

Healing Web Poster

Carl Lehrburger

Advances in Self-healing Systems Monitoring and Data Processing Igor Ruban, Andriy Kovalenko, Vitaly Levashenko, 2022-03-02 This book presents the systematized research, development and improvement of methods in self-healing communication and control systems. The book presents new models and methods of data processing, focused on the specifics of self-healing systems. The goal is to equip the reader with the necessary knowledge about trends in monitoring and detecting failures, modelling processes and methods of data processing in self-healing communication and control systems.

The Human Difference Alan Wolfe, 2023-04-28 Are we losing touch with our humanity? Yes, contends Alan Wolfe in this provocative critique of modern American intellectual life. From ecology, sociobiology, and artificial intelligence to post-modernism and the social sciences, Wolfe examines the antihumanism underlying many contemporary academic trends. Animal rights theorists and ecological extremists too often downplay human capacities. Computers are smarter than we are and will soon replace us as the laws of evolution continue to unfold. Even the humanities, held in sway by imported theories that are explicitly antihumanistic in intention, have little place for human beings. Against this backdrop, Wolfe calls for a return to a moral and humanistic social science, one in which the qualities that distinguish us as a species are given full play. Tracing the development of modern social theory, Wolfe explores the human-centered critical thinking of eighteenth- and nineteenth-century scholars, now eclipsed by post-modern and scientific theorizing. In the work of Durkheim, Marx, Weber, and Mead, human beings are placed on the center stage, shaping and interpreting the world around them. Sociology in particular emerged as a distinct science because the species it presumed to understand was distinct as well. Recent intellectual trends, in contrast, allow little room for the human difference. Sociobiology underlines the importance of genetics and mathematically governed evolutionary rules while downplaying the unique cognitive abilities of humans. Artificial intelligence heralds the potential superiority of computers to the human mind. Post-modern theorizing focuses on the interpretation of texts in self-referential modes, rejecting humanism in any form. And mainstream social science, using positivist paradigms of human behavior based on the natural sciences, develops narrow and arid models of social life. Wolfe eloquently makes a case for a new commitment to humanistic social science based on a realistic and creative engagement with modern society. A reconstituted social science, acknowledging our ability to interpret the world, will thrive on a

recognition of human difference. Nurturing a precious humanism, social science can celebrate and further refine our unique capacity to create morality and meaning for ourselves. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1993. Are we losing touch with our humanity? Yes, contends Alan Wolfe in this provocative critique of modern American intellectual life. From ecology, sociobiology, and artificial intelligence to post-modernism and the social sciences, Wolfe examines the antihu

Secrets of Ancient America Carl Lehrburger, 2015-01-02 The real history of the New World and the visitors, from both East and West, who traveled to the Americas long before 1492 • Provides more than 300 photographs and drawings, including Celtic runes in New England, Gaelic inscriptions in Colorado, and Asian symbols in the West • Reinterprets many archaeological finds, such as the Ohio Serpent Mound • Reveals Celtic, Hebrew, Roman, early Christian, Templar, Egyptian, Chinese, and Japanese influences in North American artifacts and ruins As the myth of Columbus “discovering” America falls from the pedestal of established history, we are given the opportunity to discover the real story of the New World and the visitors, from both East and West, who traveled there long before 1492. Sharing his more than 25 years of research and travel to sites throughout North America, Carl Lehrburger employs epigraphy, archaeology, and archaeoastronomy to reveal extensive evidence for pre-Columbian explorers in ancient America. He provides more than 300 photographs and drawings of sites, relics, and rock art, including Celtic and Norse runes in New England, Phoenician and Hebrew inscriptions in the Midwest, and ancient Shiva linga and Egyptian hieroglyphs in the West. He uncovers the real story of Columbus and his motives for coming to the Americas. He reinterprets many well-known archaeological and astronomical finds, such as the Ohio Serpent Mound, America’s Stonehenge in New Hampshire, and the Crespi Collection in Ecuador. He reveals Celtic, Hebrew, Roman, early Christian, Templar, Egyptian, Chinese, and Japanese influences in famous stones and ruins, reconstructing the record of what really happened on the American continents prior to Columbus. He also looks at Hindu influences in Mesoamerica and sacred sexuality encoded in archaeological sites. Expanding upon the work of well-known diffusionists such as Barry Fell and Gunnar Thompson, the author documents the travels and settlements of trans-Atlantic and trans-Pacific explorers, miners, and settlers who made it to the Americas and left their marks for us to discover. Interpreting their sacred symbols, he shows how their teachings, prayers, and cosmologies reveal the cosmic order and

sacred landscape of the Americas.

The Publishers' Trade List Annual ,1990

The Complete Directory for People with Chronic Illness Laura Mars, Laura Mars-Proietti, 2000-02 The widely hailed Complete Directory for People with Chronic Illness, updated for 2000/01, is structured around the 80 most prevalent chronic illnesses - from Asthma to Cancer to Wilson's Disease, providing a comprehensive overview of the support services and information resources available for people diagnosed with a chronic illness. Each chronic condition contains a brief description of the illness in layman's language followed by National and Local Organizations, State Agencies, Newsletters, Research Centers, Hotlines, Books and Periodicals. Also provided are sections on General Resources, both Associations and Media, as well as chapters on Death and Bereavement and Wish Foundations. This directory makes it possible to provide comprehensive and critical information from just one source in just one stop. An Entry Name Index and a Geographic Index will quickly direct users to relevant information and support services. The Complete Directory for People with Chronic Illness is a necessary addition to any reference collection.
