Juegos para niños con necesidades educativas especiales Mónica Montes Ayala, María Auxilio Castro García, 2014-02
Addressing preschool and elementary school teachers, and reclaiming the theory of multiple intelligences, two teachers show how to develop the bodily-kinesthetic, spatial, linguistic, logical-mathematical, musical, and personal intelligences of their students with special needs. Each teacher, according to whichever intelligence he seeks to develop in his students at a given time, can select the appropriate game based on the information the authors provide for each one: its purpose, the materials needed to carry it out, and evaluation criteria. This extremely useful resource is based on the experiences of teachers who are specialized in the field of special needs education, is easy to read and put into practice, and proves to be an invaluable tool for catering to students with special educational needs in a proper and focused way. Dirigiéndose a maestros de educación preescolar y primaria, y retomando la teoría de las inteligencias múltiples, dos maestras muestran cómo desarrollar las inteligencias cinestésico-corporal, espacial, lingüística, lógico-matemática, musical y personal de los alumnos con necesidades educativas especiales. Cada maestro, de acuerdo con la inteligencia que busca desarrollar en sus alumnos en el momento, puede escoger el juego apropiado valiéndose de la información que proporcionen las autoras para cada uno: su propósito, los materiales necesarios para llevarlo a cabo y criterios de evaluación. Este recurso sumamente útil está basado en la experiencia de maestros especializados en la educación de necesidades especiales, es fácil de leer y de llevar a la práctica y es una valiosa herramienta para atender de manera certera y enfocada a los alumnos con necesidades educativas especiales.
