

S On Dust Bowl

Sally Senzell Isaacs

Dust Bowl Janette-Susan Bailey,2016-10-04 This book takes the Dust Bowl story beyond Depression America to describe the 'dust bowl' concept as a transnational phenomenon, where during World War Two, US and Australian national mythologies converged. Dust Bowl begins with Depression America, the New Deal and the US Dust Bowl where massive dust storms darkened the skies of the Great Plains and triggered a major national and international media event and generated imagery describing a failed yeoman dream, Dust Bowl refugees, and the coming of a new American Desert. Dust Bowl traces the evolution of this imagery to Australia, World War Two and New Deal-inspired stories of conservation-mindedness, soil erosion and enemies, sheep-farmers and traitors, creeping deserts and human extinction, super-human housewives and natural disaster and finally, grand visions of a nation-building post-war scheme for Australia's iconic Snowy River—that vision became the Snowy Mountains Hydro-electric Scheme.

Life in the Dust Bowl Sally Senzell Isaacs,2001-09-24 Describes daily life on the Great Plains in the 1930's, explaining how dry weather and wind storms created the Dust Bowl causing farmers and their families to leave the area in search of work and food.

Reading Like a Historian Samuel S. Wineburg,Daisy Martin,Chauncey Monte-Sano,2012-11-30 This award-winning bestseller now includes an expanded introduction addressing the Common Core State Standards This practical book shows middle and high school teachers how to apply Wineburg's highly acclaimed approach to teaching, Reading Like a Historian, to increase academic literacy and sparking students' curiosity. Each chapter begins with an introductory essay that sets the stage of a key moment in American history, beginning with exploration and colonization and the events at Jamestown and ending with the Cuban Missile Crisis. Primary documents, charts, graphic organizers, visual images, and political cartoons follow each essay, as well as guidance for assessing students' understanding of core historical ideas.

Harvesting the High Plains H. Craig Miner,1998 Historian Craig Miner recounts the story of a former field hand whose joint enterprise with Wichita entrepreneur Ray Garvey created an agricultural wheat empire which still operates today. Miner details the daily decisions the men made which led to their success, as well as treating philosophical and historical questions about the relationship between agriculture and nature in a semi-arid region. Strategies for Managing Global Environmental Risks German Advisory Council on Global Change, 2000-03-15 Global risk potentials and their interplay with economic, social and ecological processes of change have emerged as a challenge to the international community. By presenting this report, the Council hopes to contribute constructively to an effective, efficient and objective management of the risks of global change. The approach taken by the Council is first to classify globally relevant risks and then to assign to these classes of risk both established and innovative risk assessment strategies and risk management tools. On this basis, management priorities can be set. The Council further recommends a number of cross-cutting strategies for international policies. These include worldwide alignment of liability law, creation of environmental liability funds, establishment of a United Nations Risk Assessment Panel and implementation of strategies aimed at reducing vulnerability to risk.

Between Soil and Society Jonathan Coppess, 2024-05 Winner of the 2024 Professional Scholarship Award from American Agricultural Law Association The United States spends approximately \$5 billion each year on federal programs designed to conserve natural resources and address the environmental consequences of modern agricultural production. Like farm policy, agricultural conservation policy is rooted in the Roosevelt administration's New Deal efforts of the 1930s. Farm conservation policy has waxed and waned since then, related to fluctuating economic and environmental concerns. In *Between Soil and Society* Jonathan Coppess traces the history and development of U.S. conservation policy, especially as it compares to and interacts with the development of farm policy. By answering questions about the differences in political support and development for these similar policy regimes, with efforts to apply legal and political theory to understand the differences, Coppess considers the implications of climate change and lessons for future policy development. One of the few books to make sense of the legal and economic analysis of agricultural conservation policy, *Between Soil and Society* provides a window into larger issues of American politics, governance, and policy development.

The Mythic West in Twentieth-century America Robert G. Athearn, 1986 Briefly describes life in the West, and discusses the ephemeral nature of the region, western towns, the tourist industry, agriculture, fiction, and the ecology movement.

Rooted in Dust Pamela Riney-Kehrberg, 1994 Examines the social impact of drought and depression in Kansas, illustrating how both farm and town families dealt with the deprivation by finding odd jobs, working in government programmes, or depending on federal and private assistance.

Dust Bowl Donald Worster, 2004-09-16 In the mid 1930s, North America's Great Plains faced one of the worst man-made environmental disasters in world history. Donald Worster's classic chronicle of the devastating years between 1929 and 1939 tells the story of the Dust Bowl in ecological as well as human terms.
