The Spectre Of Hegel Louis Althusser,2014-01-07 Louis Althusser is remembered today as the scourge of humanist Marxism, but that was his later incarnation, an identity formed by years grappling with the intellectual inheritance of Hegel and Catholicism. The Spectre of Hegel collects the writings of the young Althusser, before his final epistemological break with the philosopher's work in 1953. Including his famed essay 'Ideology and Ideological State Apparatuses', The Spectre of Hegel gives a unique insight into Althusser's engagement with a philosophy he would later renounce.

Petermann's Maps Johannes Smits, Jan Smits, 2004 Petermann's Maps focuses on the maps published in the famous German journal Petermanns Geographische Mitteilungen. This journal, which still exists today, greatly influenced the development of scientific geography and cartography in Germany in the nineteenth century. Numerous articles have been published by recognized experts in this field, along with a multitude of illustrations, including maps, prints and photographs. The journal developed into an important publication, setting the standard in the history of the great expeditions and discoveries, and European colonial matters. Petermann's Maps contains a bibliography of over 3400 maps, the complete series of maps published in Petermanns Geographische Mitteilungen between the year of its foundation, 1855, to the end of the Second World War. Besides the bibliography 160 of the most attractive geographical and thematic colored maps are included in Petermann's Maps. These maps can also be viewed on the CD-ROM accompanying the book. An extensive introduction precedes the cartobibliography proper, placing Petermanns Geographische Mitteilungen in its historical context. The introduction describes the history of geography from the eighteenth century onwards, outlining the development of the study of the science of cartography in Germany. The major role the founder of the journal, Augustus Petermann (1822-1878),

and the publishing house Justus Perthes in Gotha played in these developments is discussed at length. The author, Jan Smits, has been in charge of the map collection of the Royal Library at The Hague since 1979. The series The Utrecht Studies in the History of Cartography in which Petermann's Maps appears as volume III, has been prepared under the direction of the Research Program Explokart of the University of Utrecht and is aimed at both researchers and laymen with an interest in these matters.
