

Born To Be Good The Science Of A Meaningful Life

M Carnoy

Born to Be Good Dacher Keltner, 2009-10-05 “A landmark book in the science of emotions and its implications for ethics and human universals.”—Library Journal, starred review In this startling study of human emotion, Dacher Keltner investigates an unanswered question of human evolution: If humans are hardwired to lead lives that are “nasty, brutish, and short,” why have we evolved with positive emotions like gratitude, amusement, awe, and compassion that promote ethical action and cooperative societies? Illustrated with more than fifty photographs of human emotions, *Born to Be Good* takes us on a journey through scientific discovery, personal narrative, and Eastern philosophy. Positive emotions, Keltner finds, lie at the core of human nature and shape our everyday behavior—and they just may be the key to understanding how we can live our lives better.

Stealth Altruism Arthur B. Shostak, 2017-07-12 Though it has been nearly seventy years since the Holocaust, the human capacity for evil displayed by its perpetrators is still shocking and haunting. But the story of the Nazi attempt to annihilate European Jewry is not all we should remember. *Stealth Altruism* tells of secret, non-militant, high-risk efforts by “Carers,” those victims who tried to reduce suffering and improve everyone’s chances of survival. Their empowering acts of altruism remind us of our inherent longing to do good even in situations of extraordinary brutality. Arthur B. Shostak explores forbidden acts of kindness, such as sharing scarce clothing and food rations, holding up weakened fellow prisoners during roll call, secretly replacing an ailing friend in an exhausting work detail, and much more. He explores the motivation behind this dangerous behavior, how it differed when in or out of sight, who provided or undermined forbidden care, the differing experiences of men and women, how and why gentiles provided aid, and, most importantly, how might the costly obscurity of stealth altruism soon be corrected. To date, memorialization has emphasized what was done to victims and sidelined what victims tried to do for one another. “Carers” provide an inspiring model and their perilous efforts should be recognized and taught alongside the horrors of the Holocaust. Humanity needs such inspiration.

The Sweet Spot Christine Carter, Ph.D., 2015-01-20 Learn how to achieve more by doing less! Live in that zone you’ve glimpsed but can’t seem to hold on to—the sweet spot where you have the greatest strength, but also the greatest ease. Not long ago, Christine Carter, a happiness expert at UC Berkeley’s Greater Good Science Center and a speaker, writer, and mother, found herself exasperated by the busyness of modern life: too many conflicting obligations and not enough time,

energy, or patience to get everything done. She tried all the standard techniques—prioritizing, multitasking, delegating, even napping—but none really worked. Determined to create a less stressful life for herself—without giving up her hard-won career success or happiness at home—she road-tested every research-based tactic that promised to bring more ease into her life. Drawing on her vast knowledge of the latest research related to happiness, productivity, and elite performance, she followed every strategy that promised to give her more energy—or that could make her more efficient, creative, or intelligent. Her trials and errors are our reward. In *The Sweet Spot*, Carter shares the combination of practices that transformed her life from overwhelmed and exhausting to joyful, relaxed, and productive. From instituting daily micro-habits that save time to bigger picture shifts that convert stress into productive and creative energy, *The Sweet Spot* shows us how to

- say “no” strategically and when to say “yes” with abandon
- make decisions about routine things once to free our minds to focus on higher priorities
- stop multitasking and gain efficiency
- “take recess” in sync with the brain’s need for rest
- use technology in ways that bolster, instead of sap, energy
- increase your ratio of positive to negative emotions

Complete with practical “easiest thing” tips for instant relief as well as stories from Carter’s own experience of putting *The Sweet Spot* into action, this timely and inspiring book will inoculate you against “The Overwhelm,” letting you in on the possibilities for joy and freedom that come when you stop trying to do everything right—and start doing the right things. ONE OF GREATER GOOD’S FAVORITE BOOKS OF THE YEAR “[For fans] of a certain kind of self-improvement book—the kind, like *The Happiness Project* or *168 Hours: You Have More Time Than You Think* or *Getting Things Done*, that offers up strategies for making certain areas of life work better without requiring that you embrace a new belief system.”—KJ Dell’Antonia, *The New York Times* (Motherlode blog) “A breath of fresh air . . . Based on personal experiments with living life in what she calls the ‘pressure cooker,’ Dr. Carter offers advice in easily digestible nuggets.”—*Working Mother* “Carter gives actionable ways to balance your life, your health, and your career. This book is packed with smart advice and hard-earned wisdom.”—*Inc.* “Learn more about escaping the ‘busyness trap’ and uncovering a happier, less stressed you.”—*Shape* “A highly readable, diligently researched advice book that offers concrete tips on how to get off the treadmill of busyness.”—*Greater Good* “Chock-full of concrete tips on how to sharpen your focus, improve your efficiency, and use technology to your advantage.”—*The Week* “Illuminates the simple and sustainable path toward a precious and happy balance.”—Deepak Chopra

Raising a Kid Who Can Catherine McCarthy, Heather Tedesco, Jennifer Weaver, 2023-09-12 Three mental health professionals cut through the parenting advice noise with this accessible, easy-to-skim book filled with actionable strategies and tips to build a child's capacity to thrive where they are planted, in good times and bad. It's time to parent smarter, not harder. Filled with scientifically based and eminently actionable advice and strategies, *Raising a Kid Who Can* boils down the ten essential things that every child needs to thrive so that parents can stop drowning in information and get to the business

of raising healthier, happier humans. Written by three mental health professionals who work with families, organized for easy skimming, and designed to be useful at any stage in a child's life, the book devotes one short, impactful chapter per principle, including Resilience, Attention and Self-Control, Psychological Flexibility, Self-Motivation, Compassion and Gratitude. The result is a new approach to a parenting guide, one that takes a wholistic approach to nurturing a child's development and help parents get right to the information they need, when they need it.

The Gratitude Project Jeremy Adam Smith, Kira M. Newman, Jason Marsh, Dacher Keltner, 2020-09-01 The Gratitude Project explores gratitude's deep roots in human psychology—how it evolved and how it affects our brain—as well as the transformative impact it has on creating a meaningful life and a better world. This book is the result of a multiyear collaboration between the Greater Good Science Center and Robert Emmons of the University of California, Davis, with essays based on new research and written by renowned positive psychologists and public figures.

Said Nursi and Science in Islam Necati Aydin, 2019-05-20 This book examines how the prominent Muslim scholar Said Nursi developed an integrative approach to faith and science known as the other indicative (mana-i harfi) and explores how his aim to reconcile two academic disciplines, often at odds with one another, could be useful in an educational context. The book opens by examining Nursi's evolving thought with regards to secular ideology and modern science. It then utilizes the mana-i harfi approach to address a number of issues, including truth and certainty, the relationship between knowledge and worldview formation, and the meaning of beings and life. Finally, it offers a seven-dimensional knowledge approach to derive meaning and build good character through understanding scientific knowledge in the mana-i harfi perspective. This book offers a unique perspective on one of recent Islam's most influential figures, and also offers suggestions for teaching religion and science in a more nuanced way. It is, therefore, a great resource for scholars of Islam, religion and science, Middle East studies, and educational studies.

Connect First: 52 Simple Ways to Ignite Success, Meaning, and Joy at Work Melanie Katzman, 2019-10-22 #1 WALL STREET JOURNAL BESTSELLER • USA TODAY BESTSELLER A renowned business psychologist, advisor, and consultant to the world's leading companies reveals the key to greater success, meaning, and joy at work Technology has enabled us to be more interconnected today than ever before. So why do so many of us feel isolated and undervalued at work? Why does it feel like something is missing? It doesn't have to be this way. In these rapidly changing, challenging times, how do we—YOU—develop the intuition, self-awareness, and interpersonal agility required to prosper? Here's what we've lost track of: organizations are run by people, and people run on emotions. Strong relationships are the bedrock of lasting success, meaning, and joy at work. In this life-changing guide, Dr. Melanie Katzman shows you an impactful approach to

connect first as fellow humans, then as coworkers and colleagues, to forge the deep bonds that make a significant difference. Learn how to:

- Establish respect and make others feel valued
- Engage all of your senses to create a truly inclusive culture
- Become popular and be the person everyone wants to work with
- Grow loyalty by making it about them—your coworkers
- Resolve conflicts by remaining curious and open with others
- Fight fear (and prepare for the future) by stepping outside your comfort zone and experimenting with new ideas
- Have a big impact by leveraging your platform, living your values, and leading the change

Dr. Katzman presents 52 actions you can take immediately to create a deeply rewarding work life by connecting to yourself, your organization, and the world at large. These are the same powerful techniques she has used with leaders and employees at the world's top companies to enhance productivity and foster fulfillment and joy at work—the hallmarks of true success.

Psychopathology: Science and Practice Ronald Comer, Jonathan Comer, 2023-12-13 Psychopathology: Science and Practice (formerly Abnormal Psychology) is the market-leading introduction to mental disorders and their treatment using vivid case studies, compelling examples, and the latest research.

COVID-19 and Existential Positive Psychology (PP2.0): The New Science of Self-Transcendence Paul T. P. Wong, Claude-Hélène Mayer, Gökmen Arslan, In the era of COVID-19, many people have suffered high levels of stress and mental health problems. To cope with the widespread of suffering (physical, psychological, social, and economical) the positive psychology of personal happiness is no longer the sole approach to examine personal wellbeing. Other approaches such as Viktor Frankl's theory of self-transcendence provide a promising framework for research and intervention on how to achieve resilience, wellbeing, and happiness through overcoming suffering and self-transcendence. The existential positive psychology of suffering complements the positive psychology of happiness, which is championed by Martin Seligman, as two equal halves of the circle of wellbeing and optimal mental health. This Research Topic aims to examine the different approaches to Positive Psychology and their influence on individual wellbeing during the COVID-19 era. One of the exciting development in the positive psychology of wellbeing is the mounting research on the adaptive benefits of negative emotions, such as shame, guilt, and anger, as well as the dialectical process of balancing negative and positive emotions. As an example, based on all the empirical research and Frankl's self-transcendence model, Wong has developed the existential positive psychology of suffering (PP2.0) as the foundation for flourishing. Here are a few main tenets of PP2.0: (1) Life is suffering and a constant struggle throughout every stage of development, (2) The search for self-transcendence is a primary motive guided by the meaning mindset and mindful mindset. (3) Wellbeing cannot be sustainable without overcoming and transforming suffering. In this Research Topic we welcome diverse approaches discussing the following points:

- The

dialectic process of overcoming the challenges of every stage of development as necessary for personal growth and self-transcendence; • The role of self-transcendence in resilience, virtue, meaning, and happiness; • The upside of negative emotions; • The new science of resilience based on cultivating the resilient mindset and character; • How to make the best use of suffering to achieve our potentials & mental health.
