**Ertuğrul Sevsay**

**Mendelssohn and His World** R. Larry Todd, 2005 In the first major Mendelssohn biography to appear in decades, R. Larry Todd offers a remarkably fresh account of this musical giant, based upon painstaking research in autograph manuscripts, correspondence, diaries, and paintings. Todd reexamines the composer's entire oeuvre, including many unpublished and little known works, and explores how the composer's personal life affected his work. *Mendelssohn: A Life* offers a masterful blend of biography and musical analysis. Readers will discover many new facets of the familiar but misunderstood composer and gain new perspectives on one of the most formidable musical geniuses of all time.

**Music and Fantasy in the Age of Berlioz** Francesca Brittan, 2017-09-14 An exploration of fantastic soundworlds in nineteenth-century France, providing a fresh aesthetic and compositional context for Berlioz and others.

**The Cambridge Guide to Orchestration** Ertuğrul Sevsay, 2013-04-25 Demonstrating not only how to write for orchestra but also how to understand and enjoy a score, *The Cambridge Guide to Orchestration* is a theoretical and practical guide to instrumentation and orchestration for scholars, professionals and enthusiasts. With detailed information on all the instruments of the orchestra, both past and present, it combines discussion of both traditional and modern playing techniques to give the most complete overview of the subject. It contains fifty reduced scores to be re-orchestrated and a wide range of exercises, which clarify complex subjects such as multiple stops on stringed instruments, harmonics and trombone glissandi. Systematic analysis reveals the orchestration techniques used in original scores, including seven twentieth-century compositions. This Guide also includes tables and lists for quick reference, providing the ranges of commonly used instruments and the musical names and terminology used in English, German, Italian and French.

**Once a Week Library: Chords and dischords, by O. Schubin** , 1894

**Curtain, Gong, Steam** Gundula Kreuzer, 2018-05-18 In this innovative book, Gundula Kreuzer argues for the foundational role of technologies in the conception, production, and study of nineteenth-century opera. She shows how composers increasingly incorporated novel audiovisual effects in their works and how the uses and meanings of the required apparatuses changed through the twentieth century, sometimes still resonating in stagings, performance art, and popular culture today. Focusing on devices (which she dubs "Wagnerian technologies") intended to amalgamate opera's various media while veiling their mechanics, Kreuzer offers a practical counternarrative to Wagner's idealist theories of total

illusionism. At the same time, *Curtain, Gong, Steam's* multifaceted exploration of the three titular technologies repositions Wagner as catalyst more than inventor in the history of operatic production. With its broad chronological and geographical scope, this book deepens our understanding of the material and mechanical conditions of historical operatic practice as well as of individual works, both well known and obscure.

**The Instrumentalist** Traugott Rohner, 2007 The magazine for school band and orchestra directors.

Stefan Wolpe and the Avant-Garde Diaspora Brigid Cohen, 2012-09-13 The German-Jewish émigré composer Stefan Wolpe was a vital figure in the history of modernism, with affiliations ranging from the Bauhaus, Berlin agitprop and the kibbutz movement to bebop, Abstract Expressionism and Black Mountain College. This is the first full-length study of this often overlooked composer, launched from the standpoint of the mass migrations that have defined recent times. Drawing on over 2000 pages of unpublished documents, Cohen explores how avant-garde communities across three continents adapted to situations of extreme cultural and physical dislocation. A conjurer of unexpected cultural connections, Wolpe serves as an entry-point to the utopian art worlds of Weimar-era Germany, pacifist movements in 1930s Palestine and vibrant art and music scenes in early Cold War America. The book takes advantage of Wolpe's role as a mediator, bringing together perspectives from music scholarship, art history, comparative literature, postcolonial studies and recent theories of cosmopolitanism and diaspora.

**The Art of Music** Daniel Gregory Mason, 1916

Xenakis James Harley, 2004 Harley approaches the music from the point of view of a musician; his thesis rests upon the conviction that Xenakis's theoretical formulations can be explained and understood without recourse to complicated mathematics. The scientific tendency of the composer's own explications of his work has baffled and often alienated many who have responded strongly to the music. Harley's book allows the interested student and scholar to delve deeply into the music while explaining the structures and theories that inform them in easy-to-understand terms. The book concludes with an up-to-date bibliography, discography, and a list of works.--BOOK JACKET.
