The Routledge Companion to Mobile Media Gerard Goggin, Larissa Hjorth, 2014-05-09 The last decade has witnessed the rise of the cell phone from a mode of communication to an indispensable multimedia device, and this phenomenon has led to the burgeoning of mobile communication studies in media, cultural studies, and communication departments across the academy. The Routledge Companion to Mobile Media seeks to be the definitive publication for scholars and students interested in comprehending all the various aspects of mobile media. This collection, which gathers together original articles by a global roster of contributors from a variety of disciplines, sets out to contextualize the increasingly convergent areas surrounding social, geosocial, and mobile media discourses. Features include: comprehensive and interdisciplinary models and approaches for analyzing mobile media; wide-ranging case studies that draw from this truly global field, including China, Africa, Southeast Asia, the Middle East, and Latin America, as well as Europe, the UK, and the US; a consideration of mobile media as part of broader media ecologies and histories; chapters setting out the economic and policy underpinnings of mobile media; explorations of the artistic and creative dimensions of mobile media; studies of emerging issues such as ecological sustainability; up-to-date overviews on social and locative media by pioneers in the field. Drawn from a range of theoretical, artistic, and cultural approaches, The Routledge Companion to Mobile Media will serve as a crucial reference text to inform and orient those interested in this quickly expanding and far-reaching field.

Communication, Digital Media and Everyday Life Tony Chalkley,Mitchell Hobbs,Adam Brown,Toija Cinque,Brad Warren,Mark Finn,2015 *Communication, Digital Media and Everyday Life* (Second Edition) uses stories to explain the journey from 'new media in communication' to 'digital media is communication' and provide a clear introduction to communication and media theory and practice. For Generations Y and Z, digital media is now embedded into most aspects of daily life and integrated into contemporary communication as much as speaking, reading and writing. This book encourages readers to understand how they use 'new' media to do 'old' things and explores how concepts of communication, digital media and everyday life intersect with one another. The first section part of the book introduces the building blocks of communication; its basic tools, devices and approaches. The second section part takes these ideas and concepts in the first part and applies them to 'new' media: it considers including ideology in film and television; organisational communication; and values in the new digital world; and how identity, privacy, deception and truth have been redefined. The third part section part looks at communication today-including the redefinition of identity, privacy, deception and truth- and explores what it might be like to live in an increasingly digital world.

Communication Traditions in 20th-century Australia Graeme Osborne,Glen Lewis,1995 *Communication Traditions in 20th Century Australia* examines the idea of communication in terms of an earlier Australian preoccupation with the conquest of distance, which is being replaced by concern over the social effects of Australia's 'new' proximity to Asia and its increasing multiculturalism and gender consciousness. The book discusses the changing nature of people's concepts of communication throughout the century, and looks at what might happen in the future.

Public Communication in the European Union Chiara Valentini,Giorgia Nesti,2010 This book is a collection of essays that analyse and discuss EU information and communication policies and activities towards, with, by different publics developed both by the EU institutions at the European, national and local levels and by public organizations and civil society actors. Throughout six thematic parts, the authors examine from different theoretical perspectives (political communication, journalism, public relations and public diplomacy, political science, and cultural studies) and reflect on what it means for the European Union to communicate in multi-national and multi-cultural settings. The originality and strength of this book stand on the capacity to discuss EU communication policies, strategies and actions in their diverse features and, at the same time, to have a clear general picture of the role and function that communication has within the European Union's governance. The combination of different theoretical frameworks with the latest empirical research findings makes this book a fresh and fascinated collection of insights of what the European Union can achieve with strategic communications.
