Disaster Resilience from a Sociological Perspective Barbara Lucini, 2014-05-03 Natural disasters traumatize individuals, disrupt families, and destabilize communities. Surviving these harrowing events calls for courage, tenacity, and resilience. Professional planning requires specific types of knowledge of how people meet and cope with extreme challenges. Disaster Resilience from a Sociological Perspective examines three major earthquakes occurring in Italy over a fourteen - year period for a well-documented analysis of populations' responses to and recovery from disaster, the social variables involved, and the participation of public agencies. This timely volume reviews sociological definitions and models of disaster, identifying core features of vulnerability and multiple levels of individual and social resilience. The analysis contrasts the structural and supportive roles of Italy's civil protection and civil defense services in emergency planning and management as examples of what the author terms professional resilience. And testimony from earthquake survivors and volunteers gives voice to the social processes characteristic of disaster. Among the areas covered: Social context for concepts of disaster, vulnerability, risk, and resilience Types of resilience: a multidimensional analysis, focused on a physical, ecological, and ecosystem perspective Findings from three earthquakes: loss, hope, and community. Two systems of organizational response to emergencies Toward a relational approach to disaster resilience planning Plus helpful tables, methodological notes, and appendices For researchers in disaster preparedness, psychology, and sociology, Disaster Resilience from a Sociological Perspective raises--and addresses--salient questions about people and communities in crisis, and how studying them can improve preparedness in an uncertain future.

Handbook of Research on Advanced Research Methodologies for a Digital Society Punziano, Gabriella, Delli Paoli, Angela, 2021-09-03 Doing research is an ever-changing challenge for social scientists. This challenge is harder than ever today as current societies are changing quickly and in many, sometimes conflicting, directions. Social phenomena, personal interactions, and formal and informal relationships are becoming more borderless and disconnected from the anchors of the offline "reality." These dynamics are heavily marking our time and are suggesting evolutionary challenges in the ways we know, interpret, and analyze the world. Internet and computer-mediated communication (CMC) is being incorporated into

every aspect of daily life, and social life has been deeply penetrated by the internet. This is due to recent technological developments that increase the scope and range of online social spaces and the forms and time of participation such as Web 2.0, which widened the opportunities for user-generated content, the emergence of an “internet of things,” and of ubiquitous mobile devices that make it possible to always be connected. This implies an adjustment to epistemological and methodological stances for conducting social research and an adaption of traditional social research methods to the specificities of online interactions in the digital society. The Handbook of Research on Advanced Research Methodologies for a Digital Society covers the different strands of methods most affected by the change in a digital society and develops a broader theoretical reflection on the future of social research in its challenge to always be fitting, suitable, adaptable, and pertinent to the society to be studied. The chapters are geared towards unlocking the future frontiers and potential for social research in the digital society. They include theoretical, epistemological, and ontological reflections about the digital research methods as well as innovative methods and tools to collect, analyze, and interpret data. This book is ideal for social scientists, practitioners, librarians, researchers, academicians, and students interested in social research methodology and its developments in the digital scenario.

The Lure of Communication Andrea Lombardinilo, 2024-02-29 This book addresses the convergence of sociology, communication and rhetoric, with particular reference to the contemporary expressive and social patterns of mass communication. Using rhetoric as a meta-conceptual apparatus for the sociology of communication, this book offers an original and comprehensive critique of historical social theory alongside 20th century communication researchers. The author demonstrates the symbiotic relationship between the rhetorical structures of the media-sphere and the new narrative formats in which cultural representation merges into social and civil observation. This book will be of interest to academics and students studying sociology, communication and cultural studies.

The Unexpected in Action Antonio Coccozza, 2023-03-21 The book is a true knowledge-enhancing project, dealing with the forms of rationality at work in social life, which are so many, varied and complex. Published already in Spanish and Italian, it analyses the role played by rationality through the lens of social theories in order to propose a problematic interpretation of human action. Since there is nothing more practical than a good theory when seeking to understand our society, the book reflects on the theoretical approaches that provide useful categories by means of which to understand and interpret individual, organizational, and institutional action. It proposes an analysis of a wide variety of classics by eminent European and Anglo-American thinkers, such as Dahrendorf, Mannheim, Marx, Popper, Weber, Habermas, Luhmann, Machiavelli, Pareto, Ardigò, Cesareo, Parsons, Schütz, Alexander, Bauman, Beck, Sennett, Antiseri, Boudon, Sen, Simon, to shed light on the relationship between rationality, difficulties in thinking and extra-rationality. Finally, the reasons for

unexpected action are investigated as well as the strategic role played by ethics, rationality and skills in postmodern societies on the basis of the contributions of Nussbaum and Piketty.

2020 Council of Europe, 2014 Perspectives on youth is a new series published by the partnership between the European Commission and the Council of Europe in the field of youth with the support of five countries - Belgium, Finland, France, Germany and the United Kingdom - and the Nordic Council of Ministers. Its purpose is to bring national youth policies closer together and to keep the largely European dialogue about key problems of national and supranational child and youth policy on a solid foundation in terms of content, expertise and politics. The series aims to act as a forum for information, discussion, reflection and dialogue on European developments in the field of youth policy, youth research and youth work. The conceptual strategy behind this series is meant to be critical and anticipative, reflecting European youth policies and their relevance for and impact on young people. It also highlights trends in the youth field that need innovative and forward-looking strategies. The series aims to contribute to the development and promotion of a youth policy and of a youth work practice that is based on knowledge as well as participatory principles. It is also intended to be a forum for peer-learning between member states of the European Union as well as of the Council of Europe. The plan is to publish Perspectives on youth at least once a year. This first issue focuses on 2020 - what do YOU see?, featuring a futuristic perspective on the lives of young people across Europe and the wider world, based on research, social trends, policy planning, changing demography, employment prospects, sustainable development and security, among other things.
