Buildings for Education Stefano Della Torre,Massimiliano Bocciarelli,Laura Daglio,Raffaella Neri,2019-12-30 This open access book presents theoretical and practical research relating to the vast, publicly financed program for the construction of new schools and the reorganization of existing educational buildings in Italy. This transformative process aims to give old buildings a fresh identity, to ensure that facilities are compliant with the new educational and teaching models, and to improve both energy efficiency and structural safety with respect to seismic activity. The book is divided into three sections, the first of which focuses on the social role of the school as a civic building that can serve the needs of the community. Innovations in both design and construction processes are then analyzed, paying special attention to the Building Information Modeling (BIM) strategy as a tool for the integration of different disciplines. The final section is devoted to the built heritage and tools, technologies, and approaches for the upgrading of existing buildings so that they meet the new regulations on building performance. The book will be of interest to all who wish to learn about the latest insights into the challenges posed by, and the opportunities afforded by, a comprehensive school building and renovation program.

Archivio storico lombardo ,1888

Giuseppe Pollack architetto di Casa Belgiojoso Marica Forni,2016-01-03T00:00:00+01:00 Il libro descrive le composite matrici culturali che concorrono nel progetto a definire non solo un'architettura, ma un intero sistema produttivo a scala territoriale, che nel caso di Velate appare esemplare già agli occhi dei contemporanei quale modello di paesaggio in cui l'efficienza nell'uso delle risorse si traduce in una specifica qualità estetica. Questo intreccio, ricostruito ricorrendo a un contesto più esteso ed eterogeneo di fonti archivistiche, sottrae all'angustia della dimensione locale l'episodio di villa Belgiojoso e in parallelo contribuisce a restituire agli artefici di questa sperimentazione - il committente e il suo architetto - un profilo aggiornato alla conoscenza del dibattito e delle sperimentazioni che vivificano la cultura europea tra Settecento e Ottocento. Marica Forni docente al Politecnico di Milano è Dottore di Ricerca in Conservazione dei Beni Architettonici (1993) e specialista in Restauro dei Monumenti (1999). Svolge attività di ricerca sui temi della storia dell'abitare in età moderna - con attenzione alla gestione e ai modi d'uso delle dimore nobiliari - su tramiti, modi di diffusione e aggiornamento della cultura architettonica, sulla didattica dell'architettura, e, più recentemente sull'architettura del grand-hotel e i rapporti tra architetti e ateliers specializzati nella produzione di arredi tra XIX e XX secolo. Su questi ed altri argomenti ha pubblicato monografie e saggi in volumi e diversi periodici.

Italian Architects and Builders in the Ottoman Empire and Modern Turkey Paolo Girardelli,Ezio

Godoli,2019-01-29 This volume represents the first scholarly work in English devoted to the experience of Italian architects and builders in Turkey, as well as in many of the lands once belonging to the Ottoman Empire. Covering a complex cultural and political geography spanning from the Danubian principalities (today's Romania) to Anatolia and the Aegean region, the book is the result of individual research experiences that were brought together and debated in an international conference in Istanbul in March 2013, organized in collaboration with the Italian Institute of Culture and Boğaziçi University. Grounded on a flexible notion of identitarian boundaries, the book explores a rich transcultural field of encounters and interactions, analyzed and evaluated by scholars from six different countries on the basis of hitherto uncovered archival materials. Forms, ideas, individual mobility of actors and materials, networks of patronage, material and political constraints, and religious and cultural difference all play a significant role in shaping the landscapes, buildings and architectural projects presented and discussed here. From late 18th and early 19th century experiences of interaction between neo-classical backgrounds and westernizing Ottoman forms to the Italian proposals for a Turkish republican iconic landmark like the Atatürk mausoleum in Ankara; from the design of the first Ottoman university building to Ottoman varieties of Art Nouveau and Art Deco, and to the infrastructures and urban developments of the 1950s in Turkey, the book is both a richly illustrated and documented

overview of relevant cases, and a critical introduction to one of the most enticing areas of encounter in the global history of 19th and 20th century architecture and design.
