*Power and Place in Etruria: Volume 1* Simon Stoddart,2020-10-08 This volume fills a gap in the study of an important, yet neglected case of state formation, by taking a landscape perspective to Etruria. Simon Stoddart examines the infrastructure, hierarchy/heterarchy and spatial patterns of the Etruscans over time to investigate their political development from a new perspective. The analysis both crosses the divide from prehistory to history and applies a scaled analysis to the whole region between the Tyrrhenian Sea and the Arno and Tiber rivers, with special focus on the neglected region between Populonia on the coast and Perugia and the north Umbrian region adjoining the Apennines. Stoddart uncovers the powerful places that were in dynamic tension not only between themselves, but also with the internal structure constituted by the descent groups that peopled them. He unravels the dynamically changing landscape of changing boundaries and buffer zones which contained robust urbanism, as well as less centralized, polyfocal nucleations.

**Power and Place in Etruria** Simon Stoddart,2020-10-08 This book reconstructs political history from the spatial organization of ancient society, challenging the approach favored by classicists.

World of Possibilities Charles F. Sabel,Jonathan Zeitlin,2002-05-16 This book retells the history of Western industrialization, revealing possibilities unexplored in the nineteenth century, variants of which have come to transform present day economies. It shows that economic actors have historically been more aware of the great strategic choices they faced than standard theory credits them with being, and this surprising acuity allows them to imagine and put into practice solutions which current theories of industrial organization have scarcely anticipated. The book is therefore at one and the same time a contribution to a substantive revision of the history of mechanized production and a propaedeutic in a form of explanation that approximates the knowledge of the actor to the knowledge of the theorist. The volume groups essays

presented by a multinational team of historians and social scientists drawing on intensive primary research on a wide range of firms, regions, sectors and national economies in Western Europe and the United States from the eighteenth century to the 1990s.
