*Passport to the Cosmos* John E. Mack, 2000-11-07 In his groundbreaking follow-up to the bestselling *Abduction*, Pulitzer Prize-winner John E. Mack powerfully demonstrates how the alien abduction phenomenon calls for a revolutionary new way of examining the nature of reality and our place in the cosmos. Harvard professor Mack stunned the world when he published the astonishing results of his extensive research involving clients who claimed they had had encounters with alien life-forms. Writing with the authority and insight that have marked his distinguished career as a psychiatrist and writer, Mack used the remarkable stories to show how the abduction phenomenon has the vast potential to transform the foundation of human thought. In *Passport to the Cosmos*, Mack, who has done additional research with abductees in the United States and around the world, provocatively asserts that this phenomenon is part of a new age in human consciousness, a time in which we must be willing to embrace the idea that alien visitation is real on some level. Drawing on the rich tradition of non-Western and indigenous cultures, which are more accepting of the idea that we live in a multidimensional universe, Mack persuasively shows that by broadening our definition of what is real we can begin to explore a phenomenon that has deep and lasting implications for humanity. In *Passport to the Cosmos*, John Mack further solidifies his reputation as a brave pioneer on the forefront of the science of human experience with an authoritative voice that takes us into the twenty-first century.

**Third Displacement** John Hart, 2020-02-05 The question, Are we alone in the cosmos? has been answered. We are not alone. Geologist-paleontologist Pierre Teilhard de Chardin, SJ, stated, as early as the mid-1920s, that intelligent life likely exists elsewhere and distinguished scientists of today, including Harvard biologist, E. O. Wilson; Cambridge cosmologist, Stephen Hawking; astrophysicist and noted UAP researcher, Jacques Vallee; astronomer, Allen Hynek; and many others concur. The oral traditions of Native American elders teach that they have interacted periodically with Star People who are respected ancestors. Credible witness-participants today describe abductions by benevolent and malevolent Others. Discoveries by the Kepler, Hubble, and Gaia space telescopes, ground-based arrays of radio telescopes, and TESS (Transiting Exoplanet Survey Satellite) suggest that in the Milky Way, twenty-five billion planets are in the life-friendly Goldilocks Zone. In *Third Displacement: Cosmobiology, Cosmolocality, Cosmosocioecology*, author John Hart links experiences with research in science-based and Spirit-focused books and articles--including narratives about close encounters with Visitors from elsewhere in space (ETI) or Others from other cosmos dimensions (IDI)--in examination of the claim that Intelligent ExoEarth

life exists, that Otherkind has visited humankind.

*Walking Through Walls and Other Impossibilities* Milton E Brener, 2011-06-09 The goal of the aliens among us is not the study of Earth for purely academic purposes. It is something more vital to the aliens and more portentous for us. The picture that emerges from much research makes sense of several aspects of the alien presence, previously quite puzzling. They apparently are a dying race inhabiting a dying planet. They have undoubtedly mastered physical forces and phenomena of which we have not even dreamed. But it has come at a terrible cost. Their emotional life has been all but lost, existing only as a faint remnant from a long distant past. They may pity our hopelessly primitive technology, but they envy us our robust emotional life. Like all living things everywhere they live for the perpetuation of their genes. They do not hate us, nor do they seek our destruction. They seek to create a race of hybrids, combining their scientifically superior minds with our rich emotional makeup. The ridicule of the entire subject by the government and other forces, fearful of upheaval in our society, has aggravated the suffering of those chosen and victimized by the aliens, who apparently seek, ineptly sometimes, to minimize it. The author combines this scholarly approach with an almost folksy narrative style to make *Walking Through Walls* a very readable and approachable treatise on the phenomena... as good as any book on the subject and far more skillfully written than most, including those Brener has referenced most frequently, Bud Hopkins' *Intruders* and Philip Corso's *The Day after Roswell*. -Blue Ink Review

Passport to the Universe Ann Druyan, Steven Soter, 2006

Man's Fate and God's Choice Bhimeswara Challa, 2021-06-29 Stagnate as a 'creepy caterpillar' or transform into a 'beauteous butterfly'-this path-breaking book of a rare genre suggests-is the seminal choice before mankind, and every one of us. In this setting, the book raises some fundamental questions: What is man's rightful place in the cosmos and his manifest destiny on earth? Why are we so self-righteously self-destructive? Are we a doomed species? Or 'divine' beings struggling to overcome the hubris of the human intellect? Is God getting weary of mankind? How should we synergize human effort and Divine Grace? The book posits that any betterment in human behavior needs a cathartic change at the deepest levels. That requires diluting the dominance of the mind and reawakening the long-dormant intelligence of the human heart. To meet that challenge, we need minimum numbers, a 'critical mass' to create self-sustained momentum for transformation through consciousness change. And every single human of this generation should behave in such a way that he or she is that single person whose transformation could make the decisive species-scale difference. The book offers a menu of ideas and an agenda of action. This book could be itself become an input to mobilize that very 'critical mass' it advocates for human transformation. Well-planned and cohesively written, the book is noteworthy for its delightful blend of information and arguments, and reveals the depth of the author's understanding of the human predicament... This is a closely argued and thought-provoking book... The Hindu, 13 Sept 2011 [This book] is a gripping exposition on human nature and self-

transformation without preference to religion... Challa has critically provided a foundational argument for a deeper discussion of philosophical and practical ideals concerning self-transformation... harmonizing the head and the heart is the way for humans to function as spiritual beings. Recommended by the USR. The US Review of Books [The author] reflects upon the crisis of contemporary civilizations and outlines a blueprint for a new world order based on progressive spiritual values and change of human consciousness. The strength of this treatise is the sweep of Challa's reach and his treatment of a vastly complex set of issues that bedevil humankind today... India International Center Quarterly, Summer 2012 As a thinker and erudite scholar, [the author] has made a profound study of the world situation and the moral decadence of man... [This book] deserves to be on the shelves of university, college and public libraries... Triveni Magazine, July-Sept 2011 It is difficult to pigeon-hole this book as... a 'prophetic discourse', a 'journey into the human mind', a 'guide for human survival', a 'spiritual treatise'. It is an amalgam of all these and more... the volume reaches out to those who are already uneasy about the way we on this earth are progressing. The Book Review, India, June 2013

UFOs and Abductions David Michael Jacobs, 2000 Examining the nature of UFO evidence, the authors present a primer for scholars, skeptics, and others uneasy about investigating the field of UFOs. The volume also brings together three bestselling authors--David M. Jacobs, Budd Hopkins, and Pulitzer Prize winner John Mack--widely known for their writings on the controversial alien abduction phenomenon.

**Magic, Mystery, and Science** Dan Burton, David Grandy, 2004 Magic, Mystery, and Science presents the occult as a third stream of belief, as important to the shaping of Western civilization as Greek rationalism or Judeo-Christianity. The occult seeks explanations in a world that is living and intelligent--quite unlike the one supposed by science. By taking these beliefs seriously, while keeping an eye on science, this book aims to capture some of the power of the occult. Readers will discover that the occult has a long history that reaches back to Babylonia and ancient Egypt. It proceeds alongside, and frequently mingles with, religion and science. From the Egyptian Book of the Dead to New Age beliefs, from Plato to Adolf

Hitler, occult ways of knowing have been used to explain a world that still tempts us with the knowledge of its dark secrets. -- From publisher's description.

**Signs on the Earth** Richard Leviton, 2005 Focusing on a few global hot spots, Earth-energies scholar Leviton looks at the exploding number of reports from around the world of Virgin Mary apparitions, UFO sightings, and crop circle formations, and comes to the conclusion that something very real and very important is happening.

**The Dental Cosmos** J. D. White, John Hugh McQuillen, George Jacob Ziegler, James William White, Edward Cameron Kirk, Lovick Pierce Anthony, 1873

**Nuclear Winter Wonderland** Joshua Corin, 2008 An underachieving college kid has six days to save the world from atomic annihilation in this offbeat tale about a frenzied race from the icy Pocono Mountains to the dark heart of Walt Disney World. It all begins as Adam Weiss and his sister Anna head home to New Jersey for winter break. Pulling into a highway rest stop, they are confronted suddenly by a lunatic nuclear terrorist who kidnaps Anna and leads Adam off in furious pursuit. Along the way he teams up with a dyspeptic ex-mob thug and a Spanish-speaking female clown, creating an oddball rescue squad that is soon busy dodging the police and defeating an army of shadowy opponents. The showdown comes at midnight on Christmas Eve—when Hollywood-style entertainment meets 12 nuclear missiles.

**Heart of Diamonds** Dave Donelson, 2008 In his first collection of stories since *Fabulous Small Jews*, Joseph Epstein delivers all the pleasures his readers have come to expect: stories of ordinary men confronting the moments that define a life, told with the bittersweet humor and loving irony encompassed in the title of the book. These fourteen tales map a very particular world—Jews whose lives are anchored in Chicago—in rich, revealing detail even as they brim with universal longings: complex love affairs and unspoken rivalries, family triumphs and private disappointments. Epstein, who “happens to possess a standup comic’s gift for punch lines” (New York Times Book Review), brings his emphatically grown-up characters to witty, rueful, and charming life. *The Love Song of A. Jerome Minkoff* is a marvelous collection from a master of the short form and one of the most distinctive writers working in America today.

**The Master Planets** Donald Gallinger, 2008 In the summer of 1973, Peter Jameson is poised to take his band The Master Planets straight to the top of the charts. His ambitious plans are shattered when his mother's body is found floating in the river, an apparent suicide. When the media speculate that she is responsible for the murder of an elderly German farmer, Peter is caught in a web of intrigue involving Nazi war criminals and his mother's ruthless past as a Polish partisan. Suddenly, past collides with present, truth with falsehood, reality with illusion, and Peter abandons his musical aspirations.

Five decades of deceit and betrayal converge in this thrilling mediation on the ultimate cost of violence and revenge.
