The Queen of All Viruses Jonni Jordyn, 2025-05-15 The digital intelligence Odyssey returns to his homeworld to find all the biological lifeforms gone with a social structure designed to keep a few digital beings in power with most of the world under their control. They view his arrival as a threat and attack him. Even though their attack he is invulnerable to their attack, one of them risks her life to protect him. A Critical Companion to Steven Spielberg Adam Barkman, Antonio Sanna, 2019-07-08 A Critical Companion to Steven Spielberg offers a comprehensive, detailed study of the works of Steven Spielberg. Spielberg's early productions stand as landmarks in contemporary cinema, and his involvement with film spans all cinematic genres. Today, Spielberg enjoys an immense and enduring popularity around the globe, and his productions have attracted (and continue to attract) both public and critical attention. This book investigates several distinct areas of Spielberg's works and addresses the different approaches and the range of topics invited by the multidimensionality of his oeuvre. The eighteen chapters in this book use different methodologies, offering a variegated and compelling picture of Spielberg's films, from his earliest works such as *Duel* (1971) and *The Sugarland Express* (1974) to his most recent productions, such as *The BFG* (2016), *The Post* (2017), and *Ready Player One* (2018).

The Shortest History of AI Toby Walsh, 2025-11-04 A timely addition to the Shortest History series from a world-leading AI researcher: The history of the development of artificial intelligence told through its six essential animating ideas Since Alan Turing first posed the question "Can machines think?" artificial intelligence has evolved from a speculative idea to a transformative force. The Shortest History of AI traces this evolution, from Ada Lovelace's visionary work to IBM's groundbreaking defeat of the chess world champion and the revolutionary emergence of ChatGPT. Revealing how many "overnight" successes were decades in the making, this accessible and illuminating book tells AI's history through the six main ways it functions: It uses symbols to represent common concepts and ideas. It chooses its best possible move based on the information it is given. It simulates human expertise by following simple rules. It learns based on its past experiences. It assesses its mistakes and learns to avoid making them again in the future. It computes probability based on the evidence it's provided with. Fast-paced and rich with facts, The Shortest History of AI explores how artificial intelligence is being

created—and how it will continue to transform and affect our lives now and in the future. The Shortest History books deliver thousands of years of history in one riveting, fast-paced read.

Computers and Society Ronald M. Baecker, 2019-04-24 The last century has seen enormous leaps in the development of digital technologies, and most aspects of modern life have changed significantly with their widespread availability and use. Technology at various scales - supercomputers, corporate networks, desktop and laptop computers, the internet, tablets, mobile phones, and processors that are hidden in everyday devices and are so small you can barely see them with the naked eye - all pervade our world in a major way. *Computers and Society: Modern Perspectives* is a wide-ranging and comprehensive textbook that critically assesses the global technical achievements in digital technologies and how they are applied in media; education and learning; medicine and health; free speech, democracy, and government; and war and peace. Ronald M. Baecker reviews critical ethical issues raised by computers, such as digital inclusion, security, safety, privacy, automation, and work, and discusses social, political, and ethical controversies and choices now faced by society. Particular attention is paid to new and exciting developments in artificial intelligence and machine learning, and the issues that have arisen from our complex relationship with AI.

Films from the Future Andrew Maynard, 2018-11-15 *Hard Science Fiction Films that Predict Future Technology* “As the breakneck advance of technology takes us into a world that is both exciting and menacing, sci-fi films give us an inkling of what is to come, and what we should avoid.” —Seth Shostak, senior astronomer at the SETI Institute, and host of *Big Picture Science* #1 Best Seller in Nanotechnology, Computers & Technology, Science Fiction & Fantasy, Mechanical Engineering, and Robotics & Automation, Cybernetics, and Experiments & Projects Dr. Andrew Maynard, physicist and leading expert on socially responsible development of emerging and converging technologies, examines hard science fiction movies and brings them to life. Science and technology are radically changing our world. *Films from the Future* is an essential guide to navigating a future dominated by complex and powerful new technologies. The jump from room-filling processors to pocket-size super computers is just the beginning. Artificial intelligence, gene manipulation, cloning, and inter-planet travel are all ideas that seemed like fairy tales but a few years ago. And now their possibility is very much here. But are we ready to handle these advances? As Maynard explains, “Viewed in the right way—and with a good dose of critical thinking—science fiction movies can help us think about and prepare for the social consequences of technologies we don’t yet have, but that are coming faster than we imagine.” Dr. Maynard looks at twelve sci-fi movies and takes us on a journey through the worlds of biological and genetic manipulation, human enhancement, cyber technologies, and nanotechnology. Gain a broader understanding of the complex relationship between science and society. The movies include old and new, and the familiar

and unfamiliar, providing a unique, entertaining, and ultimately transformative take on the power and responsibilities of emerging technologies. Read books such as *The Book of Why*, *The Science of Interstellar*, or *The Future of Humanity?* Then you'll love *Films from the Future!*
