Transforaminal Endoscopy for Lumbar Spine Sang-Ho Lee, Sang-Ha Shin, Junseok Bae, Sang-Joon Park, 2023-05-30 Endoscopic spine surgery is the essence of the minimally invasive surgery technique. It's a gradually developing field of spine surgery. Nevertheless, many doctors still have difficulties in acquiring an endoscope by themselves. This is especially true for transforaminal approach endoscopy. The editors of the book are pioneers in endoscopy and have had many interesting experiences related to transforaminal endoscopy. Since each patient has a different anatomy and disc shape, there are numerous practical techniques suitable for it, but few are specifically able to describe it. The main purpose of this book is to provide the essence of endoscopy to date, based on actual video images and practical techniques of transforaminal

endoscopy accumulated over decades.

Gua sha Arya Nielsen,2014-09-05 'Sometimes called coining, spooning or scraping, Gua sha is defined as instrument-assisted unidirectional press-stroking of a lubricated area of the body surface that intentionally creates 'transitory therapeutic petechiae' representing extravasation of blood in the subcutis.' Gua sha has been used for centuries in Asia, in Asian immigrant communities and by acupuncturists and practitioners of traditional East Asian medicine worldwide. With the expansion of traditional East Asian medicine, Gua sha has been used over broad geographic areas and by millions of people. It is valuable in the treatment of pain and for functional problems with impaired movement, the prevention and treatment of acute infectious illness, upper respiratory and digestive problems, and many acute or chronic disorders. Research has demonstrated Gua sha radically increases surface microperfusion that stimulates immune and anti-inflammatory responses that persist for days after treatment. The second edition expands on the history of Gua sha and similar techniques used in early Western Medicine, detailing traditional theory, purpose and application and illuminated by science that focuses its relevance to modern clinical practice as well as scholarly inquiry. This book brings the technique alive for practitioners, with clear discussion of how to do it - including correct technique, appropriate application, individualization of treatment - and when to use it, with over 50 case examples, and superb color photographs and line drawings that demonstrate the technique. NEW TO THIS EDITION • New chapter on immediate and significant Tongue changes as a direct result of Gua sha • Research and biomechanisms • Literature review from Chinese language as well as English language medical journal database • New case studies • Over 30 color photographs New chapter on immediate and significant Tongue changes as a direct result of Gua sha Research and biomechanisms Literature review from Chinese language as well as English language medical journal database New case studies Fully updated and revised throughout Over 30 colour photographs

An Analysis of Ryanair's Corporate Strategy Miriam Mennen, 2010-03-19 Essay from the year 2005 in the subject Business economics - Offline Marketing and Online Marketing, grade: 72 % - A, University of Sunderland, course: Global Corporate Strategy, language: English, abstract: Ryanair was founded in 1985 as a family business that originally provided full service conventional scheduled airline services between Ireland and the UK. The airline started to compete within the confines of the existing industry by trying to steal customers from their rivals, especially the state monopoly carrier Air Lingus, outlined by Chan Kim and Renée Mauborgne (2004) as "Bloody or Red Ocean Strategy". Ryanair seemed to follow a "me-too strategy"; according to Osborne, K. (2005), they "tried to be all things to all people". Even they started restructuring; their strategy was not enough differentiated and their cost advantage was too low to be profitable. Ryanair then created a competitive advantage through the alignment of the three components of business systems; 1) Creating superior value for their customers (outside perspective) 2) Supplying their superior value-adding activities in an effective and efficient manner (which jointly form the "Value Chain") 3) Possessing over the resource base required to perform the value-adding activities, (inside perspective) According to Porter (1987), "corporate strategy is what makes the corporate whole add up to more than the sum of its business unit parts." It is seen to be concerned with the overall purpose and scope of the organisation and to meet the expectations of major stakeholders. All aspects of Ryanair's value chain are important to the company and their shareholders as Ryanair's decisions add value to both. The following report outlines the three perspectives of shaping Ryanair's business system. The value creation dimension of Ryanair's business model will be outlined, considering the theories of Porter and the more recent authors Kim and Mauborgne (2004). Further, the linkages in the airline's value chain and their resource base will be analysed, considering Hamel and Prahalad's (1990) core competency model (inside-out approach). In section 2, the future challenges of the airline are considered. Ryanair's strengths and weaknesses will be analysed, internal value creating factors such as assets, skills or resources, to consider how the airline can create alignment to its opportunities and threats, external factors. An stronger "outside - in" approach for Ryanair's future corporate strategy will be considered, applying Porter's five forces model, placing the market, the competition, and the customer at the starting point of the strategy process.
