The New Map Daniel Yergin,2021-09-14 A Wall Street Journal bestseller and a USA Today Best Book of 2020 Named Energy Writer of the Year for The New Map by the American Energy Society “A master class on how the world works.” —NPR Pulitzer Prize-winning author and global energy expert, Daniel Yergin offers a revelatory new account of how energy revolutions, climate battles, and geopolitics are mapping our future The world is being shaken by the collision of energy, climate change, and the clashing power of nations in a time of global crisis. Out of this tumult is emerging a new map of energy and geopolitics. The “shale revolution” in oil and gas has transformed the American economy, ending the “era of shortage” but introducing a turbulent new era. Almost overnight, the United States has become the world's number one energy powerhouse. Yet concern about energy's role in climate change is challenging the global economy and way of life, accelerating a second energy revolution in the search for a low-carbon future. All of this has been made starker and more urgent by the coronavirus pandemic and the economic dark age that it has wrought. World politics is being upended, as a new cold war develops between the United States and China, and the rivalry grows more dangerous with Russia, which is pivoting east toward Beijing. Vladimir Putin and China's Xi Jinping are converging both on energy and on challenging American leadership, as China projects its power and influence in all directions. The South China Sea, claimed by China and the world's most critical trade route, could become the arena where the United States and China directly collide. The map of the Middle East, which was laid down after World War I, is being challenged by jihadists, revolutionary Iran, ethnic and religious clashes, and restive populations. But the region has also been shocked by the two recent oil price collapses--and by the very question of oil's future in the rest of this century. A master storyteller and global energy expert, Daniel Yergin takes the reader on an utterly riveting and timely journey across the world's new map. He illuminates the great energy and geopolitical questions in an era of rising political turbulence and points to the profound challenges that lie ahead.

Mapping Chinese Investment in South Asia Rahul Nath Choudhury,2023-04-25 This book attempts to capture the tremendous growth in Chinese investment in the South Asian region in the recent past. It makes country-wise analysis of the factors that led to the growth of Chinese investment in the region and explores the nature and role of such investment in expanding trade in the region. It also discusses in detail the Chinese infrastructure investment through Belt and Road Initiative (BRI). Interestingly, despite being the major investor in several countries, Chinese investment has been seen with

some level of doubt. Apprehension about Chinese investment has forced countries to suspend China-funded projects or amend their investment policies. This book tries to address these crucial issues while exploring and analyzing the causes and effects of the same.

China and the WTO Henry Gao, Damian Raess, Ka Zeng, 2023-09-28 Examining the twenty years since China acceded to the World Trade Organization, this collection provides an original, systematic assessment of the opportunities and challenges that China has presented to the WTO. Offering in-depth analyses of the 'two-way' relationship between China and the WTO, the contributions explore a range of key issues from the varied effects of WTO membership for China and the global economy to the responses of the WTO members to China's rapid economic growth. It presents diverse perspectives of leading scholars from multiple disciplines, including law, economics, political science, and international relations, as well as practical insights from senior policymakers from both China and the United States. This is an invaluable contribution to ongoing debates about the implications of the rise of China for global economic governance and enriches discussions of the wide-ranging implications of China's growing integration into the multilateral trading system, both now and in the future. This title is also available as Open Access on Cambridge Core.

Reframing the Buffer State in Contemporary International Relations Bibek Chand, 2023-05-17 This book explores buffer states' agency beyond being highly interactive spaces for the competing strategic and security interests of larger powers. Analyzing 21 political events, the author offers a new conceptual framework for the buffer state, which emphasizes strategic utility and agency. Applying this to the case study of Nepal as a buffer state between India and China, he offers a systematic analysis of Sino-Indian interests in the wider region, and Nepal's interactions with and reactions to them, and argues that the buffer state in contemporary international relations is characterized by intense competitive overtures from its contending neighboring states. However, the buffer state is not just a spectator but an active participant that consistently assesses and reassesses its geopolitical position in between much larger competing powers. This reading offers a new understanding of the buffer state as a highly dynamic political space wherein the levels of influence and strategies of bigger powers can be examined. Aimed at a multidisciplinary audience, this book will be of particular interest to scholars, practitioners and students of international relations, security studies, strategic studies, and Asian Studies.

South Asia and China Adluri Subramanyam Raju, 2021-10-05 This book brings together new perspectives on China's engagement with South Asian countries. It examines emerging trends in the ties between China and South Asia in the geo-political, geo-strategic and geo-economics context and looks at opportunities for collaboration and connectivity between them. Drawing on extensive case studies, this volume discusses issues such as China's overarching Belt Road Initiative (BRI), regional responses and alternatives to BRI, the new politico-economic drivers in the region, India's China puzzle, the Wuhan informal summit, Nepal and its security dilemma in the region and China's role in peace and stability in Afghanistan. It

presents analysis, debates and the way forward for a comprehensive South Asian regional understanding in the wake of the advancing Chinese presence in South Asia. An important contribution in the study of the developing pan China-South Asia vision, this book will be of interest to scholars and researchers of international relations, Chinese studies, Asian studies, defence and strategic studies, regional cooperation, foreign policy, geopolitics, comparative politics and political studies.

China's Engagement with the Islamic Nations Young-Chan Kim, 2023-06-02 This book provides a critical insight into China's evolving socio-cultural relations with Islamic countries in the face of growing geopolitical uncertainty. It considers both the historical and socioeconomic aspects of China-Islamic countries relations to present a balanced analysis of the effectiveness of the Belt and Road Initiative (BRI) plan and the current and future evolution of cooperation. The book also sheds new light of the impact on individual economic sectors, considering both the micro- and macro-effects on various stakeholders as the global community navigates an increasingly precarious power struggle between dominant world powers. The book presents contributions from a variety of fields to provide a multi-faceted breakdown of the challenges that remain for the myriad of relationships in the years to come.

The PLA Beyond Borders Joel Wuthnow, 2021 No longer confined to China's land territory or its near abroad, the People's Liberation Army (PLA) is conducting increasingly complex operations farther and farther from China's continental borders. Within Asia, the PLA now regularly operates into the far reaches of the South China Sea and deep into the Western Pacific, enforcing China's territorial claims and preparing to counter U.S. intervention in a regional conflict. Beyond Asia, the PLA is

present on the ground, at sea, or in military exercises with foreign partners across the Indian Ocean and into the Middle East, Africa, and Europe. Foreign militaries now regularly encounter the PLA, whether in tense incidents or friendly contacts, on their home turf and in the global commons. Drawn from a 2019 conference jointly organized by NDU, the RAND Corporation, and Taiwan's Council on Advanced Policy Studies, *The PLA Beyond Borders* surveys the dimensions of Chinese operations within the Indo-Pacific region and globally. The international contributors look both at the underlying enablers of these activities, including expeditionary capabilities and logistics, command and control, and ISR systems, as well as new and evolving operational concepts and operational patterns. Employing different analytic lenses, they portray a reformed PLA accelerating the pace of its overseas operations and increasing its modernization not only in the traditional domains, but also in space and cyber. -- Publisher's description.

Despite its central place in the African Union's Agenda 2063 and plans to establish a continental free trade area, there remain many political, economic and institutional challenges to deeper integration and effective implementation of regional trade agreements.A Handbook on Regional Integration in Africa: Towards Agenda 2063 provides a ready and accessible resource for trade policy-makers, parliamentarians, the private sector, academia and civil society, as well as the general public.
