Myths, Amnesia and Reality in Military Conflicts, 1935-1945 Pier Paolo Battistelli, Andrew Sangster, 2017-01-06 Stalin fabricated the myth that the Germans carried out the Katyn massacre and the West accepted it while always suspecting the reality. In the same way, each country tried to forget the more painful memories of its past and construct its own mythology. The Germans were never taken to task at Nuremberg for bombing because the Anglo-Americans virtually carried out a war of annihilation. The French Gaullist myth was that it was decadent politicians who caused the defeat, and that fighting France freed itself. In a similar vein, the Italian resistance was fostered as a myth and used postwar to cover the fascist period of their history. British and American popular history tends to portray their countries as the main victors often ignoring the massive Russian contribution, and generally concentrates on the barbarity of the Eastern war. Much is forgotten and much enhanced; both incidents and leaders. The Italian military historian of this book writes in depth about the Italian war so often

ignored in western history, and tackles the myth of Italian cowardice, while the British author takes a cold, calculated look at Anglo-American leaders such as Montgomery, Mountbatten, Clark, Patton, and questions the myth of the special relationship between Great Britain and the USA, as well as the official and unofficial amnesia relating to self-inflicted gas wounds in Italy.

**Sophia's Fire** Sango Mbella,2005 An amazing fact about the human condition is that every human has at least one natural talent that can be developed to excellence. The capacity for self-refinement and development is remarkable in humans once this natural talent(s) has been identified. When it comes to attaining excellence and greatness, therefore, no human is incapable. How is worldly success made? How do ordinary people become great? Is it luck, or perhaps destiny? Sophia's (wisdom's) fire answers these questions by resurrecting the greats, whose minds decorated our world, and whose words now demystify the pursuit of worldly success. The paths to greatness are daunting, and therein, even merit desires mercy. What better mercy than the wisdom of those who have been there and have conquered. In the pursuit of worldly success, there is only one person that matters - you, and only one time that matters - now. Regardless of your perception of the universe and your fundamental beliefs, you owe yourself the duty to succeed. All humans are unique and complex entities, with unique dreams and aspirations. Success starts when dreams meet light and aspirations meet action. The time is ripe to give light to your dreams - Sophia's fire.

**The Apocalypse of the Reluctant Gnostics** Stuart Douglas,2018-04-19 This book presents a comparison of the Gnostic worldviews of Carl G. Jung and science-fiction author, Philip K. Dick, two figures who have done far more than most to revive an interest in the Gnostic tradition in the modern world. Despite profoundly different approaches - one was a depth psychologist whose unique insights and approach to psychology forced him to explore the depths of the unconscious in a way that inevitably led him to touch frequently on metaphysical or spiritual matters; the other was an author of science-fiction - there are some striking parallels between their unique Gnostic visions. With the relatively recent publication of both Jung's and Dick's personal journals - *The Red Book* (2009), and, *The Exegesis of Philip K. Dick* (2011), respectively - in which they articulate their Gnostic visions, it seems timely to make this comparison.

**Understanding the imaginary war** Matthew Grant,Benjamin Ziemann,2016-09-01 This collection offers a fresh interpretation of the Cold War as an imaginary war, a conflict that had imaginations of nuclear devastation as one of its main battlegrounds. The book includes survey chapters and case studies on Western Europe, the USSR, Japan and the USA. Looking at various strands of intellectual debate and at different media, from documentary film to fiction, the chapters demonstrate the difficulties to make the unthinkable and unimaginable - nuclear apocalypse - imaginable. The book will be required reading for everyone who wants to understand the cultural dynamics of the Cold War through the angle of its core ingredient, nuclear weapons.

Virtual Futures Joan Broadhurst Dixon,Eric Cassidy,2005-07-20 Virtual Futures explores the ideas that the future lies in its ability to articulate the consequences of an increasingly synthetic and virtual world. New technologies like cyberspace, the internet, and Chaos theory are often discussed in the context of technology and its potential to liberate or in terms of technophobia. This collection examines both these ideas while also charting a new and controversial route through contemporary discourses on technology; a path that discusses the material evolution and the erotic relation between humans and machines. Virtual Futures brings together diverse fields such as cyberfeminism, materialist philosophy, postmodern fiction, computing culture and performance art, with essays by Sadie Plant, Stelarc and Manuel de Landa (to name a few).

The collection heralds the death of humanism and the rise of posthuman pragmatism. The contested zone of debate throughout these essays is the notion of the posthuman, or the possibility of the cyborg as the free human. Viewed by some writers as a threat to human life and humanism itself, others in the collection describe the posthuman as a critical perspective that anticipates the next step in evolution: the integration or synthesis of humans and machines, organic life and technology. This view of technology and information is heavily influenced by Anglo American literature, especially cyberpunk, Pynchon and Ballard, as well as the materialist philosophies of Freud, Deleuze, and Haraway, *Virtual Futures* provides analyses by both established theorists and the most innovative new voices working in conjunction between the arts and contemporary technology.

Secret Weapons and World War II Walter E. Grunden,2005 Grunden's analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science, technology, and military history to provide an entirely unique look at a crucial but understudied aspect of World War II. Comparing the science and weapons programs of all the major combatants, he demonstrates that Japan's failure was nearly inevitable, given its paucity of strategic resources, an inadequate industrial base, the absence of effective centralized management to coordinate research, military hostility toward civilian scientists, and bitter interservice rivalries. In the end, Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East.--BOOK JACKET.
