The Meaning of Life Richard Kinnier, Jerry Kernes, Nancy Tribbensee, Tina Van Puymbroeck, 2006 Since ancient times people have questioned the meaning of life. It has been a source of inspiration and motivation, frustration and puzzlement. Some have dedicated their lives to seeking an answer, others have dismissed it as an impossible quest. Some look inwards, believing that the meaning of life is to seek happiness, self-fulfilment or wisdom. Others look beyond themselves, hoping to contribute to society and help others. Some believe life is about serving God, others think it is just a joke. A few conclude that life has no meaning at all. Profound and thought-provoking, light-hearted and witty, here are 250 quotations from eminent people, expressing their thoughts on the eternal question.

Emotional Well-being and Mental Health Digby Tantam, 2014-09-08 Well-being is an important topic for many different professions. From health professionals to politicians, a number of fields seek to research, understand and promote wellbeing. As a concept at the heart of psychotherapeutic practice, it is essential that trainee and practising therapists understand the distinctive contribution to our understanding of well-being that each of these professions have made. In this unique text, author Digby Tantam explores the philosophical, political, economical, psychological, medical and spiritual perspectives on well-being through a psychotherapeutic lens, explaining current research data and summarising findings. Theoretical approaches are balanced with an insight into their practical applications, showing therapists how each approach can inform their practice and make a real difference to the life satisfaction and health of their clients.

Absurdity and Meaning in Contemporary Philosophy and Jewish Thought Alan L. Mittleman, 2023-11-02 There is a lively discussion in contemporary philosophy that explores the meaning of life or, more modestly, meaning in life. Philosophers, for the most part, assume that religion has little to contribute to this inquiry. They believe that the Western religions, such as Judaism, have doctrinaire beliefs which have become implausible and can no longer satisfy the search for meaning. In this book, Alan L. Mittleman argues that this view is misconceived. He offers a presentation of core Jewish beliefs by using classical and contemporary texts that address the question of the meaning of life in a philosophical spirit. That spirit includes profound self-questioning and self-criticism. Such beliefs are not doctrinaire: Jewish sources, such as the biblical Book of Ecclesiastes, are, in fact, open to an absurdist reading. Mittleman demonstrates that both philosophy and Judaism are prone to ineliminable doubts and perplexities. Far from pre-empting a conversation, they promote honest

dialogue.

Adolescents in the Search for Meaning Mary L. Warner, 2006-03-03 As is painfully evident from the reports of school shootings, gang violence, dysfunctional family life, and from statistics on adolescent suicide, many teens live troubled lives. Even those who live a normal life still face the challenges adults face, but teens are also engaged in establishing independence and finding their identity. However, few adolescents have the same resources as adults for surviving life challenges. Building from the idea that story is a powerful source of meaning, particularly those stories that resonate with our own lives, this book suggests that the stories of other young adults offer a resource yet to be fully tapped. Adolescents in the Search for Meaning begins from the perspective of young adults by sharing the results of a survey of over 1400 teens and also includes the insights of authors of Young Adult Literature. The book presents over 120 novels that teens have identified as meaningful as well as books recommended by YA authors and experts in the field of YA literature. For any teacher, librarian, parent or counselor wanting to reach young adults, this book is ideal.

Identity and Change in the Christian Tradition Marcel Sarot, Gijsbert van den Brink, 1999 In at least two respects the position of religion and Christianity in the Western world has changed in recent years. Firstly, there is a growing plurality of and pluriformity within religions. And secondly, religions tend to change and develop faster and on a larger scale than they used to. This gives rise to the questions of change and continuity of religious traditions addressed in this volume: What function does the conceptual system or 'language game' of religion fulfil within the context of human thought and life? In what ways and under what circumstances do such conceptual systems require innovative changes in order to remain adequate for fulfilling this function? How are the continuity and change within religious traditions related to these issues? What is the nature of this continuity and of such changes within traditions? What role can theology play in initiating and directing such changes? In answering these questions, most contributions to the present volume focus on the Christian tradition.
