Lewis Bayles Paton

Shades of Meaning: Shadows in Medieval Manuscript Illumination Dominique DeLuca, 2025-03-27 Are there shadows in medieval art? Studies on the role of shadows in art history have either glanced over or ignored the medieval period, yet people of the Middle Ages certainly saw and thought about shadows and recorded their ideas about these phenomena in texts and images. This book examines references to shadows in science, religion, and folklore of the Middle Ages. Through the lens of fifteenth-century manuscript painting, it investigates visual, metaphorical, and supernatural shadows in art to discover what shadows meant to the medieval viewer.

Myths and Legends of the Medieval World Paul Watts, 2025-02-05 No one can deny the enduring power of medieval myths and legends. Tales of King Arthur, Merlin, Robin Hood, Sir Lancelot, magic, dragons, giants, demons, and the Holy Grail are as fascinating for us today as they have ever been. However, the stories we have inherited from our medieval forebears have often been transformed by the embellishments and additions of later generations. In every century since the Middle Ages, stories have been re-imagined, re-told, and sometimes radically changed to suit the audience of the day. This book aims to transport the reader back to the age of the Plantagenets and re-tell these stories as they would have been understood at the time. It explores the stories in detail and looks at what they meant to people living then, how they were

told and why they were important. *Myths and Legends of the Medieval World* provides a detailed account of medieval mythology in its original context. It offers a window into a medieval mind-set in which such things as angels, demons, visions, magic, holy relics, and other supernatural entities were an accepted reality. Explore some of the most puzzling and captivating mysteries of the Middle Ages. What lay behind the legend of the Holy Grail? How did people regard the perilous world of the medieval fairy? How did the medieval world view witchcraft? And what happened during the infamous trial of the Templars? These are all questions that *Myths and Legends of the Medieval World* sets out to answer.

J.R.R. Tolkien Harold Bloom, 2008 The revered author of the fantasy works *The Hobbit* and *The Lord of the Rings* also had a distinguished career as a professor at Oxford University and as a scholar specializing in Anglo-Saxon literature. This new edition is enhanced by a chronology, bibliography, notes on the contributors, and an introductory essay by noted literary scholar Harold Bloom. Book jacket.

Old English Medievalism Rachel A. Fletcher, Thijs Porck, Oliver M. Traxel, 2022 An exploration across thirteen essays by critics, translators and creative writers on the modern-day afterlives of Old English, delving into how it has been transplanted and recreated in the twentieth and twenty-first centuries. Old English language and literary style have long been a source of artistic inspiration and fascination, providing modern writers and scholars with the opportunity not only to explore the past but, in doing so, to find new perspectives on the present. This volume brings together thirteen essays on the modern-day afterlives of Old English, exploring how it has been transplanted and recreated in the twentieth and twenty-first centuries by translators, novelists, poets and teachers. These afterlives include the composition of neo-Old English, the evocation in a modern literary context of elements of early medieval English language and style, the fictional depiction of Old English-speaking worlds and world views, and the adaptation and recontextualisation of works of early medieval English literature. The sources covered include W. H. Auden, J. R. R. Tolkien, and Seamus Heaney, alongside more recent writers such as Christopher Patton, Hamish Clayton and Paul Kingsnorth, as well as other media, from museum displays to television. The volume also features the first-hand perspectives of those who are authors and translators themselves in the field of Old English medievalism.

American/Medieval Goes North Gillian R. Overing, Ulrike Wiethaus, 2019-10-07 One of the great virtues of *American/Medieval Goes North* is its wide range of contributors with fascinatingly diverse relationships to the main terms of

analysis. There are academic scholars, poets, filmmakers, tribal elders, teachers at various levels; there are Indigenous people, people from settler colonial cultures, expats, immigrants. Their analytic and imaginative encounters with the North catch at the intensely symbolic and political charge of that locus. At a time when Medieval Studies cannot afford to ignore the period's popular uptake – cannot continue with business as usual in the face of white supremacists' brazen appropriations of the Middle Ages – this volume points to new possibilities for grappling with the uneasy relationships between the 'American' and the 'medieval'. – Prof Carolyn Dinshaw, New York University

Atmosphere, Architecture, Cinema Michael Tawa, 2022-12-05 Atmosphere, Cinema, Architecture: Thematic Reflections on Ambiance and Place explores cinema and architecture as ambient and affective settings or circumstances that can enable the emergence of atmosphere. This book is an interdisciplinary reading of cinematographic practice which develops useful implications for spatial composition in art and architectural design. The way a film is set up, directed, composed, framed, and technically constructed can provide parallels, analogies and metaphors for the spatial organisation of cities, landscapes and buildings. Likewise, the way a built setting is conceived and devised can inform approaches to framing and spatial organisation in cinematography. The book begins on a personal note with a series of recollected atmospheric experiences, leading to an investigation of ambiguity and consilient discrepancy as circumstantial conditions necessary for the production of atmosphere. The mood of melancholia is explored to show the pivotal role that ambiguity, discrepancy and irresolution play in its distinctive ambiance. Atmosphere is then defined as an emergent condition arising between an ambient, affective circumstance and a mooded human being. The book then moves to analyse the inherent conditions in the setup of filmic and architectural settings that render them atmospheric. Reference is made to the cinema of Bresson, Resnais, Lynch, Tarr, Malik and Campion, and to Romanesque tympanae, the architectonic scenography of Franz Kafka's novel *The Castle* and the work of Spanish architects Flores Prats. The concluding section, *Anatomy of Atmosphere*, is a lexicon of concepts, themes and tactics around atmosphere that might usefully inform creative practice.

Words, Words, Words Diarmaid Ó Muirthe, 2004 Humorous, fascinating and informative, O Muirthe deploys a wide range of sources - both written and oral - to uncover words and phrases from the polyglot stockpot that is the English language. These refreshing and exploratory pieces range in place and time through Ireland, England and Scotland, ransacking dialects and etymologies derived from Old Norse, Old Irish, Old English, Middle Dutch, Norman French, High German, Medieval Latin, Ulster-Scots and Sanscrit. With his unerring ear, O Muirthe uncovers layers of social history, sexual practices, sporting habits and dietary needs gleaned from street, field and paper. Without our knowledge, we speak in tongues inherited from slang, folklore and the midden of the obsolete, underpinning and contributing to everyday experiences. The Way of Words contains multitudes in its pocket-histories. It will delight and enlighten all who care about language and communication.
