Journal of Interdisciplinary Science Topics, Volume 5 Cheryl Hurkett, 2016-06-03 The Journal of Interdisciplinary Science Topics (JIST) form part of the 'Interdisciplinary Research Journal' module in the third year of both the BSc and MSci Interdisciplinary Science degrees. It is intended to provide students with hands-on experience of, and insight into, the academic publishing process. The activity models the entire process from paper writing and submission, refereeing other students' papers, sitting on the editorial board that makes final decisions on the papers, to finally publishing in an online journal. This book is a compilation of the papers written by undergraduate students that were published during the 2015/2016 academic year.

Mastering the Case Interview, 9th Edition Alexander Chernev, 2018-03-22 Mastering the Case Interview offers detailed advice on how to ace the case interview. This book outlines the general principles of managing the case interview, delineates the most common types of cases, and outlines a framework for approaching each type of case. The discussion of the basic principles of case analysis is complemented by an extensive array of interview examples that includes 20 sample case discussions and 200 practice questions.

Rafael Viñoly Rafael Viñoly, 2002-11-21 Rafael Viñoly became famous as the architect of the stunning Tokyo International Forum (1989-1996). In Japan, where land is at a premium and public spaces are rare, the Forum with its 2.7 hectares and unusual design of public space, was widely admired. Originating in Uruguay, Viñoly heads an architectural office with an

impressive list of projects in the areas of architecture, urban planning and interior design, including significant buildings such as the Philadelphia Regional Performing Arts Center which opened recently, Princeton University Stadium, the New Bronx Supreme Criminal Court Complex. In 1969 Vinoly founded his first office in Buenos Aires which was influenced by the Modern Movement but also by the ideas and concepts of the 1960s reflected in the work of Buckminster Fuller, Archigram and the Smithsons. Due to the political situation he emigrated and opened an office in New York in 1982. Despite the difficulties involved in starting over again in a new country where in the meantime post-modernism was prevalent, Vinoly stayed true to his style of architecture, feeling bound to the ethical considerations of modernism yet constantly questioning it, adapting it to changing conditions. With offices in New York and Tokyo, Rafael Vinoly Architects is now one of the most successful architectural offices worldwide. This book documents a large number of Vinoly's most significant buildings and projects. It also includes an essay by Joan Ockman, one of the best-known architecture theoreticians in the USA, and texts by Rafael Vinoly on his career which has been marked by the difficult political situation in Argentina and the cultural exchange between S. America, Europe and the USA.

Learning from Fukushima Peter Van Ness, Mel Gurtov, 2017-09-29 Learning from Fukushima began as a project to respond in a helpful way to the March 2011 triple disaster (earthquake, tsunami, and nuclear meltdown) in north-eastern Japan. It evolved into a collaborative and comprehensive investigation of whether nuclear power was a realistic energy option for East Asia, especially for the 10 member-countries of ASEAN, none of which currently has an operational nuclear power plant. We address all the questions that a country must ask in considering the possibility of nuclear power, including cost of construction, staffing, regulation and liability, decommissioning, disposal of nuclear waste, and the impact on climate change. The authors are physicists, engineers, biologists, a public health physician, and international relations specialists. Each author presents the results of their work.

The Forgotten Sense Jonas Olofsson, 2025-01-07 "The Forgotten Sense leaves us with the hope of new discoveries and

new recoveries—so that we may once again revel in the glorious, fragrant world around us.”—Wall Street Journal By one of the world’s leading researchers into the science of smell, a fascinating exploration of our most essential yet least understood sense—enabling us to appreciate food and drink, warning us of dangers, and even influencing who we fall in love with Our sense of smell guides our lives far more than our screen-heavy, sight-privileged era would suggest. It animates our experience of food and drink, helps us access memories, and strengthens our intimacy with each other. But, long considered our most “beastly” sense, the inner workings of smell have stumped scientists for centuries. Now, cognitive scientist and leading smell researcher Jonas Olofsson uncovers the sophisticated processes that drive our olfactory system, with profound implications for how we perceive the world around us. Drawing from cutting-edge original research, Olofsson shows that not only is our sense of smell extraordinarily sensitive, its process of chemical exchange shaped human evolution on its most fundamental level. From the pheromones, environmental signals, and emotions we process with each breath, olfaction makes us the individuals we are. Moreover, smelling is an intellectual exercise, Olofsson argues, one that we have the remarkable capacity to strengthen and, with some effort, even regain after illness. With infectious curiosity and a host of applications—from emotional health and gastronomy to literature and even politics—The Forgotten Sense is a wide-ranging and entertaining look at this most understudied function of human life.
