Winds of Change II - The New Millennium Frank L. Battisti,2012-04-01 (Meredith Music Resource). This new publication is an extension of *The Winds of Change*, that traced the development of the American wind band/ensemble in the twentieth century. This book covers all the important conferences, concerts, events, initiatives, and compositions created for wind bands/ensembles during the first decade of the twenty-first century. In gathering information for this book, the author examined hundreds of scores, listened to dozens of recordings, attended conferences, interviewed wind band/ensemble director-conductors, and surveyed numerous professional journals and magazines. The result is a book that provides a panorama view of the American wind band/ensemble scene from 2000-2010.

Nature-Based Solutions to 21st Century Challenges Robert C. Brears,2020-03-24 This book provides a systematic review of nature-based solutions and their potential to address current environmental challenges. In the 21st century, society is faced by rapid urbanisation and population growth, degradation and loss of natural capital and associated ecosystem services, an increase in natural disaster risks, and climate change. With growing recognition of the need to work with ecosystems to resolve these issues there is now a move towards nature-based solutions, which involve utilising nature's ecosystem to solve societal challenges while providing multiple co-benefits. This book systematically reviews nature-based solutions from a public policy angle, assessing policy developments which encourage the implementation of nature-based solutions to address societal challenges while simultaneously providing human well-being and biodiversity benefits. This includes enhancing sustainable urbanisation, restoring degraded ecosystems, mitigating and adapting to climate change, and reducing risks from natural disasters. While nature-based solutions can be applied strategically and equitably to help societies address a variety of climatic and non-climatic challenges, there is still a lack of understanding on how best to implement them. The book concludes by providing a best practice guide for those aiming to turn societal challenges into opportunities. This book will be of great interest to policymakers, practitioners and researchers involved in nature-based solutions, sustainable urban planning, environmental management, and sustainable development generally.

Blue Legalities Irus Braverman,Elizabeth R. Johnson,2020-01-17 The ocean and its inhabitants sketch and stretch our

understandings of law in unexpected ways. Inspired by the blue turn in the social sciences and humanities, *Blue Legalities* explores how regulatory frameworks and governmental infrastructures are made, reworked, and contested in the oceans. Its interdisciplinary contributors analyze topics that range from militarization and Maori cosmologies to island building in the South China Sea and underwater robotics. Throughout, *Blue Legalities* illuminates the vast and unusual challenges associated with regulating the turbulent materialities and lives of the sea. Offering much more than an analysis of legal frameworks, the chapters in this volume show how the more-than-human ocean is central to the construction of terrestrial institutions and modes of governance. By thinking with the more-than-human ocean, *Blue Legalities* questions what we think we know—and what we don't know—about oceans, our earthly planet, and ourselves. Contributors: Stacy Alaimo, Amy Braun, Irus Braverman, Holly Jean Buck, Jennifer L. Gaynor, Stefan Helmreich, Elizabeth R. Johnson, Stephanie Jones, Zsafia Korosy, Berit Kristoffersen, Jessica Lehman, Astrida Neimanis, Susan Reid, Alison Rieser, Katherine G. Sammler, Astrid Schrader, Kristen L. Shake, Phil Steinberg

It's All Connected Benjamin Wheeler, Gilda Wheeler, Wendy Church, 2005 *It's All Connected* provides a thorough overview of a full range of global issues, as well as in-depth explorations of particular topics, debates, and solutions. Each unit contains thematically related chapters. The book concludes with a final unit on ideas and tools for addressing global issues, including a curriculum activity for students to study a particular global issue or region.

Beyond the War on Invasive Species Tao Orion, 2015-06-17 Invasive species are everywhere, from forests and prairies to mountaintops and river mouths. Their rampant nature and sheer numbers appear to overtake fragile native species and forever change the ecosystems that they depend on. Concerns that invasive species represent significant threats to global biodiversity and ecological integrity permeate conversations from schoolrooms to board rooms, and concerned citizens grapple with how to rapidly and efficiently manage their populations. These worries have culminated in an ongoing “war on invasive species,” where the arsenal is stocked with bulldozers, chainsaws, and herbicides put to the task of their immediate eradication. In Hawaii, mangrove trees (*Avicennia* spp.) are sprayed with glyphosate and left to decompose on the sandy shorelines where they grow, and in Washington, helicopters apply the herbicide Imazapyr to smooth cordgrass (*Spartina alterniflora*) growing in estuaries. The “war on invasive species” is in full swing, but given the scope of such potentially dangerous and ecologically degrading eradication practices, it is necessary to question the very nature of the battle. *Beyond the War on Invasive Species* offers a much-needed alternative perspective on invasive species and the best practices for their management based on a holistic, permaculture-inspired framework. Utilizing the latest research and thinking on the changing nature of ecological systems, *Beyond the War on Invasive Species* closely examines the factors that are largely missing from the common conceptions of invasive species, including how the colliding effects of climate change, habitat

destruction, and changes in land use and management contribute to their proliferation. There is more to the story of invasive species than is commonly conceived, and *Beyond the War on Invasive Species* offers ways of understanding their presence and ecosystem effects in order to make more ecologically responsible choices in land restoration and biodiversity conservation that address the root of the invasion phenomenon. The choices we make on a daily basis—the ways we procure food, shelter, water, medicine, and transportation—are the major drivers of contemporary changes in ecosystem structure and function; therefore, deep and long-lasting ecological restoration outcomes will come not just from eliminating invasive species, but through conscientious redesign of these production systems. “*Beyond the War on Invasive Species* is a devastating exposé of the military industrial invasive species complex and a sorely needed and impeccably researched volume that should become one of many as we recover from self-destructive attempts to eradicate parts of nature instead of acting with an understanding of the whole.”—Ben Falk, author of *The Resilient Farm and Homestead* and founder of Whole Systems Design

The SAGE Handbook of International Higher Education Darla K. Deardorff, Hans de Wit, John D. Heyl, Tony Adams, 2012-08-20 The SAGE Handbook of International Higher Education examines the internationalization of higher education from a marginal to a core dimension of higher education worldwide. This mainstreaming of internationalization is a fascinating phenomenon: new concepts, programs, providers, and methods of delivery are emerging; impressive national and regional scholarship programs have been established; radical reforms have been undertaken to make higher education globally competitive; and mobility of students and scholars has increased around the world. This groundbreaking handbook serves as a guide to internationalization of higher education and offers new strategies for its further development and expansion in the years to come. With a decidedly global approach, this volume brings together leading experts from around the world to illustrate the increasing importance of internationalization. The text encompasses the diversity and breadth of internationalization of higher education in all its thematic facets and regional impacts.
