Evaluating the Local Impacts of the Rio Olympics Marcelo Neri,2020-07-05 This book evaluates the local impacts and legacies of the Olympics in Rio by comparing Rio2016 with other Olympic experiences and evaluating the ways in which the Games served the city. The 2016 Rio Olympic Games took place in a scenario of enormous economic challenges and persistent inequalities. In contrast to all previous Olympic experiences, Brazil faced its worst economic recession ever recorded during the preparation phase for the Games. In addition to the national crisis, falling oil prices and corruption scandals fuelled the State of Rio's economic downfall. This book specifically assesses the relative social performance of Rio's city population with respect to control groups; covers traditional aspects of the Games' legacy such as tourism, infrastructure and sports practice; includes ordinary day-by-day aspects of the city's life, such as education, employment and housing; and scrutinizes critical areas such as urban mobility, gentrification and Guanabara Bay's pollution. This thorough analysis offers readers further understanding on assessing the impacts and legacies of the Olympic experience. It will be of great interest to upper-level students and academics of tourism, hospitality and events management.

Digital Innovations for a Circular Plastic Economy in Africa Muyiwa Oyinlola,Oluwaseun Kolade,2023-05-31 Plastic pollution is one of the biggest challenges of the twenty-first century that requires innovative and varied solutions. Focusing on sub-Saharan Africa, this book brings together interdisciplinary, multi-sectoral and multi-stakeholder perspectives exploring challenges and opportunities for utilising digital innovations to manage and accelerate the transition to a circular plastic economy (CPE). This book is organised into three sections bringing together discussion of environmental conditions, operational dimensions and country case studies of digital transformation towards the circular plastic economy. It explores the environment for digitisation in the circular economy, bringing together perspectives from practitioners in academia, innovation, policy, civil society and government agencies. The book also highlights specific country case studies in relation to the development and implementation of different innovative ideas to drive the circular plastic economy across the three sub-Saharan African regions. Finally, the book interrogates the policy dimensions and practitioner perspectives towards a digitally enabled circular plastic economy. Written for a wide range of readers across academia, policy and practice, including researchers, students, small and medium enterprises (SMEs), digital entrepreneurs, non-governmental organisations (NGOs) and multilateral agencies, policymakers and public officials, this book offers unique insights into complex, multilayered issues relating to the production and management of plastic waste and highlights how digital innovations can drive the transition to the circular plastic economy in Africa.
