This exercise is largely based on the ideas of Professor Faranak Miraftab on practices of hope and decoloniality. The 81 Manifestos written by 313 students from 63 universities around the world come in the wake of a four-part workshop in October 2022, in which TU Delft together with its many partners, invites students from all over the world to listen to the accounts of leading academics and practitioners whose knowledge touches aspects of spatial justice and to articulate their own ideas for what makes the just city. The scholars invited in 2022 included Professor Faranak Miraftab from the University of Illinois at Urbana Champaign, US, Professor Clarissa Freitas from the Federal University of Ceará in Fortaleza, Brazil, Dr. Gynna Millan Franco from the Universidad del Valle in Cali, Colombia, Professor Vanesa Castán Broto from the University of Sheffield in the UK and Professor Hiba Bou Akar from Columbia University in New York, US. Teachers from around the world who use the Manifesto as a class exercise have also contributed with short essays. The Centre for the Just City was set up at the Faculty of Architecture and the Built Environment at the Delft University of Technology in response to the pressing challenges of rampant social inequalities affecting the cohesion and the sustainability of cities and communities. Recognising the vital need to address these issues, the Centre emerged as a platform for research, education, and outreach activities for the creation of just cities. Since its inception, the Centre has been at the forefront of bridging theory and practice, fostering collaborations, and influencing policies and actions that contribute to making cities equitable, sustainable, and inclusive. Designing Better Architecture Education Manjari Chakraborty, 2015-11-11 Designing Better Architecture Education is an outcome of a research conducted systematically with diligence, passion, wide and in-depth exercise on the obvious and latent aspects of undergraduate architecture education. Although specific to India, this study probes the diverse global scenario in acknowledgement of the global style of architecture, where green preferences surface as compulsion. The findings are arranged systematically, analyzed impartially and inferred upon logically. The final bunch of suggestions aimed at a much desirable architecture education revamp in India is, in fact, relevant for architecture education as a whole anywhere. The author suggests compaction of graduation time, intensification of exposures, interactions and instructions, shift of focus, introduction of contemporary specializations, restructuring intake, revamping academic administration and a significant change of stance in teaching itself, including methods, philosophy, attitude and paraphernalia. The book provides valuable information, insight and suggestions to rejuvenate the academic approach to the education of architecture and forms a reliable basis for further endeavour in this direction.
