This text is about young Australians in the 21st Century. It takes a sociological lens to the youth phenomena across a broad range of themes and topics, focusing on youth as they interact in their communities. Young people are viewed living and interacting with their families, age peers, friends and lovers in their local and virtual communities. The text emphasises the different experiences of specific cohorts of youth interacting with education, the labour force and a range of social institutions. Cultural practices of youth, including the consumption and creative use of popular culture, are considered. *Australian Youth* takes the view that young Australians in the 21st century face different challenges to previous generations, and are actively devising new ways of managing risk and social complexity.

*The Routledge International Handbook of Forensic Intelligence and Criminology* Quentin Rossy, David Décary-Héty, Olivier Delémont, Massimiliano Mulone, 2017-12-06 Despite a shared focus on crime and its 'extended family', forensic scientists and criminologists tend to work in isolation rather than sharing the data, methods and knowledge that will broaden the understanding of the criminal phenomenon and its related subjects. Bringing together perspectives from international experts, this book explores the intersection between criminology and forensic science and considers how knowledge from both fields can contribute to a better understanding of crime and offer new directions in theory and methodology. This handbook is divided into three parts: Part I explores the epistemological and historical components of criminology and forensic science, focusing on their scientific and social origins. Part II considers how collaboration between these disciplines

can bring about a better understanding of the organizations and institutions that react to crime, including the court, intelligence, prevention, crime scene investigation and policing. Part III discusses the phenomena and actors that produce crime, including a reflection on the methodological issues, challenges and rewards regarding the sharing of these two disciplines. The objective of this handbook is to stimulate a 'new' interdisciplinary take on the study of crime, to show how both forensic and criminological theories and knowledge can be combined to analyse crime problems and to open new methodological perspectives. It will be essential reading for students and researchers engaged with forensic science, criminology, criminal behaviour, criminal investigation, crime analysis and criminal justice.
