Global Gothic Barbara Borngässer, Bruno Klein, 2022-02-17 Gothic style and contemporary architecture worldwide Although largely overlooked in studies of architectural history, church architecture in a Gothic idiom outlived its 19th century momentum to persist worldwide throughout the 20th century and into the new millennium. Global Gothic presents a first systematic worldwide understanding of Gothic in contemporary architecture, both as a distinct variation and as a competitor to recognized modern styles. The book's chapters critically discuss Gothic's various manifestations over the past century, describing and illustrating approaches from Gothic Revival living traditions in the former British Empire and original Gothic appropriation in Latin America to competitions of European builders in former Asian and African colonies. The focus is also on the special appropriations in North America, China and Japan, as well as contemporary solutions that tend to be transnational in style. With contributions from renowned architecture experts from around the world, Global Gothic provides an overview of this cultural phenomenon and presents a wealth of stunning material, much of it little known. Richly illustrated in full color, it offers an important contribution to colonial and postcolonial global art history and a seldom acknowledged perspective on art history in general. Contributors: Barbara Borngässer (Technische Universität Dresden), Martín M. Checa-Artasu (Metropolitan Autonomous University, Mexico City), Thomas Coomans (KU Leuven), Pedro Guedes (University of Queensland), Bruno Klein (Technische Universität Dresden), Bettina Marten (Technische Universität Dresden), Olimpia Niglio (Hosei University Tokyo), Peter Scriver (University of Adelaide), Amit Srivastava (University of Adelaide) This publication is GPRC-labeled (Guaranteed Peer-Reviewed Content).

Architectural Agents Annabel Jane Wharton, 2015-02-15 Buildings are not benign; rather, they commonly manipulate and abuse their human users. Architectural Agents makes the case that buildings act in the world independently of their makers, patrons, owners, or occupants. And often they act badly. Treating buildings as bodies, Annabel Jane Wharton writes biographies of symptomatic structures in order to diagnose their pathologies. The violence of some sites is rooted in historical trauma; the unhealthy spatial behaviors of other spaces stem from political and economic ruthlessness. The places examined range from the Cloisters Museum in New York City and the Palestine Archaeological Museum (renamed the Rockefeller Museum) in Jerusalem to the grand Hostal de los Reyes Católicos in Santiago de Compostela, Spain, and Las Vegas casino resorts. Recognizing that a study of pathological spaces would not be complete without an investigation of digital structures, Wharton integrates into her argument an original consideration of the powerful architectures of video games and immersive worlds. Her work mounts a persuasive critique of popular phenomenological treatments of architecture. Architectural Agents advances an alternative theorization of buildings' agency—one rooted in buildings' essential materiality and historical formation—as the basis for her significant intervention in current debates over the boundaries separating humans, animals, and machines.
