Hang me if I am guilty. I meet him if I go there. Butter dissolves if you leave it in sun. Plants die if you don't water them. Milk goes off if you don't keep it in a cool place. Ask the officer if you have any problems. I don't mind if you sit in my cabin. Customers get upset if they are being overcharged. I have no problem if her name is disclosed. They promised to slash power rates if they are elected. Existing laws can be a deterrent if a time-based trial is conducted. Do you mind if I turn on the radio for a while? A death row convict cannot be executed if he is not physically and mentally fit. A student may not be motivated to work hard if a promotion is guaranteed. Many of the deaths can be avoided if bikers wear helmets. I go by taxi when the bus is late.

Context, Cognition and Conditionals Chi-Hé Elder, 2019-06-24 This book proposes a semantic theory of conditionals that can account for (i) the variability in usages that conditional sentences can be put; and (ii) both conditional sentences of the form 'if p, q' and those conditional thoughts that are expressed without using 'if'. It presents theoretical arguments as well as empirical evidence from English and other languages in support of the thesis that an adequate study of conditionals has to go beyond an analysis of specific sentence forms or lexical items. The resulting perspective on conditionals is one in which conditionality is located at a higher level than that of the sentence; namely, at the level of thought. The author argues that it is only through adopting such a perspective, and with it, a commitment to context-dependent semantics, that we can successfully represent conditional utterances as they are used and understood by ordinary language users. It will be of interest to students and scholars working on the semantics of conditionals in the fields of linguistics (especially semantics and pragmatics) and philosophy of language.

English Grammar Practice Roxana Nastase, 2017-12-13 English Grammar might seem difficult. It gets easier with carefully chosen examples and comparisons. You can master English grammar through conversational exercises. They will help you with everyday life in an English environment. Method tested for many years with very good results. This Grammar English Book offers grammar, fully explained and practiced through a variety of exercises; helps with developing and practicing vocabulary and phrasal verbs; is ideal for self-study or classroom use. There are regular consolidation units which help with the First Certificate and TOEFL examinations. From the Author This is an ideal resource, helping with adapting communications by presenting English grammar structures. If you want to become fluent in English, this will help you reach

your goal of becoming fluent. The tenses that cause more problems to students, like Present Perfect Tense, Past Tense and Past Continuous are explained with detailed examples for each structure and are practiced extensively in exercises, which help not only with mastering the tenses but also developing conversational skills. This book has been developed and tested along several years. I have used the content of this English Grammar Book with very good results.

Knowledge and Conditionals Robert Stalnaker, 2019 Robert C. Stalnaker presents a set of essays on the structure of inquiry. In the first part he focuses on the concepts of knowledge, belief, and partial belief, and on the rules and procedures we use - or ought to use - to determine what to believe, and what to claim that we know. In the second part he examines conditional statements and conditional beliefs, their role in epistemology, and their relations to causal and explanatory concepts, such as dispositions, objective chance, relations of dependence, and independence. A central concern of the book is the interaction of different cognitive perspectives - the ways in which the attitudes of rational agents are or should be influenced by critical reflection on their present cognitive situation, on their own cognitive situations at other times, and on the cognitive situations of others with whom they interact. The general picture that is developed is naturalistic, following Hume in rejecting a substantive role for pure reason in the defense of inductive rules, and in giving causal concepts a central role in the description and explanation of our cognitive practices. However, Stalnaker rejects the side of Hume that aims to reduce concepts involving natural necessity to more basic descriptive concepts. Instead, he argues that the development of inductive rules and practices takes place in interaction with the development of concepts for giving a theoretical description of the world.

Language Typology and Language Universals Martin Haspelmath, 2001 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation. To attain these objectives, the series will aim for a standard comparable to that of the leading handbooks in other disciplines, and to this end will strive for comprehensiveness, theoretical explicitness, reliable documentation of data and findings, and up-to-date methodology. The editors, both of the series and of the individual volumes, and the individual contributors, are committed to this aim. The languages of publication are English, German, and French. The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks; however no inflexible pre-set limits will be imposed on the scope of each volume. The series is open-ended, and can thus take account of further developments in the field. This conception, coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care, means that there is no set time-table for the publication of the whole series. Each volume will be a self-contained work, complete in itself. The order in which the handbooks are published does not imply any rank ordering, but is determined by the way in which the series is organized; the editor of the whole series enlist a competent editor for each individual volume. Once the principal editor for a volume has been found, he or she then has a completely free hand in the choice of co-editors and contributors. The editors plan each volume independently of the others, being governed only by general formal principles. The series editor only intervene where questions of delineation between individual volumes are concerned. It is felt that this (*modus operandi*) is best suited to achieving the objectives of the series, namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume.
