

The Common Rule

Edward McPherson

The Common Rule Justin Whitmel Earley, 2023-03-14 Habits form us more than we form them. Though we yearn for the freedom of the gospel, we remain anxious people shackled by our screens and exhausted by our routines. The answer is a rule of life that aligns our habits with our beliefs. Justin Earley provides doable, life-giving practices to find freedom and rest for your soul.

Proposed Revisions to the Common Rule National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Revisions to the Common Rule for the Protection of Human Subjects in Research in the Behavioral and Social Sciences, 2013-08-26 On July 26, 2011, the U.S. Department of Health and Human Services issued an advance notice of proposed rulemaking (ANPRM) with the purpose of soliciting comments on how current regulations for protecting research participants could be modernized and revised. The rationale for revising the regulations was as follows: this ANPRM seeks comment on how to better protect human subjects who are involved in research, while facilitating valuable research and reducing burden, delay, and ambiguity for investigators. The current regulations governing human subjects research were developed years ago when research was predominantly conducted at universities, colleges, and medical institutions, and each study generally took place at only a single site. Although the regulations have been amended over the years, they have not kept pace with the evolving human research enterprise, the proliferation of multisite clinical trials and observational studies, the expansion of health services research, research in the social and behavioral sciences, and research involving databases, the Internet, and biological specimen repositories, and the use of advanced technologies, such as genomics. Proposed Revisions to the Common Rule: Perspectives of Social and Behavioral Scientists: Workshop Summary focuses on six broad topic areas: 1. Evidence on the functioning of the Common Rule and of institutional review boards (IRBs), to provide context for the proposed revisions. 2. The types and levels of risks and harms encountered in social and behavioral sciences, and issues related to the severity and probability of harm, because the ANPRM asks for input on calibration of levels of review to levels of risk. 3. The consent process and special populations, because new rules have been proposed to improve informed consent (e.g., standard consent form, consent for future uses of biospecimens, and re-consenting for further use of existing research data). 4. Issues related to the protection of research participants in studies that involve use of existing data and data sharing, because the ANPRM

proposed applying standards for protecting the privacy of healthcare data to research data. 5. Multidisciplinary and multisite studies, because the ANPRM proposed a revision to the regulations that would allow multisite studies to be covered by a single IRB. 6. The purview and roles of IRBs, because the ANPRM included possible revisions to categories of research that could entail changes in IRB oversight.

The Oxford Handbook of U.S. Health Law I. Glenn Cohen, Allison Hoffman, William M. Sage, 2016-11-18 The Oxford Handbook of U.S. Health Law covers the breadth and depth of health law, with contributions from the most eminent scholars in the field. The Handbook paints with broad thematic strokes the major features of American healthcare law and policy, its recent reforms including the Affordable Care Act, its relationship to medical ethics and constitutional principles, and how it compares to the experience of other countries. It explores the legal framework for the patient experience, from access through treatment, to recourse (if treatment fails), and examines emerging issues involving healthcare information, the changing nature of healthcare regulation, immigration, globalization, aging, and the social determinants of health. This Handbook provides valuable content, accessible to readers new to the subject, as well as to those who write, teach, practice, or make policy in health law.

Optimizing the Nation's Investment in Academic Research National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Science, Technology, and Law, Committee on Federal Research Regulations and Reporting Requirements: A New Framework for Research Universities in the 21st Century, 2016-06-29 Research universities are critical contributors to our national research enterprise. They are the principal source of a world-class labor force and fundamental discoveries that enhance our lives and the lives of others around the world. These institutions help to create an educated citizenry capable of making informed and crucial choices as participants in a democratic society. However many are concerned that the unintended cumulative effect of federal regulations undercuts the productivity of the research enterprise and diminishes the return on the federal investment in research. Optimizing the Nation's Investment in Academic Research reviews the regulatory framework as it currently exists, considers specific regulations that have placed undue and often unanticipated burdens on the research enterprise, and reassesses the process by which these regulations are created, reviewed, and retired. This review is critical to strengthen the partnership between the federal government and research institutions, to maximize the creation of new knowledge and products, to provide for the effective training and education of the next generation of scholars and workers, and to optimize the return on the federal investment in research for the benefit of the American people.
