**The Harvard Dictionary of Music** Don Michael Randel,2003-11-28 This classic reference work, the best one-volume music dictionary available, has been brought completely up to date in this new edition. Combining authoritative scholarship and lucid, lively prose, the Fourth Edition of The Harvard Dictionary of Music is the essential guide for musicians, students, and everyone who appreciates music. The Harvard Dictionary of Music has long been admired for its wide range as well as its reliability. This treasure trove includes entries on all the styles and forms in Western music; comprehensive articles on the music of Africa, Asia, Latin America, and the Near East; descriptions of instruments enriched by historical background; and articles that reflect today's beat, including popular music, jazz, and rock. Throughout this Fourth Edition, existing articles have been fine-tuned and new entries added so that the dictionary fully reflects current music scholarship and recent developments in musical culture. Encyclopedia-length articles by notable experts alternate with short entries for quick reference, including definitions and identifications of works and instruments. More than 220 drawings and 250 musical examples enhance the text. This is an invaluable book that no music lover can afford to be without.

*Ars nova* JohnL. N?s,2017-07-05 In the early fourteenth century, musicians in France and later Italy established new traditions of secular and sacred polyphony. This ars nova, or new art, popularized by theorists such as Philippe de Vitry and Johannes de Muris was the among the first of many later movements to establish the music of the present as a clean break from the past. The rich music of this period, by composers such as Guillaume de Machaut and Francesco Landini, is not only

beautiful, but also rewards deep study and analysis. Yet contradictions and gaps abound in the ars nova of the fourteenth and early fifteenth centuries-how do we read this music? how do we perform this music? what was the cultural context of these performances? These problems are well met by the ingenuity of approaches and solutions found by scholars in this volume. The twenty-seven articles brought together reflect the broad methodological and chronological range of scholarly inquiry on the ars nova.

**Medieval Music-Making and the Roman de Fauvel** Emma Dillon,2002-10-07 Publisher Description

**Music in the Middle Ages and the Renaissance** Harold Gleason,Warren Becker,1981 This is a complete revision of the second edition, designed as a guide and resource in the study of music from the earliest times through the Renaissance period. The authors have completely revised and updated the bibliographies; in general they are limited to English language sources. In order to facilitate study of this period and to use materials efficiently, references to facsimiles, monumental editions, complete composers' works and specialized anthologies are given. The authors present this systematic organization in this volume in the hope that students, teachers, and performers may find in it a ready tool for developing a comprehensive understanding of the music of this period.

**The Middle Ages** Frank N. Magill,2012-11-12 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who. Instead, each entry provides an in-depth essay on the life and career of the individual concerned. Essays commence with a quick reference section that provides basic facts on the individual's life and achievements. The extended biography places the life and works of the individual within an historical context, and the summary at the end of each essay provides a synopsis of the individual's place in history. All entries conclude with a fully annotated bibliography.

Ars Nova John Louis Nádas,Michael Scott Cuthbert,2009 In the early fourteenth century, musicians in France and later Italy established new traditions of secular and sacred polyphony. This ars nova, or 'new art', popularized by theorists such as Philippe de Vitry and Johannes de Muris was the among the first of many later movements to establish the music of the present as a clean break from the past. The twenty-seven articles brought together here reflect the broad methodological and chronological range of scholarly inquiry on the ars nova.

*Routledge Revivals: Medieval France (1995)* William W. Kibler,Grover A. Zinn,2017-07-05 First published in 1995, *Medieval France: An Encyclopedia* is the first single-volume reference work on the history and culture of medieval France. It covers the political, intellectual, literary, and musical history of the country from the early fifth to the late fifteenth century. The shorter entries offer succinct summaries of the lives of individuals, events, works, cities, monuments, and other important subjects, followed by essential bibliographies. Longer essay-length articles provide interpretive comments about significant institutions and important periods or events. The Encyclopedia is thoroughly cross-referenced and includes a

generous selection of illustrations, maps, charts, and genealogies. It is especially strong in its coverage of economic issues, women, music, religion and literature. This comprehensive work of over 2,400 entries will be of key interest to students and scholars, as well as general readers.

**Music as Concept and Practice in the Late Middle Ages** Reinhard Strohm, Bonnie J. Blackburn, 2001 'Music as Concept and Practice in the Late Middle Ages' is an entirely new addition to the New Oxford History of Music series rather than a revision of the volume's predecessor published in 1960. It takes account not only of the developments in late-medieval music scholarship during the latter decades of the twentieth century, but also of the experience gained through significant changes in the performance practice of the late-medieval repertory witnessed during this period. All the chapters include areas of discussion whose coverage in the series hitherto has been either wholly lacking or, at best, marginal: Muslim and Jewish musical traditions of the Middle Ages, late-medieval office chant, medieval dance music, musical instruments in society, music in Central and Eastern Europe, music theory of the fourteenth and fifteenth centuries, music and early Renaissance humanism. The first chapter and the last three present the conceptualization of music in speculative theory, philosophy, compositional and didactic practice, and musical historiography. Four chapters, and part of the first, illustrate important musical repertoires and genres as they were developed within diverse societies. The eight authors - all of them with a long-standing interest in their respective subjects - have created through their collaboration a blend of mature scholarship and original investigation. The volume's novelty of approach and content is complemented by a firm anchorage in the specialist literature and documentary source material. Today, no single view of 'the Middle Ages' can be acceptable to the musician or to the historian. The present volume, which addresses itself to both, provides solid information on formerly marginal themes, and advocates further exploration of the 'other' Middle Ages.

**The Oxford History of Music** Harry Ellis Wooldridge, 1905

Music Theory from Boethius to Zarlino David Russell Williams, C. Matthew Balensuela, 2007 Music Theory from Boethius to Zarlino is a companion volume to Music Theory from Zarlino to Schenker: A Bibliography and Guide by David Damschroder and David Russell Williams (Harmonologia, No. 4, Pendragon Press). Like the previous work, the goal of the volume is to create a logically organized introduction to the major theorists of the time and a thorough review of the scholarly work about these writers. While specialists in the history of music theory may find new materials in these pages, this work is primarily designed for the non-specialist as a practical and basic introduction to the treatises, people, and scholarship of Medieval and Renaissance theory. BR> Winner of the Vincent H. Duckles Award from the Music Library

Association, 2009.

**Revisiting the Music of Medieval France** Manuel Pedro Ferreira, 2023-05-31 This book presents together a number of path-breaking essays on different aspects of medieval music in France written by Manuel Pedro Ferreira, who is well known for his work on the medieval cantigas and Iberian liturgical sources. The first essay is a tour-de-force of detective work: an odd E-flat in two 16th-century antiphoners leads to the identification of a Gregorian responsory as a Gallican version of a seventh-century Hispanic melody. The second rediscovers a long-forgotten hypothesis concerning the microtonal character of some French 11th-century neumes. In the paper *Is it polyphony?* an even riskier hypothesis is arrived at: Do the origins of Aquitanian free organum lie on the instrumental accompaniment of newly composed devotional versus? The Cistercian attitude towards polyphonic singing, mirrored in musical sources kept in peripheral nunneries, is the subject of the following essay. The intellectual and sociological nature of the Parisian motet is the central concern of the following two essays, which, after a survey of concepts of temporality in the trouvère and polyphonic repertoires, establish it as the conceptual foundation of subsequent European schools of composition. It is possible then to assess the real originality of Philippe de Vitry and his *Ars nova*, which is dealt with in the following chapter. A century later, the role of Guillaume Dufay in establishing a chord-based alternative to contrapuntal writing is laboriously put into evidence. Finally, an informative synthesis is offered concerning the mathematical underpinnings of musical composition in the Middle Ages.
