*Lost Knowledge of the Mayan Empire* HENRICK PEREZ, The two main kinds of roads were sacbe and highways. Sacbes were the smaller, more local roads which connected cities to each other. They didn't have any pavement on them, but they're still considered roads by many Mayan scholars. highways are bigger and connect cities with each other. The highways were built using a combination of natural materials and man-made structures such as bridges, ditches, rivers etc.. These structures helped make sure that people could cross waterways without getting their feet wet in the process. The sacbes were made with small stones placed side by side along their entire length; however there are some cases where larger stones used for paving stone can be found at regular intervals within this type of infrastructure – even though these do not seem necessary for walking across since you would fall through them anyway! Some of the roads were made by cutting down trees to make canals for them to cross over. The canals were built to drain water from the fields. The roads were built to carry people and goods, as well as help with trade, military campaigns and religious ceremonies. On top of all that, they also helped with agriculture by transporting food from one place to another. The Mayans also built bridges across canals for people to cross over, made artificial hills so that the canals could be channeled more easily, and even built aqueducts to bring water into their cities. The canals of the Mayans were an engineering marvel in their day, and they still stand today as a testament to the ingenuity of ancient civilizations. However, one thing is often overlooked: these canal systems were not just built out of dirt and stone; they also had many artificial hills that helped channel the water more efficiently. These hills weren't just for decoration—they were actually critical to how water flowed through the city. It is interesting but there are different theories about how their ancient engineering and technology was used. We can only speculate. Some scientists believe that the Mayans had mastered a complex understanding of astronomy and mathematics. They also believed that they had a detailed knowledge of where the sun, moon, planets and stars would be at any time throughout history. The Mayans were able to predict eclipses thousands of years ago with great accuracy using only simple tools like shadows on stones or trees as indicators of when an eclipse would happen. Some scientists believe that the Mayans used their engineering skills to build massive pyramids which still stand today as testaments to their greatness as an ancient civilization. There have been suggestions in recent times that some kind of unknown energy lies within these structures; some say it's electromagnetic energy while others say it's gravitational forces coming from deep within our planet Earth itself!

**Migrations in Late Mesoamerica** Christopher S. Beekman, 2019-10-14 Bringing the often-neglected topic of migration to the forefront of ancient Mesoamerican studies, this volume uses an illuminating multidisciplinary approach to address the role of population movements in Mexico and Central America from AD 500 to 1500, the tumultuous centuries before European contact. Clarifying what has to date been chiefly speculation, researchers from the fields of archaeology, biological anthropology, linguistics, ethnohistory, and art history delve deeply into the causes and impacts of prehistoric migration in the region. They draw on evidence including records of the Nahuatl language, murals painted at the Cacaxtla polity, ceramics in the style known as Coyotlatelco, skeletal samples from multiple sites, and conquest-era accounts of the origins of the Chichén Itzá Maya from both Native and Spanish scribes. The diverse datasets in this volume help reveal the choices and priorities of migrants during times of political, economic, and social changes that unmoored populations from ancestral lands. *Migrations in Late Mesoamerica* shows how migration patterns are vitally important to study due to their connection to environmental and political disruption in both ancient societies and today's world. A volume in the series *Maya Studies*, edited by Diane Z. Chase and Arlen F. Chase

**Historical and Archaeological Perspectives on the Itzas of Petén, Guatemala** Prudence M. Rice, Don S. Rice, 2018-03-01 *Historical and Archaeological Perspectives on the Itzas of Petén, Guatemala* is the first exhaustively detailed and thorough account of the Itzas—a Maya group that dominated much of the western lowland area of tropical forest, swamps, and grasslands in Petén, Guatemala. Examining archaeological and historical evidence, Prudence Rice and Don Rice present a theoretical perspective on the Itzas' origins and an overview of the social, political, linguistic, and environmental history of the area; explain the Spanish view of the Itzas during the Conquest; and explore the material culture of the Itzas as it has been revealed in recent surveys and excavations. The long but fragmented history of the Petén Itzas requires investigation across multiple periods and regions. Chapters in this six-part overview interweave varying data pertaining to this group—archaeological, artifactual, indigenous textual, Spanish historical—from multiple languages and academic fields, such as anthropology, archaeology, linguistics, ecology, and history. Part I introduces the lowland Itzas, northern and southern, with an emphasis on those of the central Petén lakes area. Part II discusses general Itza origins and identities in the Epiclassic period, while part III reviews Spanish perceptions and misconceptions of the Petén Itzas in their Contact-period writings. With these temporal anchors, parts IV and V present the archaeology and artifacts of the Petén Itzas, including pottery, architecture, and arrow points, from varied sites and excavations but primarily focusing on the island capital of Tayza/Nojpetén. Part VI summarizes key data and themes of the preceding chapters for a new understanding of the Petén Itzas. A companion volume to *The Kowoj*—a similar treatment of the Petén Itzas' regional neighbors—*Historical and Archaeological Perspectives on the Itzas of Petén, Guatemala* demonstrates the unique physical, cultural, and social

framework that was home to the Petén Itza, along with their backstory in northern Yucatán. Archaeologists, historians, art historians, and geographers who specialize in the Maya and the Postclassic, Contact, and Colonial periods will find this book of particular interest. *Unseen Art* Claudia Brittenham, 2023-01-17 In *Unseen Art*, Claudia Brittenham unravels one of the most puzzling phenomena in Mesoamerican art history: why many of the objects that we view in museums today were once so difficult to see. She examines the importance that ancient Mesoamerican people assigned to the process of making and enlivening the things we now call art, as well as Mesoamerican understandings of sight as an especially godlike and elite power, in order to trace a gradual evolution in the uses of secrecy and concealment, from a communal practice that fostered social memory to a tool of imperial power. Addressing some of the most charismatic of all Mesoamerican sculptures, such as Olmec buried offerings, Maya lintels, and carvings on the undersides of Aztec sculptures, Brittenham shows that the creation of unseen art has important implications both for understanding status in ancient Mesoamerica and for analyzing art in the present. Spanning nearly three thousand years of the Indigenous art of Mexico, Guatemala, Honduras, and Belize, *Unseen Art* connects the dots between vision, power, and inequality, providing a critical perspective on our own way of looking.

*Painting the Skin* Élodie Dupey García, María Luisa Vázquez de Ágredos Pascual, 2019-06-11 Mesoamerican communities past and present are characterized by their strong inclination toward color and their expert use of the natural environment to create dyes and paints. In pre-Hispanic times, skin was among the preferred surfaces on which to apply coloring materials. Archaeological research and historical and iconographic evidence show that, in Mesoamerica, the human body—alive or dead—received various treatments and procedures for coloring it. *Painting the Skin* brings together exciting research on painted skins in Mesoamerica. Chapters explore the materiality, uses, and cultural meanings of the colors applied to a multitude of skins, including bodies, codices made of hide and vegetal paper, and even building “skins.” Contributors offer physicochemical analysis and compare compositions, manufactures, and attached meanings of pigments and colorants across various social and symbolic contexts and registers. They also compare these Mesoamerican colors with those used in other ancient cultures from both the Old and New Worlds. This cross-cultural perspective reveals crucial similarities and differences in the way cultures have painted on skins of all types. Examining color in Mesoamerica broadens understandings of Native religious systems and world views. Tracing the path of color use and meaning from pre-Columbian times to the present allows for the study of the preparation, meanings, social uses, and thousand-year origins of the coloring materials used by today’s Indigenous peoples. **Western Mesoamerican Calendars and Writing Systems** Mikkel Bøg Clemmensen, Christophe Helmke, 2023-06-08  
Mesoamerica is one of the few places to witness the independent invention of writing. Bringing together new research, papers discuss the writing systems of Teotihuacan, Mixteca Baja, the Epiclassic period and Aztec writing of the Postclassic. These writing systems represent more than a millennium of written records and literacy in Mesoamerica.

**Mesoamerican Architecture as a Cultural Symbol** Jeff Karl Kowalski, 1999 In this collection, prominent scholars provide new interpretations and useful syntheses of many of the most significant Mesoamerican architectural traditions from the Preclassic to the Postclassic periods. The essays examine the built environment as a carrier of cultural meanings. The many pyramid-temples, palaces, and ballcourts comprising Mesoamerican centers were constructed in the context of hierarchical societies, and provided monumental expressions of elite authority. The design of individual buildings, as well as the layout of site plans, often embodied Mesoamerican beliefs about the structure of the cosmos, natural forces, or the numinous power of landscape forms, thus providing sanction for the sociopolitical order.
