Bitcoin and Mobile Payments Gabriella Gimigliano, 2016-07-25 This book provides a critical analysis of The European Union's regulatory framework for mobile payments and bitcoin. Chapters discuss the creation of the EU single market for e-payments and combine legal analysis with comparative case studies in their exploration of the regulatory challenges surrounding e-payments. The contributing authors analyse the key economic and legal issues of the development of bitcoin and mobile payments within the EU framework through a comparative lens. They cover topics ranging from user data and funds protection and the stability of the payment system to the competitiveness of the EU market. Providing a comprehensive and methodological guide to the bitcoin and mobile payments in Europe, this book will prove an illuminating and informative read for academics, students and policy makers with an interest in the impact of innovation on payment systems.

Cognitive Modelling in Language and Discourse across Cultures Annalisa Baicchi, Erica Pinelli, 2017-08-21 This volume deals with core issues in figurative language and figurative thought. It also explores areas of convergence between idealised cognitive models and language across fourteen European and non-European languages (Croatian, English, German, Greek, Italian, Japanese, Persian, Polish, Russian, Old Saxon, Sicilian, Spanish, Swedish, and Turkish). The collection foregrounds the relationship that holds between literalness and figurativeness in meaning construction, it emphasises the role of conceptual metonymy and metaphor as the main cognitive tools at work in inferential activity and as generators of discourse ties, and it also depicts the import of cognitive models in the production and interpretation of multimodal communication. In addition, a number of more specific topics are addressed from different perspectives, such as language variation and cultural models, the argumentative role of metaphor in discourse and the role of empirical work in cognitive linguistics.

Economics & Management 1/2025 AA.VV., 2025-03-31T15:55:00+02:00 To succeed in business, it's no longer enough to innovate and offer new products; it's essential to earn the trust of customers, because trust is what keeps them loyal over time. To achieve this, companies must move beyond old business models and adopt a more ethical and responsible approach that not only strengthens customer relationships but also contributes to the wellbeing of society.

Digital Services in Crisis, Disaster, and Emergency Situations Oliveira, Lúcia, Tajariol, Federico, Gonçalves, Liliana Baptista, 2021-01-29 The contemporary world is characterized by the massive use of digital communication platforms and services that allow people to stay in touch with each other and their organizations. On the other hand, it is also a world with

great challenges in terms of crisis, disaster, and emergency situations of various kinds. Thus, it is crucial to understand the role of digital platforms/services in the context of crisis, disaster, and emergency situations. *Digital Services in Crisis, Disaster, and Emergency Situations* presents recent studies on crisis, disaster, and emergency situations in which digital technologies are considered as a key mediator. Featuring multi- and interdisciplinary research findings, this comprehensive reference work highlights the relevance of society's digitization and its usefulness and contribution to the different phases and types of risk scenarios. Thus, the book investigates the design of digital services that are specifically developed for use in crisis situations and examines services such as online social networks that can be used for communication purposes in emergency events. Highlighting themes that include crisis management communication, risk monitoring, digital crisis intervention, and smartphone applications, this book is of particular use to governments, institutions, corporations, and professionals who deal with crisis, disaster, and emergency scenarios, as well as researchers, academicians, and students working in fields such as communications, multimedia, sociology, political science, and engineering.

Finance and Investment: The European Case Colin Mayer,Stefano Micossi,Marco Onado,Marco Pagano,Andrea Polo,2017-12-29 Low growth, low investment, insufficient spend on infrastructure, weak bank lending to the corporate sector, and funding deficiencies of small and medium-sized enterprises are all causes of concern in Europe. To many, they point to fundamental problems in the financing of European companies and in Europe's financial systems. Are these concerns valid and do the structure and performance of the financial system lie at their heart? If so, what should be done to address them, and have the right policy prescriptions been identified to date? A product of the Restarting European Investment Finance research programme, *Finance and Investment: The European Case* brings together leading researchers to consider the causes of the persistently low level of investment in Europe. It examines the extent to which the financial system is a contributory factor and identifies possible remedies, considering the relation of finance to corporate sector investment, the lending behaviour of banks, the provision of equity financing, and the role of public sector institutions, regulation, and taxation. *Finance and Investment* provides one of the most comprehensive and thorough analyses of any financial system undertaken to date. It reflects a large body of research using new and existing data sets, employing advanced empirical tools, and exploiting the unique insights provided by the tumultuous events of financial and sovereign debt crises. Together, they comprise an exceptional body of knowledge to advance academic thinking and guide policy formulation.

The New European Industrial Policy Franco Mosconi,2015-05-22 The years since the global financial crisis have seen something of a renaissance in the manufacturing industry. The United States has launched its Advanced Manufacturing Partnership, and China owes much of its spectacular economic boom in the last decades to its being the 'world's factory'. Is there room for the EU in this landscape? This timely new book explores Europe's role in this evolving environment. It argues

that on the one hand, in terms of sheer numbers, the role of the manufacturing industry in the EU is on a par with other major global economies. However, the book also states that Europe falls short of its global competitors (the USA in particular) in terms of its involvement in the most innovative manufacturing sectors. The volume therefore argues that this creates the opportunity for a new European industrial policy. Exploring the development of current EU policy, the book puts forward suggestions as to how the EU can improve in terms of the competitiveness of its technology policy. Placing the EU's position in the context of the industrial structures of the USA, Japan and the BRICs, the book blends theoretical models and practical examples in order to offer a the state of the art look at the current and future direction of Europe's industrial policy. This book will be of relevance to all those with an interest in European economics, industrial economics, public policy, European politics and European studies.

Medium Sized Firms and Economics Growth Janez Prašnikar, 2005 The culprit for deficiencies of knowledge about medium-sized companies is their frequent inclusion among small companies. The authors try to find arguments for a more sensible definition of medium-sized company in modern microeconomic theory, theory of entrepreneurship and theory of financial markets. According to the first one, companies grow until they reach the minimum efficient scale. On the other hand, a company's size is determined by incomplete contractual relationships. The second theory argues that medium-sized companies have some advantages because a more manageable number of employees and closer ties between them and the entrepreneur may reduce monitoring costs. In addition, the employees are more willing to invest in formation of specific skills required for their post. The third theory claims that due to information asymmetry medium-sized firms resort predominantly to internal sources of financing (depreciation, retained profits), while banks (relationship banking) are more frequently among external sources of finance than capital markets. - what are medium-sized companies; dynamic - how do they grow; national - how a national economy to a large extent depends on the efficiency of medium-sized companies; and international - how some medium-sized companies acquire characteristics of multinational companies by means of foreign investment.

Economic Planning and Industrial Policy in the Globalizing Economy Murat Yülek, 2014-09-04 This book discusses national development planning in the context of a globalized world economy. National economic development planning, the process of defining strategic economic objectives for a country and designing policies and institutional frameworks to attain them, was popular in many countries in the 1960s and 1970s. Over time it lost its appeal. More recently, with globalization accelerating and economic competition increasing, it is making a comeback in different countries under different forms. National planning in this new era is different than the earlier quantitative planning approaches. It employs different tools, such as strategic visions and action plans, revived forms of physical infrastructure planning, industrial policy, and cluster

policy. Built on the research of international scholars with firsthand knowledge of the countries in question, this volume presents and evaluates current national planning strategies and policy worldwide. It will be of interest to both academicians who study and teach globalization and development as well as policy makers who may use it as a reference as they contemplate their own strategies.

Sustainable Development Chaouki Ghenai, 2012-02-24 The technological advancement of our civilization has created a consumer society expanding faster than the planet's resources allow, with our resource and energy needs rising exponentially in the past century. Securing the future of the human race will require an improved understanding of the environment as well as of technological solutions, mindsets and behaviors in line with modes of development that the ecosphere of our planet can support. Sustainable development offers an approach that would be practical to fuse with the managerial strategies and assessment tools for policy and decision makers at the regional planning level.

mariner 8 boat repair forum

marineengine com - Jan 09 2023

web jun 27 2009 the 677 tells me that
it s a 1977 83 yamaha built b model
mariner the entire model run was
mechanically identical so the exact year
is not important from a parts
perspective the 8 horse b model was
not overly prolific in north america but
merc does still stock many maintenance
parts for it
