The New Cool Neal Bascomb,2012-03-06 That Monday afternoon, in high-school gyms across America, kids were battling for the only glory American culture seems to want to dispense to the young these days: sports glory. But at Dos Pueblos High School in Goleta, California, in a gear-cluttered classroom, a different type of “cool” was brewing. A physics teacher with a dream – the first public high-school teacher ever to win a MacArthur Genius Award -- had rounded up a band of high-I.Q. students who wanted to put their technical know-how to work. If you asked these brainiacs what the stakes were that first week of their project, they’d have told you it was all about winning a robotics competition – building the ultimate robot and prevailing in a machine-to-machine contest in front of 25,000 screaming fans at Atlanta’s Georgia Dome. But for their mentor, Amir Abo-Shaer, much more hung in the balance. The fact was, Amir had in mind a different vision for education, one based not on rote learning -- on absorbing facts and figures -- but on active creation. In his mind’s eye, he saw an even more robust academy within Dos Pueblos that would make science, technology, engineering, and math (STEM) cool again, and he knew he was poised on the edge of making that dream a reality. All he needed to get the necessary funding was one flashy win – a triumph that would firmly put his Engineering Academy at Dos Pueblos on the map. He imagined that one day there would be a nation filled with such academies, and a new popular veneration for STEM – a “new cool” – that would return America to its former innovative glory. It was a dream shared by Dean Kamen, a modern-day inventing wizard – often-called “the Edison of his time” – who’d concocted the very same FIRST Robotics Competition that had lured the kids at Dos Pueblos. Kamen had created FIRST (For Inspiration and Recognition of Science and Technology) nearly twenty years prior. And now, with a participant alumni base approaching a million strong, he felt that awareness was about to hit critical mass. But before the Dos Pueblos D’Penguineers could do their part in bringing a new cool to America, they’d have to vanquish an intimidating lineup of “super-teams”- high-school technology goliaths that hailed from engineering hot spots such as Silicon Valley, Massachusetts’ Route 128 technology corridor, and Michigan’s auto-design belt. Some of these teams were so good that winning wasn’t just hoped for every year, it was expected. In *The New Cool*, Neal Bascomb manages to make even those who know little about – or are vaguely suspicious of – technology care passionately about a team of kids questing after a

different kind of glory. In these kids' heartaches and headaches – and yes, high-five triumphs -- we glimpse the path not just to a new way of educating our youth but of honoring the crucial skills a society needs to prosper. A new cool.

Political Tribalism in America Timothy J. Redmond, 2022-10-27 The democratic ideal demands that the citizenry think critically about matters of public import. Yet many Democrats and Republicans in the United States have fallen short of that standard because political tribalism motivates them to acquire, perceive and evaluate political information in a biased manner. The result is an electorate that is more extreme, hostile and willing to reject unfavorable democratic outcomes. In this work, the author provides a host of actionable strategies that are designed to reduce the influence of political tribalism in our lives. The text includes instructions for plumbing the depths of political views; evaluating sources of political information; engaging in difficult political conversations; appraising political data; and assessing political arguments. The first of its kind, this how-to guide is a must-read for partisans who want to become more critical political thinkers.

Led Zeppelin -- Houses of the Holy Led Zeppelin,1993-07 Emboldened by the success of Led Zeppelin IV and its classic-in-the-making Stairway to Heaven, Led Zeppelin's fifth album marked a broad stylistic expansion by Britain's pre-eminent band of the '70s. New directions included complex explorations of James Brown-style funk (The Crunge), reggae-cum-'50s pastiche (Dyer Maker), atmospheric jazzed-out keyboard journeys (No Quarter), Celtic mysticism (The Rain Song), Indian-inspired modal pieces (Dancing Days), and delicate folkie 12-string tunes that morph into electric riff-o-ramas (Over the Hills and Far Away).
